HSBC India Export Opportunities Fund

(An open ended equity scheme following export theme)

NFO Dates: 5 - 19 September 2024

An economy that exports more may have potential to grow bigger over long run. India's export expected to grow at about 15% CAGR vs nominal GDP growth of 10% over 2023 – 2030. India's target of \$2tn exports by 2030 appears reasonable considering the existing strong base of services export, coupled with government's focus now on driving merchandise exports. HSBC India Export Opportunities Fund aims to capture this growth of exports in India.

Why export theme in India now?
