How to read Factsheet

Application Amount for Fresh Subscription	This is the minimum investment amount for a new investor in a mutual fund scheme,	Modified Duration	Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.
AUM	AUM or Assets Under Management refers to the recent updated cumulative market value of investments managed by a mutual fund or any investment firm.	NAV	The NAV or the Net Asset Value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.
Benchmark	A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.	Nature of Scheme	The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.
Beta	Beta is an measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.	Rating Profile	Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.
Exit Load	Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹100 and the exit load is 1%, the redemption price would be ₹99 per unit.	Sharpe Ratio	The Sharpe ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.
Entry Load	A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹100 and the entry load is 1%, the investor will enter the fund at ₹101.	SIP	SIP or Systematic Investment Plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹500 every 15 of the month in an equity fund for a period of three years.
Note	SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the services rendered by the distributor.	Standard Deviation	Standard Deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high Standard Deviation, it means its range of performance is wide, implying greater volatility.
Fund Manager	An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.	Yield to Maturity	The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.
Holdings	The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/ securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.	Tracking Difference	Tracking Difference is the annualized difference of daily returns between the index and the NAV of the Index Fund.
Minimum Additional Amount	This is the minimum investment amount for an existing investor in a mutual fund scheme.		

CEO speak

Staying focussed in volatile markets

The Indian mutual fund industry continued its upward trajectory in June 2025, reaching a new high of Rs 74.40 lakh crore in net assets under management (AUM) (source: Association of Mutual Funds of India (AMFI)). The number of contributing SIP accounts also rose to an all-time high of 8.64 crore. However, July 2025 witnessed significant volatility in the Indian markets. Both Sensex and the Nifty experienced significant declines causing worries amongst investors. This downturn is primarily triggered by the geopolitical landscape of the current times and the imposition of the US tariffs on Indian imports to the US. This and the global economic uncertainties have dampened investor sentiments that have reflected in our markets.

Our advice to our investors has been consistent all along during every volatile or uncertain phase in the markets and it remains the same.

Strategic Recommendations for investors

Keep your focus on financial goal

Investments in mutual funds work best when you have a clear financial goal in mind and it is long term in nature like children's education or retirement, etc. If your financial goal is clear and your investments aligned to the same, market cycles and volatility should not rattle you. Stay invested and keep your eye on your financial goal.

Continue with your SIPs

Systematic investment plans (SIPs) work on rupee cost averaging. When markets fall, one gets more units. When markets rise the number of units purchased becomes lesser. This, by design, reduces your average cost per unit. When your goal is long term in nature, SIPs can continue to be a powerful tool for long term wealth creation.

Diversify across asset classes

A well-diversified portfolio can help manage risk. Consider allocating investments across equities, debt instruments, precious metals (gold and silver) as per your risk appetite and investment goals. Hybrid funds and Flexi-cap funds are also great ways to diversify towards a well-balanced portfolio.

Review and rebalance your portfolio

Adjusting asset allocations can help in capitalizing on emerging opportunities and mitigating risks. Over time, your investment goals and financial circumstances may evolve. It is prudent to review your portfolio at regular intervals to ensure alignment with market conditions, your own financial goals and changing needs as you progress in your life cycle.

In uncertain times, it's natural to feel anxious about the volatility and unpredictability of the markets. However, the key to successful long-term investing lies in staying invested and not letting emotions drive your decisions. The markets will always experience cycles of highs and lows—this is a fundamental aspect of investing. By sticking to a well-structured investment plan, you can ride out the volatility and benefit from the compounding growth over time.

Stay focused. Stay invested.

Tariff uncertainty reaches Indian shores

Equity Market Update & Outlook:

- Indian equity indices saw a correction in Jul'25 after 4 months of up-move with BSE Sensex and NSE Nifty both declining 2.8% respectively.
- Broader markets also saw a similar correction with NSE Midcap Index down 2.7% and BSE Smallcap Index losing 2.2% for the month.
- Healthcare was the best performing sector followed by FMCG. All other sectors delivered negative returns for the month. IT and Real Estate were the worst performing sectors. Capital Goods, Oil & Gas, Power, and Banks also underperformed the Nifty. Metals and Autos also delivered negative returns in July.

