HISTORY REPEATS ITSELF!

It's a common understanding that when GDP per capita rises in a nation it experiences a boost in demand but how much? Let's take a look at a prominent past example of China

China GDP Per Capita (US \$) \$14,000 \$12,556 \$12,000 \$10,000 \$8.000 \$6,000 \$4,000 \$2,099 \$2,000 \$0 2009 2010 2011 2012 2013 2014 2015 2016 2018 2018

After crossing the \$2000 mark of per capita GDP, a country experiences rise in discretionary spending due to higher disposable income in the hands of the population. This results in growth of sectors like

Retail

Consumer Goods

Tourism and Hospitality

Media & entertainment

Healthcare

Auto and auto component

For example, From CY06 to CY16, China's Car sales grew

CY06 **5.18 million**

CY16 **24.38 million**

India crossed \$2000 per capita GDP milestone in 2019.

repeat itself? Will India follow China's fate in terms of the consumer spending? With various structural drivers turning favourable, India's

Consumption sector is expected to grow at a faster pace.

benefits of demographic dividend. The most populous country, India expected to add 22% of the world's working-age

population by 2031. This may elevate disposable income in the hands of the working population and increase discretionary spend.

class with 58 million new households (HH) likely to enter Aspirers category while 43 million HH to enter Affluent category by the end of this decade

availability and payment options like BNPL (Buy Now Pay Later), P2P lending would fuel the pace of consumerism.

and growing rural income will likely accelerate the consumption boom in a structural way.

will result in higher lifestyle spend and Premiumization.

With higher Ability, Affordability, Awareness, Availability, and Accessibility, India is well-placed to repeat the history and replicate China's consumption story in the next few decades.

So, want to benefit from India's consumption boom? Invest in mutual funds that predominantly invest in the consumption theme. Disclaimer:
