A. RISK FACTORS

Standard Risk Factors:

- Mutual funds and securities investments are subject to market risks and there is no assurance or guarantee that the objectives of the Scheme will be achieved.
- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal
- As the price/value/interest rates of the securities in which the Scheme invests fluctuates, the value of your investment in the Schemes may go up or down depending on the various factors and forces affecting the capital markets and money markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Schemes.
- HSBC Managed Solutions is the name of the Scheme and do not in any manner indicate either the quality of the Scheme or their future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1,00,000/- (Rupees One Lakh only) made by it towards setting up the Fund. The associates of the Sponsor are not responsible or liable for any loss or shortfall resulting from the operation of the Scheme.
- The present Scheme is not a guaranteed or assured return Scheme.
- Mutual funds being vehicles of securities investments are subject to market and other risks and there can be no guarantee against loss resulting from investing in the Scheme. The various factors which impact the value of the Schemes' investments include, but are not limited to, fluctuations in the bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc.
- Investment decisions made by the AMC shall be in the best interest of investors but may not always be profitable.

Scheme Specific Risk Factors

Risk factors associated with investing in Equity or Equity related Securities :

- Investments in the Underlying scheme, which also consist of equity funds, will have all the risks associated with investments in equity and the offshore markets.
- The portfolio disclosure of the Scheme will be largely limited to the investments made by the Scheme.
- The investor will be exposed to the risk of the global markets and currency risk arising out of the investment in the Underlying scheme in securities which are denominated in foreign currencies (eg US Dollars). The investor will also be prone to delays in redemption if the global market is closed.
- This being a fund of funds Scheme, the investors should note that the expenses to be borne by the investor include the recurring expenses of the Underlying scheme in which Fund of Funds Scheme makes investments subject to the maximum limits prescribed under sub-regulation 6 & 6A of Regulation 52 of the SEBI Regulations.
- If the Underlying scheme declares a non-business day, the AMC will also declare it a non-business day. If this information is received later in the day and the local feeder fund has already accepted transaction, such transactions will be processed at the NAV of the next business day. This may impact liquidity of investors of local scheme.
- **Liquidity risk of underlying instruments:** There could be liquidity risk on account of illiquid underlying holdings

- To maintain liquidity at the feeder fund level, the AMC will invest upto 5% in Money Market instruments (including TREPS & reverse repo in government securities) and units of domestic mutual funds to provide from a liquidity perspective.
- **Restructuring/Rescheduling Risk:** There could be cases of restructuring/re-scheduling of particular debt /money market instruments held in the portfolio which could result in the maturity of these instruments going beyond the original maturity date of the instrument. In such cases the fund manager may be constrained to sell these instruments in the market at realizable value and pass on the loss/impact to investors under the Scheme.
- **Operational Risk** - Given that the FOF structure will involve splitting each subscription and redemption at FOF level into multiple subscription and redemptions into the respective funds; there is enhanced operational risk.
- The Plans under the Scheme will invest in a combination of equity funds, debt fund, gold ETFs and other ETFs, offshore mutual fund schemes and money market instruments hence, the performance of the Plans would depend upon the performance of Underlying schemes.
- The investor will be exposed to the risk of the global markets and currency risk arising out of the investment in the Underlying scheme which invests in securities denominated in foreign currencies (eg US Dollars). The investor will also be exposed to delays in redemption if the global market is closed.
- Investments in Underlying Debt schemes will have all the risks associated with the debt markets including interest rate risk, duration risk, credit risk and reinvestment risk.
- **Risk associated with investing in foreign securities, derivatives, unrated, securitized debt, short selling and securities lending** - The Scheme will not have any exposure to derivative instruments, securitized debt or unrated instruments and shall not undertake any short selling or securities lending. However, the Underlying schemes may take exposure to the above mentioned securities. The offshore Underlying schemes of HSBC shall not take any exposure to unrated securities, their investments in derivatives shall be for the purposes of hedging and portfolio rebalancing only and investments in unlisted securities shall be limited to 10% of its net assets. The domestic Underlying schemes of HSBC and other than HSBC shall take exposure to the above mentioned securities as per the limits provided (if any) in the Scheme Information Document of the respective Underlying schemes and applicable SEBI Regulations from time to time. For risk associated with the same refer risk factors provided below for Underlying scheme.
- **Risk factors associated with investing in Gold Exchange Traded Funds –**
 - Risk of passive investment: The Underlying scheme may be affected by a general price decline in the gold prices. The Scheme ultimately invests in gold as an asset class regardless of such investment merit. The AMC does not attempt to take defensive positions in declining markets.
 - Tracking error risk: The performance of the Underlying scheme may not be commensurate with the performance of the benchmark on any given day or over any given period. Such variation, referred to as tracking error may impact the performance of the Scheme.
 - Trading in units on the exchange may be halted because of market conditions or for reasons that in view of exchange authorities or SEBI, trading in units of the Scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of exchange necessary to maintain the listing of the units will continue to be met or will remain unchanged.

- The units may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of holdings. The trading prices will fluctuate in accordance with changes in their NAV as well as market supply and demand. However, given that units can be created and redeemed in Creation Units, it is expected that large discounts or premiums to the NAV will not sustain due to arbitrage opportunity available.
- Gold Exchange Traded Fund is relatively new product and their value could decrease if unanticipated operational or trading problems arise.
- An investment in the Scheme may be adversely affected by competition from other methods of investing in gold.
- The Trustee, in the general interest of the unit holders of the Scheme offered under this SID and keeping in view of the unforeseen circumstances /unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day.
- Any change in the rates of taxation would affect the investor
- Returns from Gold as an asset class may under perform returns from general securities market or different asset classes other than gold. Different types of securities tend to go through cycles of under performance and out performance in comparison to the general securities markets.

Risk associated with short selling and securities lending by Underlying schemes

Short Selling Risk: The risk associated with upward movement in market price of security sold short may result in loss. The losses on short position may be unlimited as there is no upper limit on rise in price of a security.

Securities Lending: The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme(s) and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

Risk Factors associated with investments in Money Market instruments

- Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's liability to meet the principal payments.
- Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments.
- The NAV of the Scheme's Units, to the extent that the corpus of the Scheme is invested in money market instruments, will be affected by the changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline.

Risk factor associated with Legal, Tax and Regulatory Risk

The Scheme could be exposed to changes in legal, tax and regulatory regime which may adversely affect it and/or the investors. Such changes could also have retrospective effect and could lead to additional taxation imposed on the Scheme which was not contemplated either when investments were made, valued or disposed off.

Risk Factors of Underlying scheme of HSBC Managed Solutions

The Underlying schemes having exposure to equity and equity related securities and/or fixed income securities will be subject to the following risks which may in turn affect the performance of the Plans under the Scheme. There can be no assurance that the Underlying scheme will achieve its investment objectives and past performance should not be seen as a guide to future returns.

