*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

#The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

⁶L&T Tax Saver Fund is merged with L&T Equity Fund.

Market Review

Equity Market Review

Indian equity markets had a volatile month, declining in the first half as the RBI surprised negatively by keeping policy rates on hold and sharply reducing FY20 GDP forecast by 110 bps to 5%. Moreover, OPEC+ announced oil production cuts leading to sharp surge in crude prices. However, Indian equities pared losses in second half of the month on the back of positive global developments. Nifty and Sensex ended the month of Dec with 0.9% and 1.1% returns, respectively.

Global equity markets continued the strong momentum witnessed over Oct-Nov and performed well in Dec— particularly in second half on the back of positive news on the trade deal between US and China, finalization of US trade deals with Mexico and Canada and the decisive outcome in UK elections. Worldwide, Hang Seng was the out performer with 7% returns, followed by FTSE, Dow Jones and Nikkei, all rising between 2-3%. Euro Stoxx was worst performer with 1.1% returns.

MSCI emerging market outperformed the Indian domestic market with 7.2% returns. MSCI India was among the worst-performing EMs during the month. MSCI AWI Index ended with 2.6% returns. BSE Mid-cap underperformed whereas BSE Small-cap index was largely in-line with its larger peers. BSE Mid-cap and BSE Small-cap indices ended with -0.8% and 1% returns, respectively.

Sector Performance

Improved sentiment in Indian equities resulted in majority of sectors ending the month in green. Metal was the best performing sector with 6.6% returns outperforming Sensex by 5.5%. Realty (5.3%), IT (4.0%), Auto (2.1%), Bank (1.3%) outperformed Sensex. Power (0.1%), Healthcare (-1.3%), Capital Goods (-2.5%) underperformed Sensex. Energy and FMCG were the worst performing sector with -2.7% returns, respectively.

Institutional Activity

FII recorded net inflows of \$862 mn in Dec vs \$3.1 bn last month taking YTD inflows to \$14.2 bn. DIs continue to remain sellers with net outflows of -\$104 mn in Dec vs -\$1.1 bn in Nov taking YTD tally to inflows of \$6 bn.

Mutual funds were net equity buyers at \$386 mn while insurance funds were net equity sellers of \$490 mn in Dec. YTD, mutual funds were net equity buyers at \$7.4 bn while insurance funds remain net equity sellers at \$1.4 bn.

Macro-Economic Developments

On the economy front, headline CPI rose to 5.5% in Nov vs. 4.6% in Oct on the back of high food inflation (10% YoY). Within the food basket, vegetable prices surged 6.7% MoM in Nov, likely reflecting crop damages on account of seasonal rains. Core inflation rose 0.5% MoM and came at 3.8% YoY. Headline CPI inflation is likely to remain elevated in the near term on account of higher food prices. November WPI inflation rose to 0.58% vs 0.16% in Oct, owing to adverse base effects.

Composite PMI for November at 52.7 improved after two consecutive months of contraction. Improvement in PMI was led by services which gained 3.5 pts while manufacturing PMI rebounded 0.6 pts from its two-year lows to 51.2. Oct IIP declined 3.8% YoY vs -4.3% in Sep. On the investment front, intermediate goods (+22% YoY) were up while primary goods (-6.0% YoY), infrastructure goods (-9.2% YoY) and capital goods (-21.9% YoY) declined in Oct.

India's monthly trade deficit at \$12.1 bn increased in November vs \$11 bn in Oct. In a surprise move, MPC members unanimously kept the policy rates unchanged but maintained accommodative stance on future rate cuts. RBI has cut policy rates by a cumulative 135 bps since Feb of 2019.

Outlook

Indian equity markets remained upbeat on better global outlook and higher flows towards emerging markets led by positive global developments like trade deal between US and China, finalization of US trade deals with Mexico and Canada. Continued economic slowdown as reflected in the recent GDP print and output of eight core industries reflect a challenging grind ahead for the long-awaited recovery in earnings.