Global market update

- MSCI World index rose 1.2% in Jul led by US (S&P 500) rising 2.2%. However, MSCI Europe declined 1.8% and MSCI Japan declined 1.4%. MSCI EM also rose 1.7% supported by a 4.5% rise in MSCI China. Crude oil declined 2.8% in July.
- FII's again turned net sellers in July after 4 months of positive flows. FIIs sold US\$2.9bn in Indian equities while DII's invested US\$7.1bn. Domestic MFs invested US\$5.1bn while insurance inflow was US\$2.0bn.
- US government announced a 25% minimum import tariff on Indian goods from Aug 1, 2025. This is much higher than previously anticipated and at the higher end of the range imposed on most countries by the US. However, negotiations are still on-going as per the Indian government.
- CPI slowed to a more than 6 year low of 2.1%yoy down from an already low 2.8%yoy in May due to continued softness in food prices. Core-core inflation (i.e. core inflation ex petrol and diesel) however increased to 4.6%yoy in Jun from 4.3%yoy in May.
- Industrial production growth (IIP) slowed to 1.5%yoy in June from 1.9%yoy in May.
- Gross GST revenue collection was Rs 1.96 tn in July '25, up only 7.5%yoy.
- Other key developments during the month – India signed a Free trade agreement (FTA) with United Kingdom in July. As a part of this agreement UK will eliminate tariff on 99% of Indian goods exported to UK versus 73% currently.

Global Market Indices

Indices	Last Close	1 Month (Change)	CYTD 25 (Change)
International (in USD)			
MSCI World	4,076	1.2%	9.9%
Dow Jones	44,131	0.1%	3.7%
S&P 500	6,339	2.2%	7.8%
MSCI EM	1,243	1.7%	15.6%
MSCI Europe	2,372	-1.8%	18.4%
MSCI UK	1,432	0.8%	17.7%
MSCI Japan	4,284	-1.4%	9.0%
MSCI China	78	4.5%	20.7%
MSCI Brazil	1,373	-7.0%	16.7%

Valuations

Nifty consensus EPS estimate for CY25/26 saw a -3%/+3% change respectively during July as per Bloomberg. Nifty now trades on 20.4x 1-year forward PE. This is now in-line with its 5-year average and a ~10% premium to its 10-year average. Valuations in midcap and small cap space have also recovered following the sharp rally over the last few months.

Macro View

In our view, global macro environment remains challenging with heightened geo-political and economic uncertainties. Reciprocal tariffs announced by the US administration is likely to impact US and global growth outlook. Economists estimate US tariffs could have a modest 0.2%-0.4% negative impact on India's GDP growth. The government will potentially need to announce additional measures to offset this impact. While government capex is moderating, private capex may take time to recover given global uncertainties. RBI is now trying to aggressively ease policy rates and boost liquidity. We believe government has tried to partly address the slowdown in private consumption through the income tax rate cuts in the Union Budget. Forecast of an above normal monsoon is also a positive for rural demand.

Outlook

We believe growth cycle in India may be bottoming out. Interest rate and liquidity cycle, decline in crude prices and normal monsoon are all supportive of a pick-up in growth going forward. Although, global trade related uncertainty remains a headwind to private capex in the near term, we expect India's investment cycle to be on a medium-term uptrend supported by government investment in infrastructure and manufacturing, pickup in private investments and a recovery in real estate cycle. We expect higher private investments in renewable energy and related supply chain, localization of higher-end technology components, and India becoming a more meaningful part of global supply chains to support faster growth. Nifty valuations are modestly above their 5 and 10-year average. We remain constructive on Indian equities supported by the more robust medium term growth outlook.

Key drivers for future

On the headwinds, we have

- **Weak global growth** is likely to remain a headwind on demand going forward.
- **Global policy uncertainty:** Risk of tariffs and general policy uncertainty, mercantilist policies of certain countries and geo-political conflicts are likely to be a headwind to private investments.
- **Other factors / risks:** Sharp slowdown in government capex.

We see the following positives for the Indian market:

- **Recovery in private capex:** Industry capacity utilization based on RBI survey data is at a reasonably high level and

indicates potential for increase in private capex going forward. Also, continued expansion of the Production Linked Incentive (PLI) scheme is likely to further increase private investments in targeted sectors. We also expect higher private capex in renewable energy.

- **Supportive real estate cycle:** Real Estate remains another strong medium term growth driver having weathered the impact of higher interest rates. Demand trends in top metro cities remain strong and inventory levels have declined.
- **Global commodity prices:** Benign global prices of crude oil and fertilizers has been a positive for India from inflation, fiscal deficit and corporate margins perspective in FY24-25.

Past performance may or may not be sustained in the future and is not indicative of future results.