Risk associated with investments in Equity & Equity related securities by the Underlying schemes of HSBC Managed Solutions

- Equity instruments by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme(s) to make intended securities' purchases due to settlement problems could cause the Scheme(s) to miss certain investment opportunities. In the view of the Fund Manager, investing in mid and small cap stocks are riskier than investing in large cap Stocks.
- *Market Risk:* The Underlying scheme's investments are subject to the risks inherent in all investments in Securities i.e. the value of holdings may fall as well as rise. As the Underlying scheme invests primarily in equities, investors are exposed to stock market fluctuations and the financial performance of the companies held in the Underlying scheme's portfolio.
- *Currency Risk:* As the Underlying scheme could invest in securities which are denominated in foreign currencies (e.g. US Dollars), fluctuations in the exchange rates of these foreign currencies may have an impact on the income and value of the Scheme. The assets in which the Underlying scheme is invested and the income from the assets will or may be quoted in currencies which are different from the Underlying scheme's base currency. The performance of the Underlying scheme will therefore be affected by movements in the exchange rate between the currencies in which the assets are held and the Underlying scheme's base currency and hence there can be the prospect of additional loss or the prospect of additional gain to the investors greater than the usual risks of investment. The performance of the Underlying scheme may also be affected by changes in exchange control regulations.

The investment manager to the Underlying scheme is permitted, but not obliged, to use hedging techniques to attempt to offset market and currency risks. There is no guarantee that hedging techniques will achieve the desired result.

- *Credit Risk:* As the feeder fund will invest in money market instruments, the credit risk is minimal. The investment in money market instruments are only from a cash management perspective.
- *Swing Pricing Risk:* As the Underlying schemes could invest in offshore securities, there could be an element of swing pricing risk. There are trading and associated transaction costs involved when there are significant inflows into or significant outflows from the Underlying scheme. The dealing charges incurred as a result of such significant flows fall not only on those investors who have just transacted but on all the investors in the Underlying scheme thereby diluting the value of their existing shareholders' holding. Introduction of Swing Pricing aims to protect the interest of the existing investors from some of the performance dilution that they may suffer as a result of significant inflows and outflows from the Underlying scheme. It is a process whereby the NAV of the Underlying scheme is swung or adjusted when a predetermined net capital activity threshold (or swing threshold) is exceeded. Thus, if Net subscriptions (Total subscriptions – Total

redemptions) are above the swing threshold, the NAV per share is swung up by the swing factor. Conversely, if Net redemptions (Total redemptions – Total subscriptions) are above the swing threshold, the NAV per share is swung down by the swing factor. The swing threshold has been set at a level by the Underlying scheme which it believes best manages the objective of protecting their existing shareholders from NAV dilution by capturing a significant percentage of the gross amount of deals on any fund whilst maintaining a reasonable level of fund volatility by not swinging the NAV all the time.

Adjusted NAV Calculation: Subscription Example -

- Using the following swing pricing criteria:
 - The swinging threshold is 0.5% of the underlying scheme's Net Assets
 - The swing factor on the offer (net subscriptions above the threshold) is 1.0%
 - The swing factor on the bid (net redemptions below the threshold) is 0.5%
- Assume the following fund data :

Total net assets (US\$)	Net subscriptions (US\$)	No. of shares
US\$ 100,000,000	US\$ 600,000	1,000,000

- Net subscriptions = US\$600,000
- The swinging threshold = Total Net Assets x 0.5% = US\$100,000,000 x 0.5% = **US\$500,000**
- As the net inflows exceed the swinging threshold, the NAV per share has to be adjusted
- Unadjusted NAV per share = Total Net Assets / No. of shares = US\$100,000,000 / 1,000,000 = **US\$100.00**
- Adjusted NAV per share = NAV per share x (1 + swing factor) = US\$100.00 x (1 + 0.01) = **US\$101.00**
- The NAV is adjusted upwards as net subscriptions have exceeded the swinging threshold.
- Therefore, all investors (including the local Scheme) redeeming or subscribing into the underlying scheme will deal at the adjusted price of US\$101.00 per share. Thus, investors of the underlying scheme (including the local scheme) may be positively or negatively impacted by application of the swing price factor by the underlying scheme, depending upon whether they are subscribing / redeeming on the date of application of swing price factor.
- Liquidity Risk:** Investors should be aware that the investments of the Underlying scheme could be negatively impacted by low liquidity and poor transparency of some of the exchanges where the investments are made. Investments may also become illiquid which may constrain the ability of the investment manager of the Underlying scheme to realize some or all of the portfolio. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges.
- Country Risk:** As the underlying portfolio could invest in stocks of different countries, the portfolio shall be exposed to the social, economic, political and settlement risks with respect to each country.
- Sector Concentration Risk:** The underlying portfolio may have high concentration in a particular sector. The performance of the Scheme could be sensitive to movements in these sectors.
- Emerging Market Risk:** As the Underlying Scheme could invest in emerging markets, investors are advised to consider carefully the special risks of investing in equity and equity equivalent securities of companies which have their registered office in, and with an official listing on a major stock exchange or other regulated market of emerging market countries, as well as those companies which carry out a preponderant part of their business activities

in emerging market countries. Economies in Emerging Markets generally are heavily dependent upon international trade and, accordingly, have been and may continue to be affected adversely by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade. These economies also have been and may continue to be affected adversely by economic conditions in the countries in which they trade. Brokerage commissions, custodial services and other costs relating to investment in Emerging Markets generally are more expensive than those relating to investment in more developed markets. The risk also exists that an emergency situation may as a result of which trading of securities may cease or may be substantially curtailed and prices for a sub-fund's securities in such markets may not be readily available.

- Legal, tax and regulatory Risk:** The Underlying scheme could be exposed to changes in legal, tax and regulatory regime which may adversely affect it and the investors. Such changes could also have retrospective effect and could lead to additional taxation imposed on the Scheme which was not contemplated either when investments were made, valued or disposed off.
- NAV Alignment Risk:** The cut off timing of NAV is aligned to the Underlying scheme's NAV. HSBC Asset Management India only declares NAV, after receiving the NAV of the Underlying scheme.
- Risk associated with Underlying scheme investing more than 15% in Indian Securities:** In case the India exposure of the Underlying scheme goes beyond 15% for more than 3 months then fresh subscription into the Scheme will not be accepted. If the India exposure continues to be above 15% for more than 12 months then the Scheme will be wound up after duly informing the Unit holders and providing them with a 30 day period to exit the Scheme at prevailing NAV without any exit load.

Investments in Debt Instruments by the Underlying schemes of HSBC Managed Solutions

The Underlying scheme(s) proposes to invest in debt and related instruments and the risk factors pertinent to the same are:

- Price-Risk or Interest Rate Risk:** As with all debt securities, changes in interest rates may affect the NAV of the Scheme(s) as the prices of securities increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.
- In the case of floating rate instruments, an additional risk could be due to the change in the spreads of floating rate instruments. If the spreads on floating rate papers rise, then there could be a price loss on these instruments. Secondly in the case of fixed rate instruments that have been swapped for floating rates, any adverse movement in the fixed rate yields vis-à-vis swap rates could result in losses. However, floating rate debt instruments which have periodical interest rate reset, carry a lower interest rate risk as compared to fixed rate debt instruments. In a falling interest rate scenario the returns on floating rate debt instruments may not be better than those on fixed rate debt instruments.
- Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.
- Credit Risk:** Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e. will be unable to make timely principal and interest payments on the security). Because of this risk, corporate debentures are sold at a yield above those offered on Government Securities, which are sovereign obligations. Normally, the value of a fixed income security will

fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

- **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme(s) are reinvested. The additional income from reinvestment is the “interest on interest” component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

However declining interest rates normally lead to increase in bond prices which may help cushion the impact of reinvestment risk to some extent.

