Portfolio sectoral positioning:

View	Sector			
Overweight	Consumer Discretionary	Financials	Healthcare	Real Estate
Neutral	Industrials	Materials	-	-
Underweight	Consumer Staples	Energy	IT	Communication Services & Utilities

Sector Attribution (1 Year)

- O/W in Financials, Industrial E/W in Healthcare and U/W in Communication Services has contributed positively to the performance.
- U/W in Utilities, Consumer Staples and E/W IT contributed negatively to the performance.

Fund philosophy

- HFEF has a flexibility to invest across the market capitalization spectrum and sectors.
- Prefer dominant and scalable businesses available at reasonable valuations.
- Profit pool consolidation with dominant players to continue and disruption to accelerate this shift.
- Stock selection focuses on earnings growth trajectory and within that the emphasis lies on earnings surprises.
- Valuations are as much a driver of stock selection as earnings growth.

Key portfolio themes

- Our portfolios are high conviction portfolios with a cyclical tilt to be well positioned for the earnings growth and macro recovery cycle holding a medium to long term view.
- Portfolio construction is through bottom-up stock selection and there is an emphasis on sustainable earnings growth, relative earnings and earnings surprises and valuations.
- However, in the macro set up of rising rates, depreciating currency and slowing growth, corporate earnings would likely see a downward revision after second quarter results. On the other hand, valuation is elevated both in absolute and relative basis. In light of the above we have tamed our pro-cyclical bias slightly and increased our exposure in the defensive sectors to de-risk our portfolio.
- Our positioning in the portfolio is:
 - Overweight to Domestic cyclical plays: Our highest active sector weight remains financials which would see credit cost normalization and earnings expansion, followed by Auto which is benefitting from cyclical recovery and real estate on improving residential affordability and industry consolidation;
 - Small overweight to Capex oriented plays: Cement, industrials, and building materials – The capex push reiterated in the recent budget is a key positive for the sector.
 - Equal weight to Global growth plays: We see Technology and Chemicals as structural plays – but have reduced position given near term growth concerns and valuations higher than historical averages.

Performance of the respective benchmark is calculated as per the Total Return Index (TRI)

*Additional benchmark as per SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021.

Pursuant to the circular issued by SEBI on 'Categorization and Rationalization of the Schemes', there has been change in the fundamental attribute(s) of the aforesaid scheme(s) effective from Mar 14, 2018.

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say ₹ 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of Respective Scheme. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with correct allowance for the time impact of the transactions.

SEBI vide its circular no. SEBI/HO/IMD/IMD-II DF3/P/CIR/2021/652 dated October 27, 2021, on 'Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes' has introduced two-tiered structure for benchmarking of certain categories of schemes.