DEBT MARKETS

July 2025

Trade tariff matters: Deal or No deal?

The 90-day pause on reciprocal tariff by the US administration was pushed ahead to early August. Many countries continued with negotiations and while a few countries managed to conclude the deal, a few countries continue to negotiate the terms, yet there is a new wave of sweeping tariffs on trading partners without much retaliation. Nearly 70-countries have seen fresh tariff rate announcements which for most nations has been set at a lower rate compared to the levies announced in April 2025. The implementation date for the new tariffs is early August which consequently is seen raising the effective global tariff rate for US imports to 17.5% which is a substantial increase from the 2.3% levels seen last year. As per a note by the Budget Lab (Yale), it would be the highest level seen since 1935. The new duties would test the global trade and global growth resilience. This was also the topic illustrated by the IMF in its July WEO. The trade tariff talks have played a key role in shaping market sentiments through July with the quickest channels of impact visible in asset churn and FX swings across countries, EMs & AEs.

July is like a story of two halves where the first half of the month saw trade deals come through and keeping sentiments positive, however, the second half of July saw trade deals with little details, continued negotiations, increasing pressure on the Fed Chair Powell with concerns around the Fed's independence. By the end of July, outlook turned a little grim following the weak jobs data and resignation by a US Fed Governor – which sent stock markets lower, pushed the dollar higher and the US treasuries yields higher. The AEs saw weaker sentiment in general amid the tariff and policy uncertainty. The EMs too saw sentiments remaining fragile, reflecting in their currency movements. For July, the EM basket ended weaker against the dollar.

One of the most tracked lead indicators has been PMI Manufacturing which has displayed a weakening momentum. The global PMI fell by a full point to 48.2 in July, with the decline driven by the US and China with Europe in contraction zone. Among EMs it remains to be seen if the positive trend esp. in Vietnam, Thailand, Malaysia, Philippines sustains. For Asia ex Japan and China, activity was robust, mainly driven by India.

India's July PMI Manufacturing accelerated to 59.1 sustaining the rapid pace of expansion seen in recent years with positive trends in the new orders but it was driven by domestic orders as export orders rose at a slower rate. Having said that, 25% plus a potential penalty by the US on Indian imports are higher than the ones levied on most Asian exporting countries which is seen as a major risk to manufacturing.

For now, there is optimism around improvement in rural demand following the healthy progress of South-west monsoon. All-India precipitation has been encouraging with rains 6% above normal as of end-July 2025. The crop sowing activity is also progressing well with Kharif sowing at +4% YoY as of 25-July. Over 75% of normal area has been sown till end-July - higher than last two years. It is raining good news, on this front.

MPC takes a pause to assess: The RBI MPC unanimously decided to maintain a status-quo on policy rates with the Repo Rate held steady at 5.50% and retained the policy stance as neutral. We see today's policy decision as a neutral hold and the MPC would take a meeting-by-meeting approach. Today's hold is the first rate hold since Dec'24, as the RBI had undertaken 100bps of policy rate cuts in 1H CY25. At the Jun'25 policy, the RBI Governor had signaled data dependency after a frontloaded move of 50bps cut.

The policy decision is in sync with its earlier policy remark "... monetary policy is left with very limited space to support growth." While the MPC has retained its growth forecast at 6.5% for FY26 and 6.6% for Q1FY27, the downside risks to growth are somewhat higher amid the trade tariff related uncertainty. Meanwhile, the downward revision in its inflation forecast by 60bps to 3.1% for FY26 still gives the elbow room to act on policy rates. The space to cut, however, remains constrained as the four-quarter ahead inflation forecast is pegged at 4.9% YoY for the June-ending quarter of 2026.

Growth-inflation outlook: Growth has held up well with some pick-up expected in the coming festive season and is evolving in line with MPC's assessment of 6.5% for FY26 and is sticky at 6.6% for Q1FY27 - while stating that the uncertainties of tariffs are still evolving.

The FY26 inflation outlook has turned more benign than expected in June supported by large favourable base effects, steady progress of the monsoon, healthy kharif sowing, adequate reservoir levels and comfortable buffer stocks of foodgrains. MPC also noted that, core inflation is likely to remain moderately above 4% during the year. Overall, inflation forecast is above the 4% levels for 1H CY26.