- **Duration Risk:** Duration is a risk measure used to measure the bond/security price changes to potential changes in interest rates. Duration of portfolio x the expected changes in rates = the expected value change in the portfolio. Duration is more scientific measure of risk compared to average maturity of the portfolio. The higher the duration of the portfolio, the greater the changes in value (i.e. higher risk) to movement in interest rates. Modified duration is the duration of a bond/security given its current yield to maturity, put/call feature, and an expected level of future interest rates.
- Different types of securities in which the Scheme(s) would invest as given in the their respective SIDs/ Combined SID carry different levels and types of risk. Accordingly the Scheme’s risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government Securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
- **Prepayment Risk:** The risk associated with the early unscheduled return of principal on a fixed-income security. The early unscheduled return of principal may result in reinvestment risk.
- **Risk of investments in unrated instruments:** Investments in the unrated instruments shall be subject liquidity risk, credit risk, market risk, interest rate risk, reinvestment risk etc. Also, as the unrated instruments are not being rated by the Credit Rating Agencies, there is no external credit risk assessment available for such instruments, hence, the investor will be exposed to risk associated with investments in un-rated instruments.

Risks associated with investment in third party Schemes

AMIN would have no control over investments done by the underlying third party schemes. AMIN shall not be able to monitor liquidity, credit, concentration and other investment risks like it does for in house schemes. The fund manager shall take these metrics into account while taking exposure to third party schemes.

Risks associated with investing in Foreign Securities

- **Foreign Securities:** It is the AMC’s belief that investment in foreign securities offers new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the Scheme. Since the Scheme would invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme. To manage risks associated with foreign currency and interest rate exposure, the Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/RBI from time to time.
- Offshore investments will be made subject to any/all approvals, conditions thereof as may be stipulated by SEBI/RBI and provided such investments do not result in expenses to the Fund in excess of the ceiling on expenses prescribed by and consistent

with costs and expenses attendant to international investing. The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceiling of expenses. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs and overseas regulatory costs.

- To the extent that the assets of the Scheme will be invested in foreign securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.
- Changes to the investment objectives or strategies of the Underlying scheme into which the Scheme invest or any change in the regulations in the country where such Underlying scheme is domiciled may affect the performance of the Scheme which invest into such schemes.

Risks associated with investing in Derivatives by Underlying Scheme

- The Fund may use derivative instruments like stock index futures, option on stocks, stock indices, interest rate swaps, forward rate agreements or other derivative instruments as permitted under the Regulations and guidelines.
- As and when the Underlying scheme(s) trade in the derivatives market, there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialised instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counter party”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Also, the market for derivative instruments is nascent in India.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be perused by the fund manager involve uncertainty and decision of fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risks associated with investing in securitised debt by Underlying Scheme

Securitised Debt: Securitised debt papers carry credit risk of the Obligors and are dependent on the servicing of the PTC/Contributions etc. However these are offset suitably by appropriate pool selection

as well as credit enhancements specified by Rating Agencies. In cases where the underlying facilities are linked to benchmark rates, the securitised debt papers may be adversely impacted by adverse movements in benchmark rates. However this risk is mitigated to an extent by appropriate credit enhancement specified by rating agencies. Securitised debt papers also carry the risks of prepayment by the obligors. In case of prepayments of securities debt papers, it may result in reduced actual duration as compared to the expected duration of the paper at the time of purchase, which may adversely impact the portfolio yield. These papers also carry risk associated with the collection agent who is responsible for collection of receivables and depositing them. The Investment team evaluates the risks associated with such investments before making an investment decision.

The underlying assets in the case of investment in securitised debt could be mortgages or other assets like credit card receivables, automobile/vehicle/personal/commercial/corporate loans and any other receivables/loans/debt.

The risks associated with the underlying assets can be described as under:

Credit card receivables are unsecured. Automobile/vehicle loan receivables are usually secured by the underlying automobile/vehicle and sometimes by a guarantor. Mortgages are secured by the underlying property. Personal loans are usually unsecured. Corporate loans could be unsecured or secured by a charge on fixed assets/receivables of the company or a letter of comfort from the parent company or a guarantee from a bank/financial institution. As a rule of thumb, underlying assets which are secured by a physical asset/guarantor are perceived to be less risky than those which are unsecured. By virtue of this, the risk and therefore the yield in descending order of magnitude would be credit card receivables, personal loans, vehicle/automobile loans, mortgages and corporate loans assuming the same rating.

Risks associated with transaction in Units through Stock Exchange mechanism

- In respect of transactions in Units of the Scheme routed through the BSE StAR MF platform or any other recognised stock exchange platform as intimated by the AMC, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE, or such other exchange and their respective clearing corporations on which the Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by BSE or such other recognised exchange in this regard.

Risk Mitigation Factors

- *Market risk:* Investment approach supported by comprehensive research.
- *Currency risk:* Investment Manager of Underlying scheme could use (there is no obligation) derivatives to hedge currency.
- *Country risk:* Investment universe is carefully selected to include high quality businesses.
- *Swing Pricing risk:* The NAV of the Underlying scheme is adjusted to protect the interest of existing investors so that large inflows and outflows from new investors don't impact existing investors of the Underlying scheme.
- *Liquidity risk:* Robust process for periodic monitoring of liquidity.
- *Legal/Tax/Regulatory risk:* This risk is dependent upon a future event and will be clearly communicated to the investor.
- *Emerging market risks and risks associated with foreign investments:* The Fund will, where necessary, appoint intermediaries of repute as advisors, custodian/sub-custodians etc. for managing and administering foreign investments.
- *Sector Concentration Risk:* Investment across market capitalization spectrum and industries/sectors.

Risk associated with Underlying scheme investing more than 15% in Indian Securities:

In case the India exposure of the offshore Underlying scheme goes beyond 15% for more than 3 months then fresh subscription into the Scheme will not be accepted. If the India exposure continues to be above 15% for more than 12 months then the Scheme will be wound up after duly informing the Unit holders and providing them with a 30 day period to exit the Scheme at prevailing NAV without any exit load.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEMES/PLANS OF MUTUAL FUNDS

The Scheme/Plan (s) shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme/Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme/Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS

- From time to time and subject to the Regulations, the Sponsor, their associates, subsidiaries, the Mutual Fund and the AMC may invest directly or indirectly in the Scheme. These entities may acquire a substantial portion of scheme's units and collectively constitute a major investor in the Scheme. Accordingly, redemption of Units held by such entities may have an adverse impact on the Scheme because the timing of such redemption may impact the ability of other Unitholders to redeem their Units.
- As the liquidity of the Scheme investments could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or of a restructuring of the Scheme' portfolio. In view of this, the Trustees have the right, in their sole discretion to limit redemptions (including suspending redemption) under certain circumstances, as described under the section titled "Right to Limit Redemptions".
- Redemptions due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, the Mutual Fund, the AMC, their directors or their employees shall not be liable for any tax consequences that may arise.
- The Scheme at times may receive large number of redemption requests which may have an adverse impact on the performance of the Scheme and may also affect all the unit holders as the fund manager needs to liquidate securities to meet the redemptions post which the portfolio is likely to be less liquid.
- The tax benefits described in this SID are as available under the present taxation laws and are available subject to conditions. The information given is included for general purpose only and

is based on advice received by the AMC regarding the law and practice in force in India and the investors should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each investor is advised to consult his/her own professional tax advisor.

