(ii) Future Outlook

Equity Market Outlook

FY16 marked a year of negative returns across equity markets globally with China being the worst performing with -20% return and only Mexico was positive with 5% return. The year saw the adoption of negative interest rate policy by central bank of Japan to prop up the economy much on the lines

of Europe. Slowdown in Chinese growth continued to put pressure on commodities which saw sharp declines, although there was some back ended recovery. The year also saw a sharp 40% decline in the price of crude oil driven by strong supply from US and Middle East in the backdrop of slowing global demand growth. Fall in crude price further aggravated the global slowdown impact. US Fed started with a rate increase but has later turned dovish given the weak global environment and earnings slowdown in US corporates.

During FY16, undertone of the Indian market was negative with the Sensex declining by 9%, whereas the mid cap index showed a marginal decline and the small cap, a decline of 9%. This was contributed by weak corporate earnings growth despite a strong GDP number. Indian earnings remained subdued due to multiple factors such as overall slowdown in industrial growth, weak monsoons, a sharp fall in commodity prices and decline in exports. Sector performance in India reflected the weak sentiment, most showing a negative return during FY16 with realty sector seeing the highest decline at 26% and IT sector being the best performing one staying just flat. With regards to valuations, small/mid-caps continue to trade at some premium to large caps and overall Indian market seems valued close to long term average multiples.

Given the backdrop of FII outflows from emerging markets, Indian equities saw outflows of 2.2bn\$ from FIIs. However, inflows from the domestic investors were strong as the Indian mutual fund industry saw net inflows of about 10.5bn\$ in equities. The year also saw many equity issuances getting support from the strong liquidity by domestic investors.

Going forward, FY17 could be crucial in terms of recovery of corporate profitability. Any revival of stalled projects and private capex recovery would be important from an industry perspective. The tone of the monsoons would also be critical after having failed two years in a row. What is encouraging is that Indian economy appears relatively more stable in terms of economic growth as many continue to remain weak. Further hope has been built with the Government's focus on fiscal consolidation and at the same time maintaining emphasis on its initiatives on overall infrastructure spending, Make in India and structural reforms. Benign inflation during the year has given room to RBI to cut rates (overall 150 bps in the last 15 months). Effective translation of these rates into the economy, enabling policy, stability in global environment and a low base effect could facilitate the foundation for earnings recovery over the next year.

Debt Market Outlook

Indian government bonds had a volatile year in FY16, with the 10 year government bond benchmark starting the year at 7.75%, and despite the swings through the year, ended the year with a smart rally at 7.46%. Yields thus ended lower by 30bps on the benchmark 10 year government bond. RBI cut rates in total by 125bps since Jan 15 (150bps if we include the 25bp rate cut in its FY17 policy on April 5, 2016), while inflation broadly stayed well behaved around the 5% zone on back of good food supply management by the government and weak demand side pressures, along with sharply lower commodity prices. The government surprised the markets by sticking to a policy of fiscal prudence despite pressure from various quarters to ease the FRBM targets. In its monetary policy on April 5 2016, the Reserve Bank of India (RBI) lowered the repo rate by 25 bps at 6.50% and increased the reverse repo rate by 25 bps to 6.0% with a view to ensuring finer alignment of the weighted average call rate with the repo rate. In its forward guidance, the RBI stated that "the stance of monetary policy will remain accommodative.

The outlook for fixed income market continues to remain positive. Economic growth continues to struggle, despite various government measures to revive it. Most growth indicators as well as corporate earnings growth projections continue to remain anaemic, with little sign of any significant pick-up in the near term. Headline CPI Inflation has surprised on the downside, although core inflation is still stubbornly high above 5%. Globally, sentiment remains fragile, although past month has seen a revival in risk appetite across global markets including commodities. The government had surprised most street expectations by delivering on its promise of fiscal prudence, as required by the RBI, and also sharply reducing the small savings rate in the economy which was cited as a hindrance to transmission by the banks. Along with the 25bp rate cut in its April 2016 policy, the central bank has announced very significant changes and improvements to the liquidity framework. Short end liquidity should improve, as the government starts to spend more and also with RBI actively ensuring adequate liquidity.

On Credit risk front, FY16 was an eventful period for debt Mutual funds which saw an unfortunate payment default by one corporate and various credit rating downgrades that raised many concerns for investors. As per the CRISIL's update, while the number of upgrades in FY16 were still higher than number of downgrades in FY16, quantum of debt of firms (excluding financial sector) downgraded by CRISIL rose to an all-time high of Rs 3.8 trillion in FY16, suggesting that systemic credit quality remained under stress during the year. Many of the Public Sector Bank's credit ratings have also been downgraded during the year on account of high slippages on asset quality and lack of a strong capital base. Against the backdrop of credit downgrades, Securities and Exchange Board of India ("SEBI") has also tightened exposure norms for debt mutual funds. As we continue to have a cautious credit outlook in FY17, we remain conservative & very selective in picking up any credits based upon our robust internal credit rating approach which has helped us avoid any major exposure to any downgraded instruments in FY16.

(iii) Operations, Sales Offices and Investor Services

LTMF services its investors through its network of 64 equipped sales offices. Applications are accepted at 29 investor service centres and at other locations (around 197) applications are accepted by Computer Age Management Services Private Limited, the Registrar and Transfer Agent to the Schemes of LTMF ("CAMS").
