\*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

#The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

# CEO's VIEW

**KAILASH KULKARNI**

CEO, L&T Mutual Fund

## Thank you, FY 20-21

If anyone was looking for an illustrative year in recent memory, which was challenging, disruptive and unpredictable at the same time, and also affected one and all, FY21 certainly fits the bill because it caught pretty much everyone by surprise and breached all boundaries of imagination and forecasts. Looking back at the fiscal we just left behind, most of us can say with conviction that we have endured one of the toughest years of our lives as far as investing is concerned. The S&P BSE Sensex was at 29,468 on March 31, 2020, and is at 49,509 as on March 31, 2021. From the lows of the market on April 1, 2020, to the market recovery and volatility we saw especially in February-March 2021, the year not only taught us a great deal about investing behaviour, but also imparted some crucial life lessons. Our culture teaches us to venerate and revere anyone who has taught us anything, and this year has been nothing short of a Guru for us.

Hence, with all humility and gratitude at my command, I want to say "Thank You" to FY21.

## Key learnings from FY 20-21

- **Use technology to your advantage:** This year taught us that with the progress made over the years, we could use technology to our advantage and ensures business continuity when it came to personal investments or running businesses. Seamless online transactions, mobile apps, UPI, digital payment platforms and video-conferencing got even the un-initiated fall in love with technology.

- **Liquidity is important:** The year taught us that having liquidity (ability to get the cashback) is an important factor in the decision-making while we plan our investments. In all this panic, mutual funds stood out as a great investment product as one could redeem and get the money back in T+1 or T+3 days.

- **Prioritise 'needs' over 'wants':** The year taught us that just to maintain a lifestyle, over-leveraging oneself is an imprudent choice. Too much EMI as a percentage of what one earns is detrimental to one's financial health and one should prioritise expenses while taking loans. Any borrowing should enable one to attain good needs like home or education and you should think carefully before indulging in credit cards and personal loans for lifestyle "wants".

- **Power of Asset Allocation:** The year also taught us why asset allocation is important. It gave us the experience of the equity market meltdown in March 2020 and a credit crisis in April end. It taught us why investing across asset classes based on the risk profile of every individual is important in the long run.

- **Don't get overwhelmed by panic:** The year taught us that stopping SIPs just because of irrational fear of looking at past returns is not good. A few very good months (For example Apr'20 to Feb'21) can dramatically change the past returns and also taught us that cost averaging and the power of compounding work to the investors' benefit in the long run.

- **Stick to basics even during a bull run:** The year also taught us not to get swayed by optimism. Informed decision-making and sticking to the basics of investing as per the financial goals apply when markets are surging or hitting the bottom. One must not try to time the market and should spend 'time' in the market to build wealth.

- **Health & Life Insurance is a necessity:** Invest in the health and life covers because no other year has taught us more about the uncertainty of health as this one. Arm yourself with adequate cover for the unfortunate eventualities for yourself and your loved ones.

- **Financial Literacy is a necessity:** In the age of Google, translations and voice-based options for answering your queries – understanding your finances is a necessity for everyone irrespective of their age, gender, or socio-economic background. You have all the information you need to know at your disposal – so please read and stay informed. And when you need help in-person, there are professionals like your banker, financial advisor and broker who are equipped to provide you with suitable solutions. Feel free to reach out to them.

I conclude by saying that above everything, we must be grateful for the year for its teachings and treasure our learnings, because a year like this does not come often. Stay invested, stay disciplined, don't go by hearsays, and seek qualified advice before embarking on the investment journey.

**Thank you and stay safe!**

### SHARPE RATIO

Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.

### BETA

Beta (B) of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measure the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.

### MODIFIED DURATION

A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.

### STANDARD DEVIATION

A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility.

### RISK FREE RETURN

The theoretical rate of return of an investment with safest (zero risk) investment in a country.

### TRACKING ERROR

Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

### TOTAL EXPENSE RATIO

Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

### AVERAGE MATURITY

Weighted average maturity of the securities in scheme.

### PORTFOLIO YIELD (YIELD TO MATURITY)

Weighted average yield of the securities in scheme portfolio.

### IDCW

IDCW stands for 'Income Distribution cum Capital Withdrawal option'. The amounts can be distributed out of investors' capital (Equalization Reserve), which is part of the sale price that represents realized gains, as may be declared by the Trustees at its discretion from time to time (subject to the availability of distributable surplus as calculated in accordance with the Regulations).