- Neither this SID nor the Units of the Scheme have been registered in any jurisdiction. The distribution of this SID in certain jurisdictions may be restricted or totally prohibited and accordingly, persons who come into possession of this SID are required to inform themselves about, and to observe, any such restrictions.
- Prospective investors should review/study this SID carefully and in its entirety and shall not construe the contents hereof or regard the summaries contained herein as advice relating to legal, taxation, or financial/investment matters and are advised to consult their own professional advisor(s) as to the legal, tax, financial or any other requirements or restrictions relating to the subscription, gifting, acquisition, holding, disposal (sale, switch or redemption or conversion into money) of Units and to the treatment of income (if any), capitalisation, capital gains, any distribution, and other tax consequences relevant to their subscription, acquisition, holding, capitalisation, disposal (sale, transfer, switch or conversion into money) of Units within their jurisdiction of nationality, residence, incorporation, domicile etc. or under the laws of any jurisdiction to which they or any managed funds to be used to purchase/gift Units are subject, and also to determine possible legal, tax, financial or other consequences of subscribing/gifting, purchasing or holding Units before making an application for Units.
- The Mutual Fund/the AMC have not authorised any person to give any information or make any representations, either oral or written, not stated in this SID in connection with issue of Units under the Scheme. Prospective investors are advised not to rely upon any information or representations not incorporated in this SID as the same have not been authorised by the Fund or the AMC. Any subscription, purchase or sale made by any person on the basis of statements or representations which are not contained in this SID or which are inconsistent with the information contained herein shall be solely at the risk of the investor.
- To the best of the knowledge and belief of the Trustees and the AMC, information contained in this SID is in accordance with the SEBI regulations and the facts stated herein are correct and this SID does not omit anything likely to have an impact on the importance of such information.
- The AMC is also registered as a Portfolio Manager under the SEBI (Portfolio Managers) Regulations, 1993 vide registration no. INP000001322 and is deemed to be registered as such under SEBI (Portfolio Managers) Regulations, 2020. The AMC has proper systems and controls in place to ensure that there is no conflict of interest between the activity of managing the schemes of the Mutual Fund and the activity of Portfolio Management Services and there exist systems to prohibit access to insider information.

Further, an asset management company, subject to certain conditions, may also be permitted to undertake activities in the nature of management and advisory services to pooled assets including offshore funds, insurance funds, pension funds, provident funds or such categories of foreign portfolio investor subject to such conditions as may be specified by SEBI from time to time, if any of such activities are not in conflict with the activities of the mutual fund. Accordingly, the AMC is also providing non-binding advisory services to HSBC Group's offshore funds, which are appropriately regulated foreign portfolio investors investing in India, through the fund managers managing the schemes of the Fund, as permitted under Regulation 24(b) of the Regulations. SEBI vide its email dated November 26, 2020, accorded its no objection to the AMC for

providing such non-binding investment advisory services to HSBC Group's offshore funds, which are appropriately regulated foreign portfolio investors, by the fund managers of the schemes of the Fund. The AMC has proper systems and controls in place to ensure that (a) there is no conflict of interest between the activities of managing the schemes of the Fund and other activities of the AMC; and (b) interest of the unit holders of the schemes of the Fund are protected at all times. In case of an unavoidable conflict of interest situation, the AMC shall make appropriate disclosures in an appropriate manner, which shall include the source of conflict, potential 'material risk or damage' to the Fund's investors' interests and detailed parameters for the same.

Compliance under FATCA

India has executed an Inter-Governmental Agreement (IGA) with the U.S. and the Fund intends to take any measures that may be required to ensure compliance under the terms of the IGA and local implementing regulations. In order to comply with its FATCA obligations, the Fund will be required to obtain certain information from its investors so as to ascertain their U.S. tax status. If the investor is a specified U.S. person, U.S. owned non-U.S. entity, non-participating FFI ("NPFFI") or does not provide the requisite documentation, the Fund may need to report information on these investors to the appropriate tax authority, as far as legally permitted. If an investor or an intermediary through which it holds its interest in the Fund either fails to provide the Fund its agents or authorised representatives with any correct, complete and accurate information that may be required for the Fund to comply with FATCA or is a NPFFI, Fund may be required to provide information about payment to NPFFI to upstream payor to enable them to make the appropriate FATCA withholding on NPFFIs. Further, we may be compelled to sell its interest in the Fund or, in certain situations, the investor's interest in the Fund may be sold involuntarily. The Fund may at its discretion enter into any supplemental agreement without the consent of investors to provide for any measures that the Fund deems appropriate or necessary to comply with FATCA, subject to this being legally permitted under the IGA or the Indian laws and regulations. FATCA is globally applicable from July 1, 2014 and in order to comply with FATCA obligations, the Fund will, seek additional information from investors while accepting applications, in order to ascertain their U.S. Person status. The Fund will not accept applications which are not accompanied with information/documentation required to establish the U.S. Person status of investors. Investors are therefore requested to ensure that the details provided under Section "Confirmation under Foreign Account Tax Compliance Act (FATCA) for determining US person status" of the application form are complete and accurate to avoid rejection of the application (updated forms are available with ISCs or on Fund's website – www.assetmanagement.hsbc.co.in).

Investors should consult their own tax advisors regarding the FATCA requirements with respect to their own situation. These Terms and Conditions shall continue to apply notwithstanding the death, bankruptcy or incapacity of the investor, the closure of any investor account, the termination of HSBC's provision of the Services to the investor or the redemption of the investor's investment in the Fund.

Common Reporting Standards

India has joined the Multilateral Competent Authority Agreement (MCAA) on automatic exchange of financial information in Tax Matters, commonly known as Common Reporting Standards ('CRS'). All countries which are signatories to the MCAA are obliged to exchange a wide range of financial information after collecting the

same from financial institutions in their jurisdiction.

In accordance with Income Tax Act read with SEBI Circular nos. CIR/MIRSD/2/2015 dated August 26, 2015 and CIR/MIRSD/3/2015 dated September 10, 2015 regarding implementation of CRS requirements, it shall be mandatory for all new investors to provide details and declaration pertaining to CRS in the application form, failing which the AMC shall have authority to reject the application.

Compliance with Volcker Rule

The Volcker Rule is a part of the U.S. Dodd Frank Act which prohibits U.S. banks from proprietary trading and restricts investment in hedge funds and private equity by commercial banks and their affiliates. HSBC Holdings plc, is a U.S. regulated bank holding company and any entity (company, fund, trust, partnership etc.) located anywhere in the world, that is directly or indirectly controlled by the parent company is subject to the Volcker Rule. The Volcker Rule is effective from July 21, 2015. As part of HSBC's Volcker Conformance obligations, the Fund is required to implement a Compliance Programme to ensure on-going compliance with the Volcker Rule and the AMC must ensure that no HSBC affiliate (fund or business entity) invests in the Fund unless it has implemented necessary controls to ensure that the ownership limits, in line with the Volcker Rule, can

be met. Hence, the Scheme may not be able to accept subscriptions from HSBC group entities into the Scheme, aggregating to more than 25% of the voting rights of the Scheme. In the event of the aggregate investment by HSBC group entities crossing the above limits, the AMC will have the discretion to reject any subscription/switch applications received or redeem any excess exposure by the group entities in the Scheme, to be in compliance with the Volcker Rule.

