##### (ii) FUTURE MARKET OUTLOOK

###### Equity Market Overview and Outlook

Nifty 50 Index ("Nifty") with 15.2% returns ended financial year 2019 on a strong note as March was one of the best performing months in last three years. FY19 was one of the toughest years, as only few heavy weight stocks in Consumer, Banking and Information technology sectors resulted in Nifty's strong performance. The broader market i.e Nifty Midcap (-2.7%) and Nifty Small cap (-14.4%) had a painful FY19. Equity as an asset class was volatile across global markets as geopolitical tensions; trade war, volatile crude and slowing global growth were cause of concern.

Further to global factors, there were domestic factors like weak currency, rising crude and inflation which kept sentiments under check. Rural growth has also been lower than expected as MSP hikes did not yield expected results. So the year was split in three parts, the first was rally from the low made towards the start of the fiscal year which saw an 14.9% rise in Nifty by end of August 2018 aided by easing crude, recovery in rupee, rate cut by GST council, a good start to earnings and defeat of non-confidence motion against ruling government. This was followed by a market correction which saw the Nifty drop (-11.4%) till October 2018 as concerns over widening trade deficit, emerging concerns over credit & liquidity issues in financials, fear of defaults and currency depreciation. This was followed by a strong 11.6% return in March 2019 on the back of strong FII flows, supportive global backdrop and rising expectation of current government retaining power.

Valuations on a one year forward basis are marginally above their long period averages, given that earnings growth is likely to be strong. In fact for last four years, earnings growth has been negligible. In last three period earnings have been impacted by several factors like demonetization, GST implementation, NPA problem of corporate banks and slow pick up in rural economy. The supporting factor for Indian market was the persistent flow by domestic investor during this period. Domestic flows outpaced FII flows in last two years. In FY19, DIIs were significant buyers at \$10.3Bn as against \$0.2Bn by FII. Over the last 12 months midcaps have delivered -3% return, as against +15.2% by the Nifty and thus impacting its 3 year performance. However, over the last five years, midcaps have outperformed with 16.2% CAGR return versus Nifty return of 11.6% CAGR. Private Banks (+34%), PSU Banks (+28%), Technology (+26%), Consumer (+14%) and Healthcare (+10%) were the top performers for FY19. Media (-25%), Autos (-22%) and Metals (-15%) were laggards in FY19. The top performers for FY19 were also index heavy weights which resulted in strong performance of the indices while broader market struggled.

The key component that was missing for four years in an otherwise solid and strong India story was earnings growth which has started to show early sign of recovery with Q3FY19 earnings season. The pre-election budget offered several goodies to the bottom of the pyramid, but the underlying fiscal math appears optimistic. Income support scheme for farmers and reduction in income tax rates should help low-ticket consumption items. A visible policy support for the property sector, although small, is a welcome move and can bring forward the expected sector revival. We expect CY19 to be a year of elevated volatility and essentially a story of two halves given the impending big event of general elections. After lukewarm four years, earnings appear set for a recovery, especially led by banking, as credit growth picks up, moderation in fresh slippages and lower credit costs. In an election year, we expect political spending to act as a quasi-stimulus for consumption-oriented sectors. Indian economy is showing signs of recovery from the cyclical and structural bottlenecks witnessed over the past two years as reflected in data and with improving corporate earnings. We can expect the economy to recover gradually in CY2019 as GST related disruptions smoothen. Weak monsoon could lead to muted rural demand and is an indicator to watch out for. We continue to remain positive on India growth story from medium to long term prospective and continue to stay invested in companies with strong and able management.

#### Debt Market Overview and Outlook

Domestic debt market was a tale of two halves as far as FY 19 is concerned.

First half of the FY19 witnessed the yield on 10yr government bond harden by almost 100 bps to touch the highs of ~8.20%. Several global factors that influenced the rates were global rate tightening cycle, escalation of global geo-political issues, hardening of Brent crude oil prices from USD 68 per barrel in April 2018 to more than 86 USD / bbl in Sep 2018 led by strong compliance in OPEC / non-OPEC supply cut agreement & US imposed sanctions on Iran. Domestic issues like growing concerns on inflation amidst rising crude prices & higher MSPs for agricultural products, sharp rupee depreciation against USD from ~Rs 65 in April 2018 to more than Rs 74 in Sep, 2018, tight systemic liquidity and fiscal slippage concerns due to lower than expected GST collections also impacted. RBI hiked the policy rates by 25 bps each in June 2018 and August 2018 amidst the concerns on inflation, fiscal, currency and closing output gap. Demand-supply dynamics also remained un-favourable in 1HFY19 with FIIs being the net sellers and a muted demand from domestic banks.

Second half of the FY19 saw a significant reversal in market sentiments led by more patient approach adopted by the global banks amidst growing growth concerns, sharp crude oil correction all the way close to USD 50 per bbl, which coupled with INR recovery also alleviated concerns on domestic inflation to an extent. Change in fundamentals also got a support from a benign 2HFY19 G-Sec borrowing calendar which saw the borrowings lowered by ~Rs 20,000 cr against the earlier expected borrowings, RBI's Open Market Purchase of government bonds and other liquidity measures. With the change in growth-inflation dynamics, RBI cut the policy rates by 25 bps in February, 2019. Subsequently, 10 yr G-Sec yields remained in a declining trajectory and touched the lows of ~7.20% yield before closing the FY19 at ~7.49%.