However, there are positive developments like improvement in GST collection in Dec, renewed push by government towards infrastructure investments which augurs well for the economy. FM announced National Infrastructure Pipeline (NIP) over FY20-25, nearly doubling the spending over FY14-19. This will augur well for the infrastructure sector and for the overall economy as infra spending has a higher multiplier effect on GDP growth. Over the last few years, government has done multiple structural reforms including the recent cut in corporate taxes. These structural reforms along with mega push towards infra spending are likely to give a big boost to the Indian economy.

We expect recovery in rural income led by expectation of better Rabi season (improved reservoir levels) and increased spending on infrastructure. After sharp underperformance of mid, small caps and value stocks over the last one year, we are witnessing increased interest in the quality mid, small cap and value stocks. We continue to maintain our positive outlook on high quality companies having better capital allocation and producing sustained and predictable cash flows.

Debt Market Review

Indian sovereign bond ended at 6.55% vs 6.46%, up by 9 bps from its previous close. The Reserve Bank of India bought Rs 10,000 crore of 10-year bonds from the secondary market, while selling Rs 8,501 crore of short-term bonds, in the special open market operations (OMO), held for the second time in 2019.

Macro-Economic Developments

Retail inflation spiked to over a 3-year high of 5.54% in November due to costlier food products like vegetables, pulses and protein-rich items. Wholesale prices based inflation rose to 0.58% in November.

Industrial activity contracted for the third consecutive month in October by 3.8%, driven by a fall in activity across sectors.

Market Performance

The 10-year benchmark G-Sec yield closed at 6.55%, up by 9 bps from its previous close of 6.46% while that on the short-term 1-year bond ended 16 bps higher at 5.30%.

In the corporate bond segment, yields rose across the yield curve over the month. The 10-year AAA bond yield ended 7 bps higher at 7.52%, while the short-term 1-year AAA bond yield ended 10 bps up at 6.10%. The spread between 1-year and 10-year AAA bond narrowed. Within the short term segment, yield on 3-month commercial paper (CP) was down 5 bps to 5.15% while 1-year CP yield was up 5 bps at 6.05%.

Outlook

The first half of December was dominated by market disappointment around MPC's surprise status quo on rates, surging oil prices, fiscal worries and of course CPI data which had reached 5.5% for November. The sell-off was the worst in the longer end of the G-Sec curve, with 10-year G-Sec reaching a high of 6.80% (vs 6.45% pre-policy).

During the post MPC briefing, despite being non-committal about the steepness of the curve and dodging queries around likelihood of an "operation twist", the RBI ended up surprising the markets by doing just that. Through the second half of December, the RBI conducted two Rs 10,000 cr twist operations, by buying the 10-year G-Sec benchmark and selling 2020 maturing G-Sec. Shorter end of the curve has since moved up by 25-30 bps, while the longer end has rallied sharply, recovering most of the post MPC sell-off.

The term spread has corrected sharply, with 5-10 year spread coming off to 10 bps versus 30 bps earlier. On the corporate bond side too, the shorter end of the curve 1-3 years has moved higher by about 20-30 bps, while the longer end has remained flat, with AAA spread over G-Sec continuing its gradual compression.

We expect the RBI MPC to remain on hold in the upcoming February MPC meeting, and continue to believe that the rate cutting cycle is almost done, with possibly a final 25 bps cut sometime through the middle of the year. With liquidity continuing to remain in surplus mode and fund flows into short and medium duration funds likely to remain strong, we expect the yields to now stabilize at the short to medium end.

Activity in the longer end of AAA curve has picked up, with markets increasingly focusing on the attractive carry that that segment offers. As we have been expecting for some time now, the longer end of the AAA curve has started outperforming with 3-10 year AAA spread coming down to 95-100 bps, from a peak of almost 125 bps in end November, and a long term average of 14 bps. We expect this move to sustain and expect the term spread of the AAA corporate bond to compress further.

