# HSBC Equity Hybrid Fund (HEHF)

Aggressive Hybrid fund - An open ended hybrid scheme investing predominantly in equity and equity related instruments

December 2021

### Investment Objective:

To seek long term capital growth and income through investments in equity and equity related securities and fixed income instruments. However, there is no assurance that the investment objective of the Scheme will be achieved.

<sup>1</sup> As on 30 November 2021 of Growth option. During the same period, scheme benchmark (30% of CRISIL Composite Bond Fund Index and 70% of S&P BSE 200 TRI) has moved by 1.6X to Rs. 167,830 from Rs.100,000 and delivered return of 18.12. Please refer page no. 5 for detailed performance of HSBC Equity Hybrid Fund. <sup>2</sup> During the same period, value of scheme benchmark (30% of CRISIL Composite Bond Fund Index and 70% of S&P BSE 200 TRI) has moved to 518,091.

### Portfolio Strategy

#### Fund Philosophy:

- Prefer dominant and scalable businesses available at reasonable valuations.
- Profit pool consolidation with dominant players to continue and disruption to accelerate this shift.
- Stock selection focuses on earnings growth trajectory and within that, the emphasis lies on earnings surprises.

#### Key portfolio themes:

- Continue to maintain a pro-cyclical bias in the portfolio. This is driven by strong medium term earnings growth outlook.
- Expect earnings growth to rebound and is expected to sustain in high-teens beyond FY22 as well.
- Multi-year earnings visibility driven by cyclical recovery on the back of revival in capex over the next 2-3 years.
- Benign cost of capital environment to support equity performance.
- Prefer rate sensitives followed by domestic cyclicals, exporters and domestic consumption. Predominantly regulated businesses come last in the pecking order.
- Preference dictated by assessment of sectors / segments leading contribution to the market earnings growth over the next 2-3 years.

## Portfolio sectoral positioning:

View	Sector						
Positive and Overweight	Financials (Private banks)	Healthcare	Industrials	Materials	Technology	Real Estate	Consumer Discretionary
Underweight	Consumer Staples	Energy	Utilities	Communication Services	-	-	-

### Sector Attribution – Equity portion (1 Year):

- Equity performance was helped by stock selection during this period. Stock selection within Consumer Discretionary, Healthcare & Materials drove the performance.
- In case of allocation, being OW Real Estate, Industrials and UW Consumer Staples, Energy helped the performance.
- Being UW Utilities, Metals, Communication Services and OW Financials, Healthcare adversely impacted the performance.

## Asset allocation

### Asset Allocation

### Market Capitalisation

## HSBC Equity Hybrid Fund – Key sectors

### Financials (Private Banks)

- We are positive on financials (i.e. large private banks / lenders), driven by the thesis of (1) cyclical recovery in the economy and (2) expectation of large lenders to emerge stronger post pandemic with their ROAs/profitability to be near or above previous peaks.
- In addition to the same, large lenders appear attractive on valuations and we expect them to re-rate as credit growth picks up in the economy. They should continue to gain market share on account of the strength in capital adequacy, granular deposit franchise and investments in digital infrastructure.
- We also have taken exposure to Insurers, which would benefit from financialization of savings.

### Materials

- The overweight position in Materials is on account of the exposure to domestic cyclicals (Cement) and Chemicals while we remain negative on global cyclicals / Metals.
- We like the specialty chemicals space due to the robust demand (order book build up) and consequent earnings growth outlook. We expect larger niche players to continue to deliver faster revenue traction as India continues to benefit from the global supply chain diversification.
- Cement is a play on domestic growth recovery and improvement in capacity utilization, which shall keep prices firm and improve profitability.
- We continue to remain on the sidelines in global commodities space due to falling leverage and have a small position (in order to mitigate risk in the portfolio).

### Technology

- We believe that the current cycle has durable legs and is likely to last for longer, even 3-4 years. So higher valuations for the sector in general is justified given the strong growth visibility.
- We remain constructive on the sector prospects from a medium to long term perspective. The pandemic has accelerated the shift towards a more digitized world, resulting in continued technology investments from enterprises across industries globally.
- Indian IT shall continue to gain market share owing to proven capabilities across horizontals, domain knowledge of verticals, scale and access to talent. In addition, large Indian IT companies have strong management, robust profitability ratios and prudent capital allocation.
- We prefer solution providers with strong digital capabilities, scale of operations and growth visibility.

Sector positioning - Month end Data as on 30 November 2021

## Equity Market Update

- Indian equity markets have outperformed most of the key global equity indices on a YTD basis. This has made Indian equity market valuations richer.
- The macro releases during November point towards a steady recovery in economic activities.
- 2QFY22 turned out to be a steady quarter with the above expectations corporate earnings (Nifty universe).
- The Nifty EPS estimate for FY22 was broadly unchanged while there were upgrades seen for FY23/24 estimates.
- On P/E basis, Nifty is currently trading at 22.8x / 19.4x FY22/23 earnings estimates.
- Easy global liquidity could be at risk given the accelerated Fed taper timeline that the market is factoring in now.
- Given the rich market valuations, earnings growth needs to catch-up.
- We remain positive on equity markets from a medium to long term perspective.
- We see cyclical revival to provide multi-year earnings visibility and this coupled with a benign cost of capital environment, to support equity performance.

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say ₹ 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of Respective Scheme.

The returns are calculated by XIRR approach assuming investment of ₹ 10,000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with correct allowance for the time impact of the transactions.
