Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors before investing. Scheme specific Risk Factors are summarized below:</p> <p>Scheme Specific Risk Factors</p> <ul style="list-style-type: none"> Investments in the Underlying scheme will have all the risks associated with investments in equity and the offshore markets. If underlying scheme declares any day as a non-business day, AMC will also declare that day as a non-business day. However, if this information is received by the AMC from underlying scheme later in the day and the Scheme has already accepted transactions, such transactions will be processed on the next business day. The portfolio disclosure of the Scheme will be largely limited to the investments made by the Scheme. The investor will be exposed to the risk of the global markets and currency risk arising out of the investment in the underlying scheme in securities which are denominated in foreign currencies (eg US Dollars). The investor will also be prone to delays in redemption if the global market is closed. The Underlying Scheme and by extension the HSBC Global Equity Climate Change Fund of Fund is intended for more experienced investors aiming for an investment where a high proportion of the assets may be invested in Emerging Markets and smaller capitalization securities, which may reduce liquidity and increase the volatility of return. The Underlying scheme and the HSBC Global Equity Climate Change Fund of Fund is suitable for investors looking for an investment to diversify an existing core portfolio. 																

Risk associated with investments in Foreign Securities:

- Investment in foreign securities could offer new investment and portfolio diversification opportunities into multi-market and multi currency products. However, such investments also entail additional risks including currency risks, market risks arising from political/economic changes/volatility in the markets the underlying scheme invests in, changes in tax laws in various jurisdictions, restriction on cross-border capital flows etc. Investors are advised to assess suitability of such overseas investment exposures to their overall portfolio before investing in this scheme.

To manage risks associated with foreign currency and interest rate exposure, the Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/RBI from time to time. Offshore investments will be made subject to any/all approvals, conditions thereof as may be stipulated by SEBI/RBI and provided such investments do not result in expenses to the Fund in excess of the ceiling on expenses prescribed by and consistent with costs and expenses attendant to international investing.

Risk associated with investment in Money Market Instruments:

- Investments in these instruments would involve a moderate credit risk i.e. risk of an issuer's liability to meet principal payments. These instruments may also be subject to price volatility due to changes in interest rates, general level of market liquidity and market perception of credit worthiness of issuer of such instruments.
- Legal, Tax and Regulatory Risk:** Changes in legal, tax & regulatory regime may adversely affect the Scheme or its investors, wherein such changes could also have retrospective effect leading to additional taxation imposed on the Scheme which was not contemplated either when investments were made, valued or disposed-off.

Risk Factors of Underlying scheme (HSBC Global Investment Funds - Global Equity Climate Change)

- Risk associated with Underlying scheme investing in Equities:** Investments in the Underlying scheme, which also consist of equity securities, will have all the risks associated with investments in equity and the offshore markets. Equity instruments carry both company specific and market risks and hence no assurance of returns can be made for these investments.
- Market Risk:** The Underlying scheme may invest in Emerging Markets. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, greater political, tax, economic, foreign exchange, liquidity, market volatility and regulatory risks.
- Currency Risk:** Investors will be exposed to currency risk as Indian investors will invest in INR in India and the Underlying scheme will invest in USD. The Underlying scheme in-turn may take exposure in multiple currencies (such as USD, HKD and EURO).
- Swing Pricing Risk:** On account of significant inflows into or outflows from the Underlying scheme and the resultant trading and associated transaction costs which might be detrimental to the existing investors, 'swing price' as a factor is introduced whereby the NAV of the Underlying scheme is swung/adjusted when a pre-determined net capital activity threshold.
- Liquidity Risk:** Investors should be aware that investments of Underlying scheme could be negatively impacted by low liquidity and poor transparency of some of the exchanges where the investments are made. Investments may also become illiquid which may constrain the ability of the investment manager of the Underlying scheme to realize some or all of the portfolio.
- Country Risk:** As the Underlying scheme could invest in stocks of different countries, the portfolio shall be exposed to the social, economic, political and settlement risks with respect to each country.
- Settlement Risks:** The Scheme will be exposed to settlement risk, as different foreign markets may have different settlement periods and the procedures may be different.
- Stock risk:** The Underlying scheme is exposed to equity markets for all or part of its total assets. The value of these assets can therefore rise or fall and investors may not get back all of their investment.
- Risks associated with Underlying scheme investing in Derivatives:** To the extent the underlying scheme is permitted to invest in derivative instruments the Scheme is exposed to the high risk, high return derivative instruments. Derivative products are specialised instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Please refer to the Scheme information Document of HSBC Global Equity Climate Change Fund of Fund for detailed risk factors.