Refer our notice no. 55 and addendum no. 56 dated March 26, 2021 for details on IDCW.

## FUND MANAGER

An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

## APPLICATION AMOUNT FOR FRESH SUBSCRIPTION

This is the minimum investment amount for a new investor in a mutual fund scheme.

## MINIMUM ADDITIONAL AMOUNT

This is the minimum investment amount for an existing investor in a mutual fund scheme.

## YIELD TO MATURITY

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

## SIP

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs 500 every 15th of the month in an equity fund for a period of three years.

## NAV

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

## BENCHMARK

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

## EXIT LOAD

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is Rs. 100 and the exit load is 1 %, the redemption price would be Rs.99 per unit.

## MODIFIED DURATION

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

## STANDARD DEVIATION

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

## SHARPE RATIO

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

## BETA RATIO (PORTFOLIO BETA)

Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

## AVERAGE PORTFOLIO PE (AVERAGE P/E)

It is price to earnings ratio of the stocks calculated for the entire portfolio on a weighted average basis.

## AVERAGE PORTFOLIO PRICE TO BOOK RATIO (AVERAGE P/BV)

It is price to book value of the stocks calculated for the entire portfolio on a weighted average basis.

## AVERAGE PORTFOLIO IDCW YIELD (AVERAGE IDCW YIELD)

It is IDCW yield of the stocks calculated for the entire portfolio on a weighted average basis.

## NET EQUITY

Net equity level is the net equity exposure percentage adjusted for any derivative positions in stocks or index for hedging or rebalancing purpose.

## R SQUARED

It is a statistical measure of how closely the portfolio returns are correlated with its benchmark.

## AUM

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

## HOLDINGS

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

## NATURE OF SCHEME

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

## RATING PROFILE

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

## IDCW

IDCW stands for 'Income Distribution cum Capital Withdrawal option'. The amounts can be distributed out of investors' capital (Equalization Reserve), which is part of the sale price that represents realized gains, as may be declared by the Trustees at its discretion from time to time (subject to the availability of distributable surplus as calculated in accordance with the Regulations). Refer our notice no. 55 and addendum no. 56 dated March 26, 2021 for details on IDCW.

# EQUITY MARKET REVIEW

Indian equities continued to outperform the Emerging Markets (EMs) beating concerns over increasing COVID-19 cases and building inflationary pressure. Markets started on an upward trend led by supportive global cues. However, performance was choppy later as markets traded in line with global markets on worries over increasing bond yields.

MSCI India (USD) rose 2.2% in March and significantly outperformed peers MSCI APxJ (-2.3%) and MSCI EM (-1.7%). Nifty50 and S&P BSE Sensex ended the month of March with 1.1% and 0.8% returns, respectively. Midcaps and Smallcaps outperformed the Largecaps by 0.2% and 1.6%, respectively in March.

Among broader markets, the Midcap index outperformed the Largecap index by 20 bps while the Smallcap index outperformed the Largecap index by 160 bps. BSE Midcap and BSE Smallcap indices ended the month of March with 1.0% and 2.5% returns, respectively.

## GLOBAL MARKETS

Global equities traded higher but exhibited divergent regional trends. EM equities underperformed (MXEF - 1.7%) as the resurgence of a virus outbreak and rising US yields wore down risk appetite.

In the developed space, European equities (SXPP +6.1%) outperformed relative to their US peers (SPX +4.2%). Bond yields continued to advance higher on accelerating growth/inflation expectations and positive economic data, despite downside surprise on US core inflation.

Worldwide, major indices saw positive trends except for Hang Seng. Euro Stoxx was the outperformer with 7.8% returns, followed by Dow Jones (+6.6%) and FTSE (+3.6%). Nikkei and Hang Seng were the worst performers with +0.7% and -2.1% respective returns.

## SECTOR PERFORMANCE

Indian equity markets outperformed MSCI Emerging Market Index. IT, FMCG and Metals outperformed while Realty and Oil & Gas were notable laggards in March.

IT was the best performing sector with 8.7% returns outperforming Sensex by 7.8%. FMCG (7.6%), Metal (4.6%), Consumer Durables (3.4%), Power (2.3%) and Healthcare (2.3%) outperformed the Sensex.