MPC's growth and inflation forecasts laid out below:

Period	Growth Forecast			Inflation Forecast			
	Jun-25	Aug-25	Revision	Apr-25	Jun-25	Aug-25	Revision
Q1 FY2026	6.50%	6.50%	0.00%	3.60%	2.90%	2.70%	-0.20%
Q2 FY2026	6.70%	6.70%	0.00%	3.90%	3.40%	2.10%	-1.30%
Q3 FY2026	6.60%	6.60%	0.00%	3.80%	3.90%	3.10%	-0.80%
Q4 FY2026	6.30%	6.30%	0.00%	4.40%	4.40%	4.40%	0.00%
FY2026	6.50%	6.50%	0.00%	4.00%	3.70%	3.10%	-0.60%
Q1FY27	-	6.60%	-	-	-	4.90%	-

Source: RBI MPC Policy Resolutions

Liquidity: The RBI did not announce any fresh measures, but did indicate that it will continue to be nimble and flexible in its liquidity management. The remark was to “maintain sufficient liquidity in the banking system” as compared to any indication on the level of liquidity per se. The Governors’ statement did reveal that the weighted average call rate (WACR) will continue to be the operating target of monetary policy, and it would continue with the two-sided operations across tenors to modulate system liquidity with the objective of maintaining the operating target rate at the policy rate. This is expected to keep the shorter dated rates aligned to the WACR rate. The easy liquidity conditions would enhance policy transmission.

Our Take:

The policy outcome was largely a non-event policy and in-line with our expectations. However, the markets were disappointed following the unanimous decision of a status-quo policy, no downward revision in growth and higher inflation prints for 1HCY26. Going forward, as the dust settles on tariff related uncertainties and its impact on India’s growth becoming more visible the RBI-MPC would take a calibrated approach by end-CY25, more so with inflation outlook remaining benign till Q4FY26. The liquidity conditions would stay easy with the CRR cuts kicking-in in one-months’ time furthering the past policy easing to permeate into lower borrowing rates. Lastly, the US Fed moving lower on its rates from September may further provide the wiggle room to act on the policy rates. Currently, with a benign inflation outlook, India’s growth story will take center stage at the next few policy meetings. We continue to believe that the easing cycle is not over yet and that the room to cut opens-up in the backdrop of the abovementioned scenarios playing out. The Governor at the presser stated that it remains data dependent and that it will take a meeting-by-meeting approach.

Market outlook and Fund positioning

RBI MPC decided to leave repo rate at 5.50% and maintained the neutral stance, emphasizing a pause in backdrop of frontloaded 100 bps of cuts in the preceding policies. However, MPC recognized the global uncertainties & tariffs pose a risk to growth while downplaying its impact on inflation. In this scenario, MPC is likely to remain data dependent. Any possible room for further easing may open up if GDP prints come lower than expectations and Fed starts aggressively easing due to weaker labour market conditions. G-Sec rates might remain range bound till any of these triggers come into effect. However, we continue to believe liquidity will be the main driver of yields going forward, and RBI will continue to provide the system with ample liquidity to ensure transmission of earlier rate cuts happen in the system. Currently, corporate bonds in the 2-4 year segment offer favorable spreads of 65-75 bps over IGBs and is likely to benefit from spread compression. As we approach the fag end of this easing cycle, focus is likely to remain on corporate bonds to chase the carry, and we continue to remain overweight on 2-4 year corporate bonds.

HSBC Corporate Bond Fund, HSBC Short Duration Fund, HSBC Banking and PSU Debt Fund and HSBC Medium Duration Fund are positioned in the 2-4 year corporate bond segment, to benefit from this positioning. Hence, we recommend these funds as an investment opportunity for investors looking at a short-to-medium term investment horizon.

HSBC Flexi Cap Fund

Flexi Cap Fund - An open ended dynamic equity scheme investing across large cap, mid cap, small cap stocks.

Investment Objective: To seek long term capital growth through investments made dynamically across market capitalization (i.e. Large, Mid, and Small Caps). The investment could be in any one, two or all three types of market capitalization. The Scheme aims to predominantly invest in equity and equity related securities. However, in line with the asset allocation pattern of the Scheme, it could move its assets between equity and fixed income securities depending on its view on these markets. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

- To create wealth over long-term
- Investment predominantly in equity and equity related securities across market capitalization

***Investors should consult their financial advisers if in doubt about whether the product is suitable for them.**

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Small Cap Fund

Small Cap Fund - An open ended equity scheme predominantly investing in small cap stocks.