Position of Debt Markets in India

The major players in the Indian debt markets today are banks, financial institutions, insurance companies and mutual funds. The instruments in the market can be broadly categorised as those issued by corporates, banks, financial institutions and those issued by state/central governments. The risks associated with any investment are - credit risk, interest rate risk and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities are perceived to have zero credit risk. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The liquidity risk in the corporate securities market is higher as compared to that in case of government securities. Liquidity in the corporate debt market has been improving due to the entry of more players and due to various measures taken by the regulators in this direction over a period of time. SEBI's directive of a compulsory rating by a rating agency for any public issuance over 18 months, dematerialisation, entry of private insurance companies, listing of debt securities and growth of fixed income mutual funds have enhanced liquidity in the corporate debt market. The setting up of clearing corporations, real time gross settlement and electronic clearing system for government securities have considerably enhanced the depth and width of the Indian debt markets and bringing it at par

with developed markets.

The following table attempts to give a broad overview of the available instruments in the financial markets and their risk - return profile. The data is based on the market conditions as on the date of the Offer Document and may vary substantially depending upon the factors and forces affecting the securities market including the fluctuations in the interest rates.

E. INVESTMENT STRATEGY

Investment Approach and Risk Control

The Plans under the Scheme will invest predominantly in the existing and/or prospective schemes of HSBC Mutual Fund, units of third party domestic mutual funds, units of offshore equity oriented funds managed by HSBC Global Asset Management, gold ETFs and other ETFs of third parties until such time that the Fund doesn't have such scheme offerings. The Plans may also invest certain proportion of its corpus in money market instruments in order to meet liquidity requirements from time to time.

For asset classes where HSBC Mutual Fund has scheme offerings, the Plans under the Scheme would invest only in such schemes. Investments into units of third party domestic mutual funds shall be made in the following circumstances:

- Non-availability of a scheme managed by HSBC in a certain categories (i.e. currently gold ETFs and other ETFs); or
- If the investment by the Plan under the Scheme exceeds 20% of the net assets of the Underlying scheme(s). In such a scenario, the third party domestic mutual fund will be similar to the Underlying schemes of HSBC Mutual Fund in terms of its objective, asset allocation pattern and risk profile.

While investing in such third party domestic mutual fund schemes or prospective schemes of HSBC Mutual Fund, it shall be ensured that the investment objective, asset allocation pattern and risk profile of

such schemes are in line with the respective Plans under the Scheme.

All new inflows will be invested as per the asset allocation pattern indicated in this SID. The asset allocation pattern is proposed to be rebalanced on a monthly basis at the minimum to bring the allocation in line with the suggested pattern, if so required.

It is the intention of the Fund Manager to stay fully invested in the underlying mutual fund schemes. The Scheme may invest in such open ended schemes offered by the Mutual Fund from time to time subject to the above asset allocation of the Plans under the Scheme. However, the Fund Manager reserves the right to maintain adequate cash balance to meet the requirements of redemptions.

The asset allocation of the Underlying schemes that the fund intends to invest into will be maintained as per the Scheme Information Document of the respective schemes. It shall always be ensured that the actual allocation of all the Funds is within the asset allocation range as disclosed in the asset allocation pattern above. The investment by each Plan under the Scheme into the Underlying scheme(s) will not exceed 20% of the net assets of the Underlying scheme(s).

The Concept of Asset Allocation

Asset allocation strategy is based on the concept of risk diversification. Investments in financial instruments are recommended based on the risk appetite of the investor. Through asset allocation, investors can decide on the best mix of debt, equity, gold ETFs and other ETFs, offshore mutual fund units and money market instruments, which is commensurate with their risk profile. The advantages of asset allocation strategy include:

- Diversification across asset classes and across schemes within an asset class.
- Fulfillment based on risk profiles.
- Ability to maintain the asset allocation by continuous rebalancing.
- Asset allocation reacts differently to the market conditions, a loss in one asset class could be made up by the gain in the other.

Procedure followed for Investment Decisions

All investment decisions, relating to the Scheme, will be undertaken by the AMC in accordance with the Regulations and the investment objectives specified in this SID. All investment decisions taken by the AMC in relation to the Scheme shall be recorded.

The Board of the AMC has constituted an Investment Management Committee that meets at periodic intervals. The Investment Management Committee, at its meetings, reviews all investments. The Committee also reviews the performance of the Scheme and general market outlook and formulates the broad investment strategy at their meetings.

It is the responsibility of the AMC to ensure that the investments are made as per the internal/Regulatory guidelines, investment objectives and in the best interest of the Unit holders of the Plans under the Scheme. The Fund may follow internal guidelines as approved by the Board of the AMC and the Trustees from time to time. Internal guidelines shall be subject to change and may be amended from time to time in the best interest of the Unit holders. The amendments will be approved by the Board of the AMC and the Trustees of the Mutual Fund.

The Chief Investment Officer and Fund Managers shall present to the Board of the AMC and the Trustees periodically review the performance of the Plans under the Scheme. The performance of the Plans under the Scheme will be reviewed by the Boards with reference to the appropriate benchmarks.

The performance of following Plans under the Scheme will be benchmarked as under:

Plan(s)	Tier 1 Benchmark Index
Managed Solutions India – Growth	Composite Index constituting 80% of S&P BSE 200 TRI and 20% of CRISIL Composite Bond Index

Plan(s)	Tier 1 Benchmark Index
Managed Solutions India – Moderate	CRISIL Hybrid 35+65 - Aggressive Index
Managed Solutions India – Conservative	Composite Index constituting of 90% into CRISIL Composite Bond Index and 10% of S&P BSE 200 TRI

However, the Plans' performance may not be strictly comparable with the performance of the benchmark due to the inherent differences in the construction of the portfolios. The Boards may review the benchmark selection process from time to time, and make suitable changes as to use of the benchmark, or related to composition of the benchmark, whenever it deems necessary.

The Chief Investment Officer and Fund Manager will bring to the notice of the AMC Board, specific factors if any, which are impacting

the performance of the Plans under the Scheme. The Board on consideration of all relevant factors may, if necessary, give appropriate directions to the AMC. Similarly, the performance of each Plan under the Scheme will be submitted to the Trustees. The details on the Schemes' performance vis-à-vis the benchmark returns will be explained to the Trustees.

The AMC will keep a record of all investment decisions.

Further, AMC may also use modes of despatch such as speed post, courier etc. for payments including refunds to unitholders in addition to the registered post with acknowledgement due.

ix) Multiple Bank accounts

The unit holder/investor can register multiple bank account details under its existing folio by submitting separate form available on the website of the AMC at www.assetmanagement.hsbc.co.in. Individuals/HUF can register upto 5 different bank accounts for a folio, whereas non-individuals can register upto 10 different bank accounts for a folio.

x) Prevention of Money Laundering and Know Your Client (KYC) Norms

KYC (Know Your Customer) norms are mandatory for all unit holders, including for all joint holders and the guardian in case of folio of a minor investor for transacting in Mutual Funds. Accordingly, financial transactions (including redemptions, switches and all types of systematic plans) and non-financial requests will not be processed if the unit holders (including POA holder) have not completed KYC requirements. Investors are requested to note that all investors are required to be KRA (KYC Registration Agency) KYC compliant. Those investors who had obtained MF KYC compliance through CVL (KYC registration authority till 31 December 2011) are required to submit necessary supporting(s) and update the missing information to be in compliance with the uniform KYC requirement laid down by SEBI.