Capital Goods (-2.0%), Auto (-3%), and Bank (-3.7%) underperformed Sensex. Realty and Oil & Gas were the worst performing sectors with (-4.2%) and (-4.7%) returns, respectively.

## INSTITUTIONAL ACTIVITY

FII recorded monthly inflows of US\$2.6 bn into Indian equities in the month of March vs. inflows of \$3.0 bn in February taking FY21 net inflows to \$37.8 bn. This is the 6th consecutive month of inflows.

DII turned net equity buyers in March post a five-month consecutive outflows streak with inflows of US\$756 mn in March vs. outflow of US\$986 mn in February taking the FY21 tally of outflows to \$18.2 bn.

Within DIIs, both Mutual funds and insurance funds were net sellers. Mutual funds were net equity sellers at \$17 mn while insurance funds sold \$331 mn of equities in March.

Mutual fund and insurance fund flow data is as of March 16, 2021.

## MACRO-ECONOMIC DEVELOPMENTS

Headline CPI for February at 5% was in-line but the composition is becoming uncomfortable from a policy perspective, with easing in food inflation being offset by firmer core inflation. Food prices rose 0.1% MoM in Feb on the back of contraction last month. Core-Core momentum (core inflation-ex-gasoline and diesel) remained sticky and elevated at 0.5% MoM both in January and February.

Composite PMI increased for a second straight month, rising by 1.5 pt MoM to 57.3 in Feb. The increase was led primarily by a sharp rise in services (+2.5 pts), which printed at 55.3, the highest in a year. The manufacturing index retreated gradually (-0.2 pts), but off a high base and still printed at 57.5. With the link between mobility (activity) and virus proliferation breaking down as consumers continue to normalize, services activity is mean-reverting. Forward-looking new orders also remained strong across both manufacturing and services.

IIP printed below expectations coming at -1.6% YoY for Jan. While it was a downside surprise, sequentially IP still rose 0.7% MoM on the back of the upwardly revised 2.1% increase last month. In level terms, industrial production continued to inch up and was 97% of its pre-pandemic level in January compared to 96% in December. Production for consumer durables (99%) is close to pre-pandemic level and non-durables (93%) has fallen behind pre-pandemic levels.

The trade deficit narrowed to US\$12.6 bn in February, from US\$14.5 bn last month. While domestic demand continues to firm, external demand appears to be consolidating after a sharp run-up. India's FX reserves are close to their all-time peak at \$582 bn as of March 19, 2021. FX reserves have decreased by US\$1.6 bn in the last 4 weeks. INR gained 0.5% and ended the month at 73.11/\$ in March.

Benchmark 10-year treasury yields averaged at 6.19% in Mar (11 bps higher vs. Feb avg.). US 10Y yields are at 1.74% (34 bps MoM, +107 bps YoY). Brent oil price fell 3.1 % MoM in Mar after a remarkable 17.5% MoM gain in February.

Fiscal deficit for Apr-Feb came at INR 14.1 tn or 76% of the budgeted FY21 deficit (INR 18.5 tn). This compares to 111% reached during the same time frame in FY20.

## OUTLOOK

MSCI India outperformed MSCI EM by 3.9 ppts and ranked 10 performance-wise in the EM cohort. This was on the back of a strong performance seen in the previous month. India's performance rank in EM stood at 10th (among 27 EMs) vs. 6th in February. The BSE Sensex continued to underperform the broader market in March, while the MSCI India Growth index underperformed the Standard and Value indices for the 4th month in a row.

The daily number of new cases (7DMA) has increased from 11k in mid-February to 62k now. The first wave peaked at 93k in mid-September. The positivity rate (new cases per 100 tests) has more than tripled over the last 6 weeks from 1.6% in mid-February to 5.9% now. Up to now, there does not appear to be a material impact on national mobility and activity. Ramping up the vaccination drive could effectively break the link between mobility/activity and the proliferation of COVID-19 cases.

Improvement in economic activity is reflected in GST collections as March witnessed all-time high GST revenue at Rs 1.24 tn mark. This was the 6th consecutive month with collections of more than Rs 1 tn. The sustained GST collection and several other data points show the economy moving close to normal across most segments. Other high-frequency data points for March also reflect sustained growth in YoY terms, indicating a favorable growth outlook in the near terms. E-way bill for March has achieved a new milestone of 7.12 cr. This is the highest number of e-way bills generated in any month during last three years journey of E-way bill system.