Investment Objective: To generate long term capital growth from an actively managed portfolio of equity and equity related securities of predominantly small cap companies. However, it could move a portion of its assets towards fixed income securities if the fund manager becomes negative on the Indian equity markets. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

HSBC Nifty 50 Index Fund

Index Fund - An open ended Equity Scheme tracking Nifty 50 Index.

Investment Objective: The scheme will adopt a passive investment strategy. The scheme will invest in stocks comprising the Nifty 50 index in the same proportion as in the index with the objective of achieving returns equivalent to the Total Returns Index of Nifty 50 index by minimizing the performance difference between the benchmark index and the scheme. The Total Returns Index is an index that reflects the returns on the index from index gain / loss plus dividend payments by the constituent stocks. There is no assurance that the investment objective of the Scheme will be realized.

⁵Continuing plans

As a result of the acquisition, HSBC AMC will have two equity linked savings scheme ("elss") in the form of HSBC Tax Saver Equity Fund (an open ended elss with a statutory lock in period of 3 years and tax benefit), and L&T Tax Advantage Fund (to be renamed as HSBC ELSS Fund). As per elss guidelines, a mutual fund can have only one open-ended elss scheme. In view of the said restriction, we propose to stop the subscription into HSBC Tax Saver Equity Fund from close of business hours on November 25, 2022. Hence, no sip, stp-in, or switch into the fund will be permitted from close of business hours on November 25, 2022. For the sake of clarity, we wish to inform you that the unitholders will be allowed to hold their existing investments in this fund, except that no further investments / subscription would be accepted in this fund. However, unitholders will be permitted to redeem / switch out their units post the mandatory lock-in period.

PRC Matrix

Potential Risk Class			
Credit Risk →	Relatively Low (Class A)	Moderate (Class B)	Relatively High (Class C)
Interest Rate Risk ↓			
Relatively Low (Class I)		B-I	
Moderate (Class II)			
Relatively High (Class III)			
A relatively low interest rate risk and moderate credit risk.			

Potential Risk Class ('PRC') matrix indicates the maximum interest rate risk (measured by Macaulay Duration of the scheme) and maximum credit risk (measured by Credit Risk Value of the scheme) the fund manager can take in the scheme. PRC matrix classification is done in accordance with and subject to the methodology/guidelines prescribed by SEBI to help investors take informed decision based on the maximum interest rate risk and maximum credit risk the fund manager can take in the scheme, as depicted in the PRC matrix.

This product is suitable for investors who are seeking*:

- Liquidity over short term
- Investment in Debt / Money Market Instruments such that the Macaulay[^] duration of the portfolio is between 6 months to 12 months.

***Investors should consult their financial advisers if in doubt about whether the product is suitable for them. ^ The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.**

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Ultra Short Duration Fund

Ultra Short Duration Fund - An open ended ultra-short term debt scheme investing in instruments such that the Macaulay Duration of the portfolio is between 3 months to 6 months. (Please refer Page No. 11 for explanation on Macaulay's duration). Relatively Low interest rate risk and moderate credit risk.

Investment Objective: To provide liquidity and generate reasonable returns with low volatility through investment in a portfolio comprising of debt & money market instruments. However, there is no assurance that the investment objective of the scheme will be achieved.

PRC Matrix^{^^}

Potential Risk Class			
Credit Risk →	Relatively Low (Class A)	Moderate (Class B)	Relatively High (Class C)
Interest Rate Risk ↓			
Relatively Low (Class I)			
Moderate (Class II)			
Relatively High (Class III)	A-III		
Relatively High interest rate risk and relatively low credit risk.			

Potential Risk Class ('PRC') matrix indicates the maximum interest rate risk (measured by Macaulay Duration of the scheme) and maximum credit risk (measured by Credit Risk Value of the scheme) the fund manager can take in the scheme. PRC matrix classification is done in accordance with and subject to the methodology/guidelines prescribed by SEBI to help investors take informed decision based on the maximum interest rate risk and maximum credit risk the fund manager can take in the scheme, as depicted in the PRC matrix.

This product is suitable for investors who are seeking*:

- Regular income over medium to long term
- Investment in diversified portfolio of fixed income securities such that the Macaulay[^] duration of the portfolio is between 4 year to 7 years

***Investors should consult their financial advisers if in doubt about whether the product is suitable for them. [^]The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.**

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Dynamic Bond Fund

Dynamic Bond Fund - An open ended dynamic debt scheme investing across duration. A relatively high interest rate risk and relatively low credit risk.