Pursuant to SEBI circular dated December 26, 2013 on uniform KYC norms, certain information from Part I of the standard KYC application form, sourced by KRA (KYC Registration Agency) has been shifted to Part II which captures information specific to the area of activity of an intermediary. Accordingly, the additional KYC information required for mutual fund activities has been incorporated into the new application forms of the Fund and investors are requested to provide the same in order for the Fund to have all the necessary KYC details. For investors who have not completed KYC compliance through KRA, any application received without the requisite KYC information will be rejected. However, investors who have obtained KRA KYC compliance, as well as existing investors of the Fund who have registered their KYC details with the Fund shall be required to submit the additional KYC information to the Fund, only in the event of change in their occupation or income details. Kindly use the updated application forms or the separate KYC form of the Fund, available at ISCs or on the Fund's website for updating the additional information. The AMC reserves the right to reject the application and refund the application amount, post acceptance of the application, in the event that the required KYC information is not provided or not found adequate.

Further, in accordance with SEBI Circulars MIRSD/SE/Cir- 21/2011 dated October 5, 2011 and MIRSD/Cir-5/2012 dated April 13, 2012 on Uniform Know Your Client (KYC) read with AMFI Best practices guidelines circular no. 62/2015-16 dated September 18, 2015, it shall be mandatory for existing Unit holders to provide additional KYC information such as Income details, Occupation, Politically Exposed Person status, Net worth etc. as mentioned in the application form as well as complete In-Person Verification (IPV) and provide any missing KYC information, failing which the AMC shall have the authority to reject the transaction for additional subscription (including switches) in their existing folios. However, any SIP/STP registered till December 31, 2015 will be exempt from this requirement.

Implementation of Central KYC (CKYC)

The Government of India has authorized the Central Registry of Securitization and Asset Reconstruction and Security interest of India (CERSAI, an independent body), to perform the function of Central KYC Records Registry including receiving, storing, safeguarding and retrieving KYC records in digital form. Accordingly, in line with SEBI circular nos. CIR/MIRSD/66/2016 dated July 21, 2016 and CIR/MIRSD/120/2016 dated November 10, 2016 on Operationalisation

of Central KYC (CKYC), read with AMFI Best Practice Guidelines circular No. 68/2016-17 dated December 22, 2016 and circular no. AMFI/35-P/Mem-Cor/32/2017-18 dated January 5, 2018, new individual investors investing into the Fund are requested to note the following changes, from February 1, 2017.

1. New individual investors who have never done KYC under KRA (KYC Registration Agency) regime and whose KYC is not registered or verified in the KRA system, will be required to fill the new CKYC form while investing with the Fund.
2. If any new individual investor uses the old KRA KYC form which does not have all the information needed for registration with CKYC, such investor will be required to either fill the new CKYC form or provide the missing/additional information using the Supplementary CKYC form.
3. Investors who have already completed CKYC and have a KYC Identification Number (KIN) from the CKYC Registry can invest in schemes of the Fund quoting their 14 digit KIN in the application form. Further, in case the investor's PAN is not updated in CKYC system, a self-certified copy of PAN Card will need to be provided.

Updation of Permanent Account Number (PAN) for transactions in HSBC Mutual Fund

Investors are requested to note that PAN is mandatory for all financial transactions in schemes of the Fund, with respect to all unitholders in the folio. Accordingly, any financial transactions received without PAN, in respect of non-PAN-exempt folios, shall be rejected in case the copy of the PAN card is not submitted earlier to the Fund or along with the transaction. The AMC reserves the right to keep on hold the transaction till the PAN is validated by the AMC/Registrar.

The investors who have not provided the copy of PAN card to the AMC or not completed the KYC process at the time of investing in any of the schemes of the Fund, are advised to provide a copy of self-attested PAN card by submitting 'KYC Change Request Form' which is available on our website <https://www.assetmanagement.hsbc.co.in/en/mutual-funds>.

10. Sale, Repurchase and Switch of Units on On-going Basis

The Units of the Scheme are available for sale, repurchase and switch at applicable NAV based prices, subject to prevalent load provisions, if any, on every business day.

i) Sale (Purchase) of Units

The Units of the Scheme will be available at the sale price, which is based on the Applicable NAV, subject to sales load and subject to the minimum application amount specifications. Subscriptions on an ongoing basis will be made only by specifying the amount to be invested and not the number of Units to be subscribed. The total number of Units allotted will be determined with reference to the applicable sale price and fractional Units may be created. Fractional Units will be computed and accounted for up to three decimal places for all Scheme. Fractional Units will in no way affect the investor's ability to redeem Units. The AMC reserves the right to review the terms of acceptance of subscription requests and reserves the right to change the basis for subscription from amount basis to any other basis, subject to the SEBI Regulations. Refer Section III.8 v) on 'Suspension of Sale/Repurchase/Switch of Units.'

ii) Repurchase (Redemption) of Units

The repurchase request can be made on a pre-printed form or by such other method(s) as may be acceptable to the Fund/AMC from time to time. Such request should be submitted at any of the Investor Service Centres/Designated Collection Centres.

The repurchase would be permitted to the extent of credit balance in the Unitholder's account. The repurchase request can be made by specifying the rupee amount or the number of Units to be repurchased. Repurchase requests can be made for a minimum amount of Rs. 1000/- (Rupees One Thousand Only) and in multiples of Re. 1/- (Rupee One

Only) thereafter in case of all the Schemes of the Fund. Where a request for a repurchase is for both amount and number of Units, the amount requested for repurchase will be considered as the definitive request.

If the balance in the Unitholder's account does not cover the amount of repurchase request, then the Mutual Fund is authorised to close the account of the Unitholder and send the entire such (lesser) balance to the Unitholder. In case an investor has purchased Units on more than 1 Business Day the Units purchased prior in time (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first i.e. on a First-in-First-Out basis.

Unitholders may also request for redemption of their entire holding and close the account by indicating the same to the Fund/AMC. Where however, the Unitholder wishes to redeem Units for a specified amount, then the amount to be paid on redemption will be divided by the redemption price, and the resultant number of Units will be redeemed.

In case the Units are standing in the names of more than one Unitholder, where mode of holding is specified as 'Joint', redemption requests will have to be signed by ALL joint holders. However, in cases of holding specified as 'Anyone or Survivor', any one of the Unitholders will have the power to make redemption requests, without it being necessary for all the Unitholders to sign. However, in all cases, the proceeds of the redemption will be paid to the first-named holder only. A fresh Account Statement/Transaction Confirmation will be sent to the redeeming investors, indicating the new balance to the credit in the Account.

The redemption cheque will be issued in favour of the Sole/First Unitholder's registered name and bank account number, and will be mailed to the registered address of the Sole/First holder as indicated in the original Application Form. The Fund may also directly credit the investor's bank account with the redemption proceeds, in lieu of issue of redemption cheque. The redemption cheque will be payable at par at all the places where the Investor Service Centres are located. The bank charges for collection of cheques at all other places will be borne by the AMC.

Further, as Units may not be held by any person in breach of the Regulations, law or requirements of any governmental, statutory authority including, without limitation, Exchange Control Regulations, the Mutual Fund may mandatorily redeem all the Units of any Unitholder where the Units are held by a Unitholder in breach of the same.

The Trustees may mandatorily redeem Units of any Unitholder in the event it is found that the Unitholder has submitted information either in the application or otherwise that is false, misleading or incomplete.

If a Unitholder makes a redemption request immediately after purchase of Units, the Fund shall have a right to withhold the redemption request till sufficient time has elapsed to ensure that the amount remitted by him (for purchase of Units) is realised and the proceeds have been credited to the concerned Scheme's Account. However, this is only applicable if the value of redemption is such that some or all of the freshly purchased Units may have to be redeemed to effect the full redemption.

iii) Switching Options

On an on-going basis, the Unitholders have the option to switch all or part of their investment from one Scheme to any of the other Scheme offered by the Fund, which is available for investment at that time, subject to prevailing load structure.

Where an investor seeks to move between the IDCW and growth alternatives within an option of the Scheme/Plan, this will not be construed as a switch. Consequently, no load will apply to such movements. Investors also have the option of switching between various Plans/Options of the same Scheme. To effect a switch, a Unitholder must provide clear instructions. A request for a switch may be specified either in terms of amount or in terms of the number of Units of the Scheme from which the switch is sought. Where a

request for switch is for both amount and number of Units, the amount requested will be considered as the definitive request. Such instructions may be provided in writing and lodged on any Business Day at any of the Investor Service Centres / Designated Collection Centres.

The switch will be effected by redeeming units from the Scheme in which the units are held and investing the net proceeds in the other Scheme / Plans / Options, subject to the minimum balance, minimum application amount and subscription / redemption criteria applicable for the target Scheme.

Valid requests for 'switch out' shall be treated as redemptions and for 'switch in' shall be treated as purchases, after considering any prevalent exit and entry loads or a combination thereof for switches. A switch by NRI / FPI Unitholders will be subject to the compliance of procedures and / or final approval of the Reserve Bank of India or and any other agency, as may be required.

The AMC reserves the right to charge different (including zero) loads on Applicable NAV on switchover as compared to the sale/repurchase as the case may be.

In view of the individual nature of tax impact, each investor is advised to consult his or her own tax consultant with respect to the capital gains / loss and specific tax implications arising out of switches and redemptions.

11. Ongoing price for subscription (purchase) / switch-in (from other Schemes / Plans of the Fund) by investors (Sale Price)

This is the price an investor needs to pay for purchase/switch-in. The sale price of the Units, on an ongoing basis, is based on the Applicable NAV. As per SEBI circular dated June 30, 2009, no entry load shall be charged for subscriptions made under the Plans / Options available under the Scheme.

12. Ongoing price for redemption (sale) / switch outs (to other Schemes / plans of the Mutual Fund) by investors (Repurchase Price)

This is the price an investor will receive on redemptions / switch outs.

Investors may submit their redemption / switch out request on any Business Day. The redemption will be processed as per the cut off timing and desired amount / units will be redeemed at the Applicable NAV on such date after charging applicable Exit Load, if any.

The Repurchase Price of the Units as per current SEBI Regulations shall not be lower than 95% of the Applicable NAV.

The repurchase price of the Units, on an ongoing basis, is based on the Applicable NAV. As per SEBI Regulations, an exit load upto a maximum of 5% may be charged for all redemptions under the Plans / Options available under the Scheme.

It will be calculated as follows:

Repurchase Price = Applicable NAV * (1 - Exit Load, if any)

Example

If the Applicable NAV is Rs.15 and the exit load applicable is 0.5%, the repurchase price is calculated as follows:

$$\begin{aligned}\text{Repurchase Price} &= 15 * (1 - 0.005) \\ &= 15 * 0.995 \\ &= 14.925\end{aligned}$$

13. Cut off timings for subscriptions / redemptions / switch-ins / switch-outs

This is the time before which an investor's application (complete in all respects) should reach the official points of acceptance.

The cut off timings for determining applicable NAVs for subscriptions / redemptions / switch-ins / switch-outs to be made at the Investor Service Centres / Designated Collection Centres (designated as 'Official Points of Acceptance' from time to time) are as per the following table:

Investment transactions (Lumpsum and SIPs) upto Rs. 50,000/- exempt from Permanent Account Number (PAN)

In accordance with SEBI letter no. MRD/DoP/PAN/PM/166999/2009 dated June 19, 2009 issued to Association of Mutual Funds in India (AMFI), guidelines issued by AMFI vide its circular no. 35P/MEM-COR/4/09-10 dated July 14, 2009 and subsequent guidelines issued by SEBI vide letter No. OW/16541/2012 dated July 24, 2012 in this regard, lumpsum SIPs upto Rs. 50,000/- per year per investor i.e. aggregate of investments in a rolling 12 month period or in a financial year i.e. April to March (hereinafter referred to as "Micro financial products (MFP)") shall be exempted from the requirement of PAN. This exemption shall be applicable only to investments by individuals (including NRIs but not PIOs), Minors and Sole proprietary firms including joint holders. HUFs and other categories of investors will not be eligible for this exemption. MFP investors will require to be KYC compliant by submitting requisite documents and obtaining KYC compliance by undergoing the uniform KYC process applicable for securities markets.

Investors are advised to refer to the uniform KYC process and form to comply with the KYC requirement.

While making subsequent MFP applications with a mutual fund, investor can quote the existing folio number where a MFP has been registered and therefore need not resubmit the supporting document. The MFP application will be rejected by the AMC where it is found that the registration of the application will result in the aggregate of MFP investments in a financial year exceeding Rs 50,000 or where there are deficiencies in the documents submitted by the investors in lieu of PAN as mentioned above. The rejected application will be sent back to the investor with a deficiency memo. In case the first MFP -SIP installment is processed (as the cheque may be banked), and the application is found to be defective, the MFP - SIP registration will

be ceased for future installments. No refunds shall be made by the AMC for the units already allotted and a communication to this effect will be sent to the investors. However, investors shall be allowed to redeem their investments at applicable NAV.

(2) Systematic Withdrawal Plan (SWP)

Unitholders have the benefit of enrolling themselves under the Systematic Withdrawal Plan. The SWP allows the Unitholder to withdraw sums of money each month/quarter from his investments in the Scheme. SWP is ideal for Unitholders seeking a regular inflow of funds for their needs in a tax efficient manner. It is also suited to retired persons or individuals who wish to invest a lumpsum and withdraw from the investment over a period of time. Investors can opt for either monthly or quarterly withdrawals. The Unitholder may avail of this Plan by sending a written request to the Registrar.

The amount thus withdrawn by redemption will be converted into Units at the Applicable NAV based prices and the number of Units so arrived at will be subtracted from the Unit balance to the credit of that Unitholder. The SWP can be effected on any day of the month for fixed amount option and the payout will be as per the payout schedule of the Scheme. In case the chosen date falls on a Non-Business Day or on a date which is not available in a particular month, the SWP will be processed on the immediate next available Business Day. If the choice of date selected is more than one date then the SWP installment will be processed only for Business Days when NAV is available. No SWP installment shall be processed for Saturday, Sunday or any other non-business day. In case where no SWP date is indicated by the investors 10th shall be treated as the Default Date. However, in case of Capital Appreciation the SWP will be processed only on the 1st Business day of the month. The Fund may close a Unitholder's account if the balance falls below Rs 1,000/- in the respective Options/sub-options within 30 days from the date on which a written intimation in this regard is sent to the Unitholder.

The SWP may be terminated or modified on a written notice to the Registrar of at least 14 days by a Unitholder of the Scheme and it will terminate automatically if all Units are liquidated or withdrawn from the account by the Unitholder.