Domestic credit market got rattled by series of credit events started by the default of IL&FS Group which created a liquidity squeeze for the entire NBFC and HFC sector. While the liquidity crunch largely got over in 3 – 4 months, other specific issues related to a large HFC and few promoting funding structures like Loan against Shares continued to impact the credit environment. Along with the heavy supply, especially from the Govt owned entities, AAA corporate spreads widened by 50 – 75 bps over the G-Sec and even more so for AA & below rated credits.

The month of March saw yields on 10 yr G-Sec (old benchmark) trading in the range of 7.49% to 7.59%. While the yields on the longer end AAA corporate bonds came down significantly from 8.55% to 8.20% ahead of the monetary policy in April, 2019 and reduced supply expectations, the yields on the 10year Gilts remained range bound as supply concerns through the year, lower expected OMO purchases with the announcement of 2 USD- INR swaps of \$5 bln each, higher crude oil prices and Fiscal slippage weighed on the markets.

The MPC as widely expected reduced repo rate by 25bps from 6.25% to 6% in April 2019 while keeping the stance of the policy "neutral". Four members voted in favor of a cut whereas the other 2 member voted for a status quo. The path of CPI inflation is revised downwards to 2.4% in Q4:2018-19, 2.9-3.0% in H1:2019-20 and 3.5-3.8% in H2:2019-20, with risks balanced on both sides. GDP growth for 2019-20 is also projected a bit downwards at 7.2 per cent in the range of 6.8-7.1 per cent in H1:2019-20 and 7.3-7.4 per cent in H2 with risks evenly balanced. Post policy 10yr gilts (old benchmark) moved up by 10 bps from 7.42% to 7.52% as the broader market went into the policy with an expectation of stance change to accommodative over and above the 25bps cut.

Going forward we remain positive on our outlook for interest rates to move lower but the timing and the quantum remains a question mark that the MPC has now delivered back to back rate cuts. Factors that we think are favorable toward a further rate cut in this cycle are:

- US Fed moving towards extended pause
- Global interest rate backdrop being supportive
- Oil prices staying range bound
- Domestic growth moderation
- CPI inflation well within the 2-6% range
- RBI tilt to pro-growth stance, so long as inflation stays benign

## Outlook for the fixed income markets:

- Expect H1 to be supportive for short end interest rates and liquidity
- Expect RBI to cut rates once more, but more importantly system liquidity to move into neutral / surplus mode in Q1 / Q2
- With bulk of the macro positives likely to be priced into bond markets during Q1, longer end interest rates could see some upside risks during H2 with fiscal risks and demand supply worries likely to weigh on valuations
- Credit spreads for good quality issuers (in AAA and AA segment) especially in the 1-3-year segment, likely to compress from current high levels on back of MF inflows and systemic liquidity turning positive.

6. The Trustee of L&T Mutual Fund and the Management of L&T Investment Management Limited (the "Management") are responsible for the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Schemes in accordance with the accounting policies and standards specified in the Ninth Schedule of the Regulations. This responsibility also includes maintenance of adequate accounting records for safeguarding of the assets of the Scheme and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.
7. In preparing the financial statements, the Trustee and the Management are responsible for assessing the Schemes' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Schemes or to cease operations, or has no realistic alternative but to do so. The Trustee and the Board of Directors of L&T Investment Management Limited are also responsible for overseeing the Schemes' financial reporting process.

## Auditor's responsibilities for the audit of the financial statements

8. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
9. As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:
  - Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
  - Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of internal control.
  - Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Management.
  - Conclude on the appropriateness of Management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Schemes' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Schemes to cease to continue as a going concern.
  - Performed procedures including to confirm confirmation of securities owned and unit capital balances as at March 31, 2019 by correspondence with the custodian/others and registrar and transfer agent, respectively.
  - Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
10. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
11. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.
12. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## Report on other legal and regulatory requirements

13. As required by section 55(4) of the Regulations, we report that:
  - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit; and
  - (b) In our opinion, the Balance Sheet, Revenue Account and Cash Flow Statement dealt with by this report have been prepared in accordance with the accounting policies and standards specified in the Ninth Schedule of the Regulations.
14. As required by clause 5 (ii)(2) of the Eleventh Schedule to the Regulations, we report that the Balance Sheet, Revenue Account, and Cash Flow Statement dealt with by this report are in agreement with the books of account of the Schemes.
15. In our opinion, the methods used to value non-traded securities as at March 31, 2019, as determined by L&T Investment Management Limited under procedures approved by the Trustee of L&T Mutual Fund in accordance with the guidelines for valuation of securities for mutual funds as mentioned in the Eighth Schedule of the Regulations issued by the Securities and Exchange Board of India, are fair and reasonable.
