(ii) Future Outlook

Equity Market Outlook

The Indian economy is going through a period of trough and has been growing at sub 5%. Observing the breakup of the real GDP, it is seen that the industrial growth has slowed down considerably whereas services has held up steady and agriculture has bounced back in FY14. The Current Account Deficit which went above 6% in Dec 2012 has been reigned in now to below 2% and so have the rupee depreciation and consumer inflation. These factors are more benign now compared to mid FY14 when these were proving to destabilize the economic environment.

Going forward, few key factors may decide the fate of the economy viz. 1. New Government and its policies 2. The lagged impact of last year's policy measures of the incumbent Government. 3. The monsoon and its impact on agriculture growth in the wake of a threat of El –Nino 4. Rupee movement and its impact on exports 5. Consumer Inflation and the resultant RBI stance on interest rates. As is known, RBI has stated 6% CPI inflation target by Jan 2016 and has indicated inflation its topmost priority.

As far as the Indian stock markets are concerned, the rally in the recent months indicates that the market is expecting a positive election verdict. The BSE Sensex is trading at about 15XFY14E and 13XFY15E. The markets had traded upto peak valuations of 22X one year forward earnings estimates in end 2007.

Today, there is a wide disparity in valuations across sectors with consumers and pharmaceutical stocks trading much higher versus remaining sectors, although recent rally has bridged the gap partially. Overall, in an expansionary economy mode, one may witness a further rally in the markets and bridging of the valuation gap within cyclical and defensives.

Foreign funds continued to be positive on Indian markets. FII flows which were strong at 20bn\$ in 2013 have continued to be positive till March 2014.

Compared to emerging markets, India is either at par or marginally expensive. However, given our favourable demographics, such premium may be justified. Overall, the Indian markets still look undervalued from a longer term growth perspective.

Debt Market Outlook

Indian government bond yields have risen around 85 bps over the course of FY14, ending the year at 8.80% versus a low of 7.12% in May 2013. In its bi-monthly review of the monetary policy on 1 April, the RBI kept key rates unchanged (repo rate at 8%), maintaining their focus on bringing CPI down sustainably to 8% by Jan 2015 and 6% by Jan 2016. The RBI increased the liquidity provided under term repos from 0.5% of NDTL of the banking system to 0.75%, and decreased the liquidity provided under overnight repos under the LAF from 0.5% of bank-wise NDTL to 0.25% with immediate effect.

The government will raise Rs. 3.68 trillion (\$61.4 billion) through bond sales in the first half of the fiscal beginning 1 April, which is 61.6% of the total borrowing scheduled for FY 2015. With the new auction calendar kick-starting in April, markets will be keenly watching investor appetite as also any signs of RBI resuming its open market operations at the longer end of the curve. However, communication from the RBI governor so far has been fairly clear that it would not use OMOs to support yields, but only for liquidity injection through securities at the short end. Hence, markets would have to evolve an equilibrium level for gsec yields, devoid of RBI support. Similar to equities - critical trigger for fixed income markets would be the election results, and strength and resolve of the new government to implement credible fiscal consolidation and inflation control strategies.

Hence – while the pre-election period is likely to witness range-bound yields with an upward bias to yields on account of large supply, medium term clarity on the direction of fixed income markets is expected to emerge only after the elections.

(iii) Operations, Sales Offices and Investor Services

LTMF services its investors through its network of 56 equipped sales offices. Applications are accepted at 18 investor service centres and at other locations (around 197) applications are accepted by Computer Age Management Services Private Limited, the Registrar and Transfer Agent to the Schemes of LTMF ("CAMS").

As per SEBI, the details of the investor complaints as per the SEBI format are required to be a part of the trustee report. Accordingly, the details of the investor complaints received during the period April 2013 to March 2014 are included as Annexure 1.

In the financial year 2013-14, LTMF was one of the fastest growing fund houses in the Indian mutual fund industry. The average assets under management stood at Rs. 18,255 crores for the year ended March 2014 vs. Rs 11,170 crores in March 2013. This growth in assets has been against a backdrop of industry's 11% growth during the same period and at a time when financial markets in India faced significant volatility.