Risk Mitigation Factors

Risks & Description	Risk Mitigants / Management Strategy
Risk Factors associated with Money Markets <ul style="list-style-type: none"> Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's liability to meet the principal payments. Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments. The NAV of the Scheme's Units, to the extent that the corpus of the Scheme is invested in money market instruments, will be affected by the changes in the level of interest rates. 	<ul style="list-style-type: none"> Market Risk : Investment approach supported by comprehensive research. Currency Risk : Investment Manager could use (there is no obligation) derivatives to hedge currency. Country Risk : Investment universe is carefully selected to include high quality businesses. Liquidity Risk : Robust process for periodic monitoring of liquidity. Legal/Tax/Regulatory Risk : This risk is dependent upon a future event and will be clearly communicated to the investor. Comprehensive documentation including disclosures and disclaimers. Emerging market Risks and Risks associated with foreign investments : The Fund will, where necessary, appoint intermediaries of repute as advisors, custodian/sub-custodians etc. for managing and administering foreign investments.

Monitoring Limits on Investments in Overseas Securities

During the NFO, the scheme intends to collect maximum amount equivalent to USD 300 million. The said limit shall be valid for a period of six months from the date of closure of NFO. Further, investments in overseas securities will follow the norms for ongoing schemes.

On an ongoing basis, the AMC is allowed to invest in overseas securities upto 20% of the average Asset Under Management ('AUM') in overseas securities of the previous three calendar months subject to maximum limit of USD 600 Million at Fund house level.

The limits available for investment in overseas securities for each month will be calculated as follows:

Particulars	(In USD Millions)
Maximum limit for investment in Overseas securities ... (A)	600
Limit utilized as on September 30, 2021 ... (B)	300
Balance Limit available (A-B) ... (C)	300
Average AUM in Overseas securities of the previous three calendar months (i.e. July-September 2021) ... (D)	300
20% of amount calculated in (D) ... (E)	60
Investment headroom available for the month of October 2021 Lower of (C) & (E)	60

Note: The above calculations are considering that the NFO of the Scheme will close on March 17, 2021. Till September 16, 2021, limit for the Scheme for investment in overseas securities is USD 300 Million.

The process for monitoring limit on investments in overseas securities on an ongoing basis is as follows:

- The limit on investment in overseas securities will be monitored & implemented at the Mutual Fund level and not at the individual scheme level.
- In case the subscriptions received on a day (including subscriptions from enrollment for systematic transactions) are more than the balance limit available, then Units will be allotted on a pro-rata basis for all the subscriptions received on that day.
- Once 20% limit i.e. investment headroom as calculated above is reached on a particular day in the month (e.g. October 2021), investors will be informed that further sales of Units (including processing of installments under systematic transactions viz. SIP, STP, etc.. already enrolled) will be suspended for the rest of the month (i.e. October 2021), a notice to that effect will be issued to ISCs and AMC branches and published on the website of the AMC (www.assetmanagement.hsbc.co.in)
- AUM in overseas securities of previous three calendar months will be continued for each month till the maximum limit of USD 600 million is reached at the Fund house level, unless approval from SEBI is obtained for increased limit.
- Once the maximum limit of USD 600 million for investment in overseas securities is reached at the Fund house level and no additional limits are granted by SEBI, investors will be informed that further sales of Units (including processing of installments under systematic transactions viz. SIP, STP, etc. already enrolled) will be suspended till the fresh limits are available. A notice to that effect will be issued to ISCs and AMC branches and published on the website of the AMC (www.assetmanagement.hsbc.co.in). After issuance of notice, any fresh application (including processing of installments under systematic transactions viz. SIP, STP, etc. already enrolled) for allotment of Units in the Scheme will be rejected and refunds will be processed within the regulatory timelines.
- The above process will not have any impact on redemption process

Example:

- Day T: Investment headroom available for investment in overseas securities is USD 20 million, incoming cash flows (including inflows from enrollment for systematic transactions) on Day T is USD 10 million, then Units will be allotted for the entire application amount.
- Day T: Investment headroom available for investment in overseas securities is USD 20 million, incoming cash flows (including inflows from enrollment for systematic transactions) on Day T is USD 25 million, Units will be allotted only for USD 20 million on a pro-rata basis.
- In case investment headroom is reached on Day T, then a notice will be sent to all ISCs & AMC branches and uploaded on the website of the AMC (www.assetmanagement.hsbc.co.in) on the same day intimating that further subscription in the Scheme (including processing of installments under systematic transactions viz. SIP, STP, etc. already enrolled) are suspended for the rest of the month with immediate effect till the fresh investment headroom is available for the next month.
- The above process will be continued till the maximum limit of USD 600 million is reached at the Fund house level.
- Once the maximum limit of USD 600 million for investment in overseas securities is reached at the Fund house level and no additional limits are granted by SEBI, further sales of Units (including processing of installments under systematic transactions viz. SIP, STP etc. already enrolled) will be suspended. A notice to that effect will be issued to ISCs and AMC branches and published on the website of the AMC (www.assetmanagement.hsbc.co.in).