Under SWP, investors can opt for withdrawal of a Fixed Amount or the Capital Appreciation on their investment (for a minimum period of 3 months).

Under the Fixed Amount Option, the investor specifies the fixed amount that he would like to receive on a regular basis irrespective of the gain/loss on the Fund in the specified period. The minimum amount which the Unitholder can withdraw is Rs. 1000/- (Rupees One Thousand Only) and in multiples of Re.1 (Rupee One Only) thereafter.

The Capital Appreciation Option allows the automatic redemption of the incremental amount i.e. appreciation on the original investment. For example, if the appreciation on the initial investment in a period is Rs. 5000/- and Rs. 4500/- in the next period, then the investor would receive only the appreciation i.e. Rs. 5000/- and Rs. 4500/- in the respective periods. Unitholders should note that in the event of there being no capital appreciation, no withdrawal/payment would be effected.

The AMC reserves the right to introduce/discontinue SWP from time to time.

(3) Systematic Transfer Plan (STP)

Unitholders of the Scheme can benefit by transferring specific rupee amounts periodically, for a continuous period. STP allows the investors to transfer a fixed amount or capital appreciation every month to a particular Scheme at NAV based prices. Investors can opt for the Systematic Transfer Plan by investing a lumpsum amount in any HSBC open ended fund and providing a standing instruction to transfer sums at monthly intervals (for a minimum period of 3 months) into any open ended Equity Schemes of the HSBC Mutual Fund. Investors could also opt for STP from an existing account by quoting their account/folio number. Investors could choose to specify the fixed sum to be transferred every month or opt for capital appreciation option to automatically transfer the incremental

amount i.e. appreciation on the original investment. The minimum amount which the Unit holders can transfer is Rs. 1000/- (Rupees One Thousand Only) and in multiples of Re. 1 (Rupee One Only) thereafter. Unit holders should note that in the event of there being no capital appreciation, no transfer would be affected.

Transfers would be effected on any date as indicated by the investor in case of Fixed Amount Option. If these dates fall on a holiday, the transaction will be effected on the next Business Day. If the choice of date selected is more than one date then the STP installment will be processed only for Business Days when NAV is available. No STP installment shall be processed for Saturday, Sunday or any other non-business day. Transfers must be for a minimum amount of Rs. 1,000/- per month. In case of STP if the choice of date for the installment is not indicated by the investor, the installment of STP will be processed on the every month. For Capital Appreciation option the STP will be processed only on the 1st Business day of the month. STP will come into effect within 10 days from the date of receipt of application.

The STP may be discontinued on a written notice to the Registrar of at least 14 days by a unit holder of the Scheme. The AMC reserves the right to introduce/discontinue STP/variants of STP from time to time.

SIP/STP in Direct Plan - Investors who had registered for SIP/STP facility prior to January 1, 2013 (i.e. before introduction of Direct Plan) with distributor code and now wish to invest their future installments into the Direct Plan, shall make a written request to the Fund in this behalf. The Fund will take at least 15 days to process such requests. Intervening installments will continue in the existing Plan. However, investors who had registered for STP facility prior to this date with distributor code and wish to invest under the Direct Plan through this facility shall cancel their existing STP and register afresh.

In case of SIP/STP facility registered prior to January 1, 2013 without any distributor code, installments falling on or after this date are being automatically processed under the Direct Plan. In all cases, the terms and conditions of the registered enrolment will continue to apply.

The subsequent installments of STP into the Scheme will be stopped from the month in which the subscriptions exceed the maximum permissible limit as mentioned in this SID.

(4) Facilitating transactions through Stock Exchange Mechanism (BSE Star & NSE MFSS)

Accordingly such stock brokers shall be eligible to be considered as 'official points of acceptance' of AMC. D. LOAD STRUCTURE

Load is an amount which is paid by the investor to redeem the units from the Scheme. This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC at www.assetmanagement.hsbc.co.in or may call at ISC or your distributor.

As per SEBI circular dated 30 June 2009, no entry load will be charged for purchase/additional purchase/switch-in including registrations for HSBC SIP/HSBC STP, accepted by the Fund, with effect from August 1, 2009.

Repurchases could attract an exit load (as a % of the Applicable NAV for redemptions). Unitholders should note that the AMC retains the right to change exit load as per the provisions below:

The repurchase price however, will not be lower than 95% of the NAV.

Load Structure (Including SIP/STP, wherever applicable) for Scheme/Plans :

Entry Load: Nil*

Exit Load: (i) In respect of each purchase/switch-in of Units, an Exit Load of 1% is payable if Units are redeemed/switched-out within 1 year from the date of allotment. (ii) No Exit Load will be charged, if Units are redeemed/switched-out after 1 year from the date of allotment.

* In terms of SEBI circular no. SEBI/IMD/CIR No.4/168230/09 dated June 30, 2009, no entry load will be charged to the investor effective August 1, 2009.

Units issued on reinvestment of IDCW shall not be subject to exit load for existing as well as prospective investors. The exit load set forth above is subject to change at the discretion of the AMC and such changes shall be implemented prospectively.

The exit load charged, if any, will be credited to the schemes. Goods & Service tax on exit load, if any, will be paid out of the exit load proceeds and exit load net of service tax, if any, will be credited to the scheme.

The investor is requested to check the prevailing load structure of the Scheme before investing. For any change in load structure AMC will

issue an addendum and display it on the website/Investor Service Centres.

Any imposition or enhancement of Load in future shall be applicable on prospective investments only. At the time of changing the Load Structure:

- (i) The addendum detailing the changes will be displayed on the website of AMC and attached to the SID and Key Information Memorandum. The addendum will be circulated to all the distributors/brokers so that the same can be attached to all the SIDs and Key Information Memorandum already in stock.
- (ii) Arrangements will be made to display the changes/modifications in the SID in the form of a notice in all the Investor Service Centres and distributors/brokers' office.
- (iii) The introduction of the Exit Load alongwith the details will be stamped in the acknowledgement slip issued to the investors on submission of the application form and will also be disclosed in the Account Statement or in the covering letter issued to the Unit holders after the introduction of such Load.
- (iv) A notice for change in Exit Load shall be uploaded on the website of the Mutual Fund.
- (v) Any other measures which the mutual fund may feel necessary.

Methodology for calculation of Sale and Repurchase Price of units

Sale Price

Sale Price = Applicable NAV * (1 + Entry Load, if any)

Example

If the Applicable NAV is Rs.15 and the sales load, if applicable is 2%, the sales price is calculated as follows:

$$\begin{aligned}\text{Sales Price} &= 15 * (1 + 0.02) \\ &= 15 * 1.02 \\ &= 15.30\end{aligned}$$

However, as stated above, in accordance with SEBI circular dated 30 June 2009, no entry load will be charged for purchase/additional purchase/switch-in including registrations for HSBC SIP/HSBC STP, accepted by the Fund, with effect from August 01, 2009.

Repurchase Price

Repurchase Price = Applicable NAV * (1 - Exit Load, if any)

Example

If the Applicable NAV is Rs.15 and the exit load applicable is 0.5%, the repurchase price is calculated as follows:

$$\begin{aligned}\text{Repurchase Price} &= 15 * (1 - 0.005) \\ &= 15 * 0.995 \\ &= 14.925\end{aligned}$$