Investment Objective: To deliver returns in the form of interest income and capital gains, along with high liquidity, commensurate with the current view on the markets and the interest rate cycle, through active investment in debt and money market instruments. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

PRC Matrix

Potential Risk Class			
Credit Risk →	Relatively Low (Class A)	Moderate (Class B)	Relatively High (Class C)
Interest Rate Risk ↓			
Relatively Low (Class I)			
Moderate (Class II)			
Relatively High (Class III)	A-III		
A relatively high interest rate risk and relatively low credit risk.			

Potential Risk Class ('PRC') matrix indicates the maximum interest rate risk (measured by Macaulay Duration of the scheme) and maximum credit risk (measured by Credit Risk Value of the scheme) the fund manager can take in the scheme. PRC matrix classification is done in accordance with and subject to the methodology/guidelines prescribed by SEBI to help investors take informed decision based on the maximum interest rate risk and maximum credit risk the fund manager can take in the scheme, as depicted in the PRC matrix.

This product is suitable for investors who are seeking*:

- Generation of returns over medium to long term
- Investment in Government Securities

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Conservative Hybrid Fund

Conservative Hybrid Fund - An open ended hybrid scheme investing predominantly in debt instruments.

Investment Objective: To seek generation of reasonable returns through investments in debt and money market Instruments. The secondary objective of the Scheme is to invest in equity and equity related instruments to seek capital appreciation. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

***HSBC Large Cap Fund:** The launch date of the Nifty 100 TRI is Jan 01, 2003 whereas the inception date of the scheme is Dec 10, 2002. The corresponding benchmark returns since inception of the scheme not available. (niftyindices.com)

***HSBC Corporate Bond Fund:** The launch date of the NIFTY Corporate Bond Index A-II is Sep 03, 2001 and the same for CRISIL 10 year Gilt Index is September 01, 2001 whereas the inception date of the scheme is Mar 31, 1997. The corresponding benchmark returns since inception of the scheme not available. (niftyindices.com)

***HSBC Gilt Fund:** The launch date of the NIFTY All Duration G-Sec Index is Sep 03, 2001 and the same for CRISIL 10 year Gilt Index is September 01, 2001 whereas the inception date of the scheme is Mar 29, 2000. The corresponding benchmark returns since inception of the scheme not available. (niftyindices.com)

***HSBC Liquid Fund:** Since there was no continuous NAV history available for the surviving Plan of HSBC Liquid Fund prior to May 19, 2011, returns since the said date have been considered for calculating Since Inception performance. The inception date of HSBC Liquid Fund however is December 04, 2002.

***HSBC Midcap Fund:** The launch date of the Nifty Midcap 150 TRI is Apr 01, 2005 whereas the inception date of the scheme is Aug 09, 2004. The corresponding benchmark returns since inception of the scheme not available. (niftyindices.com)

Since inception returns are to be provided since the date of allotment of units.

Additional benchmark as per clause 13.3.4 of SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024.

IDCW are assumed to be reinvested and Bonus is adjusted.

The performance details provided herein are of Regular as well as Direct Plan - Growth Option. Returns on ₹10,000 are point-to-point returns for the specific time period, invested at the start of the period. The returns for the respective periods are provided as on last available NAV of July 2025 for the respective schemes. Returns for 1 year and Above are Compounded Annualized. Returns for less than 1 year is Simple Annualized. Load is not taken into consideration for computation of performance. Different plans shall have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged to the Regular Plan. Considering the varying maturities of the close ended schemes, the performance of close-ended schemes is not provided as it is strictly not comparable with that of open-ended schemes.

*Post merger performance of the surviving scheme, arising out of merger of schemes with similar features, is computed as per the provisions of Clause 13.4 of SEBI Master Circular No- SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 using the weighted average performance of both transferor and transferee schemes. In other cases, performance is computed using the Applicable NAV of the surviving/ continuing schemes. ~ Face value Rs 10 and ~~~ Face value Rs 1000

As per ELSS guidelines, a mutual fund can have only one open-ended ELSS scheme. In view of the said restriction, subscription into HSBC Tax saver Equity Fund has been closed from business hours on November 25, 2022. Hence, no SIP, STP or switch into HSBC Tax saver Equity Fund is allowed from the close of business hours on November 25, 2022. However, the unitholders will be allowed to hold their existing investments, except that no further investments / subscription would be accepted. Unitholders will be permitted to redeem / switch out their units post the mandatory lock-in period.

The above amendment in minimum SIP amount, number of installments and aggregate amount for SIP shall be applicable only for prospective investors from the Effective Date.