Investment Strategy

We continue to believe that for investors able to take MTM volatility, the 10-year AAA bond strategy is likely to perform well over a 2-3 year period, given the attractive carry. Breakeven analysis suggests that over an investment horizon of 3 years, even if yields move up by more than 100 bps for a 9-10 year AAA bond, the extra carry provided by that segment would still result in a total return which can beat the returns from a 2-3 year AAA bond.

Similarly, we also believe that - going forward -markets will start focusing on the less liquid AAA and AA rated papers of good quality issuers, which offer attractive credit spread over the liquid AAA papers. Spreads on these bonds are now in excess of 200 bps, compared to 40-60 bps a year back, which indicates the extent of extreme risk aversion prevalent in the bond market.

With a large part of the liquidity driven rally in the 2-5 year liquid AAA space now behind us, we believe that the carry offered by the less liquid, moderate risk AAA/AA bonds stands out in terms of attractiveness and the yields in some of these issues have already started moving lower over the past few weeks.

*B: Scheme Benchmark, AB: Additional Benchmark

⁶For investments in foreign securities - Mr. Alok Ranjan (w.e.f Oct 1, 2019)

Investment objective: To generate long-term capital appreciation from a diversified portfolio of predominantly equity and equity related securities, including equity derivatives, in the Indian markets with key theme focus being emerging companies (small cap stocks). The Scheme could also additionally invest in Foreign Securities

Exit Load: If the units redeemed or switched out are upto 10% of the units purchased or switched in ("the limit") within 1 year from the date of allotment - Nil. If units redeemed or switched out are over and above the limit within 1 year from the date of allotment - 1%. If units are redeemed or switched out on or after 1 year from the date of allotment - Nil.

*There has been a change to the fundamental attributes of L&T MIP - Wealth Builder Fund w.e.f. January 9, 2015 and consequently is now an equity fund. Performance shown above is of L&T MIP - Wealth Builder Fund. ³(B) NIFTY Equity Savings Index

Past performance may or may not be sustained in the future. Returns greater than 1 year period are compounded annualized. Dividends are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of ₹ 10000 invested on the 1st day of every month has been considered.

^ΔAB: Scheme Benchmark, AB: Additional Benchmark

Investment objective: To generate regular income by predominantly investing in arbitrage opportunities in the cash and derivatives segments of the equity markets and debt and money market instruments and to generate long-term capital appreciation through unhedged exposure to equity and equity related instruments.

Exit Load: If the units redeemed or switched out are upto 10% of the units purchased or switched in ("the limit") within 1 year from the date of allotment - Nil. If units redeemed or switched out are over and above the limit within 1 year from the date of allotment - 1%. If units are redeemed or switched out on or after 1 year from the date of allotment - Nil.

*For details of other funds managed by the Fund Manager and the performance of the schemes, please refer page nos 33 to 37.

^yFund is co-managed by Mr. Vikas Garg.

Past performance may or may not be sustained in the future. * Point to Point (PTP) Returns in INR show the value of ₹10,000/- invested [^]Standard Benchmark

Note: As per the SEBI standards for performance reporting, the since inception return is calculated on NAV of ₹10/- invested at inception. CAGR is compounded annualised. Date of inception is deemed to be date of allotment.

- Mr. Jalpan Shah manages 14 Schemes.
- Performance data is as on 31st December 2019.
- Different plans shall have a different expense structure.
- The performance details have been provided for Regular and Direct Plan separately.

Common to all Schemes: Performance of the schemes (wherever provided) are calculated basis CAGR for the past 1 year, 3 years, 5 years and since inception. In case, the start/end date of the concerned period is a non - business day (NBD), the NAV of the previous date is considered for computation of returns.

Glossary

■ Sharpe Ratio

Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

■ Beta

Beta (B) of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measure the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.

■ Modified Duration

A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.

■ Standard Deviation

A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility.

■ Risk Free Return

The theoretical rate of return of an investment with safest (zero risk) investment in a country.

■ Tracking Error

Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

■ Total Expense Ratio

Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

■ Average Maturity

Weighted average maturity of the securities in scheme.

■ Portfolio Yield (Yield To Maturity)

Weighted average yield of the securities in scheme portfolio.

How to read a Factsheet

■ Fund Manager

An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

■ Application Amount for Fresh Subscription

This is the minimum investment amount for a new investor in a mutual fund scheme.

■ Minimum Additional Amount

This is the minimum investment amount for an existing investor in a mutual fund scheme.

■ Yield to Maturity

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

■ SIP

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs 500 every 15th of the month in an equity fund for a period of three years.

■ NAV

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

■ Benchmark

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

■ Entry Load

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund.

The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs. 101. (Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor).

■ Exit Load

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is Rs. 100 and the exit load is 1%, the redemption price would be Rs.99 per unit.

■ Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

■ Standard Deviation

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

■ Sharpe Ratio

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

■ Beta Ratio (Portfolio Beta)

Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

■ Average portfolio PE (Average P/E)

It is price to earnings ratio of the stocks calculated for the entire portfolio on a weighted average basis.

■ Average portfolio price to book ratio (Average P/BV)

It is price to book value of the stocks calculated for the entire portfolio on a weighted average basis.

■ Average portfolio dividend yield (Average Dividend Yield)

It is dividend yield of the stocks calculated for the entire portfolio on a weighted average basis.

■ Net Equity

Net equity level is the net equity exposure percentage adjusted for any derivative positions in stocks or index for hedging or rebalancing purpose.

■ R Squared

It is a statistical measure of how closely the portfolio returns are correlated with its benchmark.

■ AUM

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

■ Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

■ Nature of Scheme

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

■ Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

L&T INVESTMENT MANAGEMENT LIMITED - INVESTOR SERVICE CENTRES

Ahmedabad : Second Floor, Shital Varsha Arcade, Vijay Cross Road, Navarangpura, Ahmedabad-380009 **Bangalore** : N-111(47-43), Manipal Centre, First Floor, North Block, Dickenson Road, Bangalore-560042. **Bengaluru** : Unit No. 1, 3rd Floor, Pride Hulkul, No. 116, Lalbagh Road, Opp. Passport Office, Bengaluru-560027 **Bhavnagar** : L&T Financial Services, Shop No.FF-5,Gopi Arcade, Waghawadi Road, Bhavnagar -364002. **Bhopal** : Alankar Complex, Mezzanine Floor, Above ICICI Bank, M.P.Nagar Zone-II, Bhopal-462011 **Bhubaneswar** : 428/3818, 2nd Floor, Jaydev Nagar, Kalpana Square, Near Pantho Nivas, Bhubaneswar-751002 **Borivali (Mumbai)** : 4th Floor, Office No. 405, Orchid Plaza, Off S V Road, Near Railway Platform No. 1, Borivali (West), Mumbai-400092 **Chandigarh** : Plot No. 174, 3rd Floor, Industrial Area, Phase-2, Chandigarh-160002 **Chennai** : 6th Floor, K.G.N. HAVE YOU PLANNED YOUR INVESTMENT BUCKET-LIST?

Plan your SIPs according to your financial goals.

A Systematic Investment Plan (SIP) is an invaluable investing tool that can help you achieve your financial goals with ease. It helps build discipline and takes you closer to your goals each day.

SHORT TERM

Immediate expenses

- Car
- Bike
- School Fees
- Vacation

Short term solutions

- Ultra-short term Funds
- Short-term Funds
- Liquid Funds

Choose investments that offer growth as well as liquidity for emergencies.

MEDIUM TERM

Medium term spends

- New House
- Vacation Abroad
- Child's Education

Start a SIP in

- Hybrid Funds
- Monthly Income Plans

Get the growth potential of equities along with the stability of debt.

LONG TERM

Long-term goals

- Retirement
- Child's Higher Education
- Child's Marriage

Long-term SIPs in

- Small Cap Funds
- Mid Cap Funds
- Large Cap Funds
- Sectoral Funds
- Thematic Funds

Equity investments can help you beat inflation over the long term.

Put your goals in different buckets and plan your investments accordingly!