Overall, the recent surge in COVID-19 cases are less likely to impact the growth momentum, which should strengthen further, supported by normalization of economic activity, helped by the pickup in the vaccination drive. Apart from a boost from normalization in activity levels, the policy mix (monetary/fiscal) is supportive of growth, which, coupled with a positive outlook for global growth, bodes well for growth recovery to broaden and continue. Overall, we are at the cusp of the economic recovery cycle given the government efforts towards capex targeted through both Budget 2021 and PLI schemes rolled out for 13 sectors.

# DEBT MARKET REVIEW

Volatility across asset classes, both globally and in domestic markets continued. Fed kept policy rates and the pace of asset purchase program unchanged. However, they acknowledged pick-up in both growth and inflation. With markets wary of higher inflation, US Treasury yields saw a sharp movement upwards. The 10-year benchmark moved up by around 30-35 bps over the month. Crude prices after a sharp rise in February remained broadly range-bound in March.

On the domestic front, headline inflation inched higher to 5.03% vs 4.06% the previous month. Core inflation continued to remain sticky at 5.9% vs 5.7% the previous month. The inflation targeting regime, which was due for a review at the end-March, has been retained at 4% (+/-2%) for the next five years. The CRR dispensation of 1% which was provided last year, has been partially pulled back with Banks required to keep CRR at 3.5% currently. However, this might open up more room for OMO purchase by RBI. The 10-year G-Sec moved from 6.23% to 6.18% over the month. The Government cancelled the last scheduled auction in March (due to high cash balance position), which resulted in 10-year yields falling to 6.12% in the interim.

The government announced the borrowing calendar for H1 FY2022, where gross borrowing for H1 FY2022 was estimated at INR 7.24 lakh Crs (~60% of the budgeted target for FY2022). The supply in the 10-year segment was on expected lines, however, supply in the longer end was higher than expected, keeping that segment under pressure. With a sharp rise in COVID cases recently, expectations have built of the accommodative stance to remain longer than earlier expected. This led to short end rates falling in the recent past. With supply-side pressures on long tenor Corporate bonds abating and heavy investments by long only investors in year-end, spreads of long tenor Corporate bonds vis-à-vis G-Sec also compressed.

## MARKET PERFORMANCE

The 10-year benchmark G-Sec yield closed at 6.18%, down by 5 bps from its previous close of 6.23% while that on the short-term 1-year bond ended 5 bps lower at 3.85%.

In the corporate bond segment, yields fell across the yield curve over the month. The 10-year AAA bond yield ended 27 bps lower at 6.85%, while the short-term 1-year AAA bond yield ended 15 bps down at 4.20%.

The spread between 1-year and 10-year, AAA bond narrowed. Within the short-term segment, the yield on 3-month commercial paper (CP) was down 10 bps to 3.5% while 1-year CP yield was down 5 bps at 4.25%.

## Monetary Policy

The Monetary Policy Committee (MPC) came out with their bi-monthly policy statement today. Some of the key announcements are as follows:

- The MPC members unanimously voted for keeping the policy rates unchanged
- The MPC also unanimously decided to continue with an accommodative stance as long as necessary to sustain growth on a durable basis and continue to mitigate the impact of COVID-19 on the economy, while ensuring that inflation remained within the target going forward
- As a fall out of the growth-driven Budget by the Government, demand has picked up. However, the recent surge in COVID infections has added uncertainty to the growth outlook. To counter spillovers to the economy at large, fiscal and monetary authorities will stand ready to act. Considering these factors, the MPC has retained its expectation of real GDP growth at 10.5% for FY2022
- The projection for CPI inflation has been revised to 5% for Q4 FY2021, 5.2% in H1 FY2022, 4.4% in Q3 FY2022 and 5.1% in Q4 FY2022

Unlike previous policies where the MPC gave a time-frame based guidance on accommodative stance, this time around they have dropped the time frame based guidance, and given more outcome-based guidance, possibly because of the uncertainty around the evolving impact of the pandemic on growth.

The Governor also made two very important announcements in his address today:

- Given the success of the Variable Rate Reverse Repo (VRRR) auctions and the rising surplus liquidity in the system, RBI announced to further conduct VRRR auctions of longer maturity. However, the RBI reiterated that this should not be considered as liquidity tightening
- The Governor announced a secondary market G-Sec acquisition program (G-SAP 1.0), where the RBI will upfront commit to a specific amount of open market purchases of G-Sec in order to ensure orderly evolution of yield curve. For Q1 FY2022, G-SAP of INR 1 lakh Crs will be conducted, the first of which will be conducted for an amount of INR 25,000 Crs on April 15, 2021. Separately, the RBI will continue to use other tools under LAF, long term repo/reverse repo auctions, FX operations, OMOs and special OMOs as and when required

Investments in mutual funds and secondary markets inherently involve risks and recipient should consult their legal, tax and financial advisors before investing.

The G-SAP program is essentially a commitment from the RBI to provide durable liquidity to the system irrespective of market conditions.

Some of the other non-policy related announcements are as follows:

- The on-tap TLTRO scheme provided to Banks to lend to specific sectors which were allowed till March 31, 2021, has been extend by a period of 6 months
- Special liquidity facility worth INR 50,000 Crs will be provided to All India Financial Institutions (NABARD, NHB and SIDBI) for FY2022
- Bank lending to NBFCs (for on-lending to Agri/MSME/Housing) which were allowed under PSL will be extended till Sep 30, 2021

The Governor reiterated that RBI stands committed to ensuring ample system liquidity in consonance with the accommodative stance of the MPC, and RBI will continue to preserve financial stability and insulate domestic financial markets from volatility arising from global spillovers.

Post policy, G-Sec upto 5-year segment remained neutral to negative, however beyond 5 yr segment, yields were down by 3-7 bps. Money market papers were up ~10 bps, 2-3 yr Corporate bonds were up 5-10 bps, however, the 5-10 yr segment was down by up to 5bps. With longer tenor VRRR pushing short end rates higher and G-SAP program providing predictability on G-Sec supply absorption by RBI and in turn supporting longer end rates, markets are now expecting the yield curve to flatten. However, it will have to be seen how the G-SAP is conducted and which segments on the curve does the RBI target.

Overall, the RBI governor has been very articulate in his communication that the RBI and MPC stand ready to support growth in the face of the second wave of the pandemic, and will ensure that the bond market functions in an orderly manner, with adequate provision of liquidity. While this does provide much-needed comfort to market participants, especially for yields at the longer end of the curve via the newly announced GSAP 1.0 the program, the announcement regarding the longer tenor arable rate reverse repos (VRRR) does suggest that RBI is moving in a calibrated manner towards nudging up levels at the shorter end of the curve. Yields at the extreme short end have been trading close to the reverse repo rate with hardly any reward in the 0-6 month part of the curve. Effective implementation of the VRRR can gradually push up the term premia in the money market part of the curve, leading to a gradual flattening of the yield curve, which so far has been extremely steep.

Yields in the short to medium (2-3 years) part of the curve have moved higher over the past few months, thereby offering better value for investors looking for some yield pickup over other money market segments. *For investors with a long term horizon of 3 years and more, the steepness of the curve – especially between the 3-year and 7-year segment of the curve – is very attractive, and yields in the 7-year segment (where L&T Triple Ace Bond Fund is positioned) offer a substantial cushion to be able to offset the impact from the upward move in rates which is likely over the coming few years. Spreads on less liquid AAA securities and some of the good quality AA securities still remain attractive, and in an environment of interest rates trending higher, a strategy that delivers better yield pickup through judicious exposure to such securities, while still keeping duration moderate – are well suited for investors with a 3 year + horizon. L&T Resurgent India Bond Fund is well-positioned in this segment.*

## INVESTMENT OBJECTIVE

To generate long-term capital growth from a diversified portfolio of predominantly equity and equity-related securities. There is no assurance that the investment objective of the scheme will be realized.

## FUND DETAILS

Aims to capitalize on investment opportunities across the market spectrum

Focus on fundamentals: Quality and scalability of business, Management and Valuation

Looking to own companies with relatively strong balance sheets & attractive ratios

Individual stock weight is a function of fundamentals, valuation, market sentiment and conviction

## TOP 10 SECTORS

**Exit Load:** If the units redeemed or switched out are upto 10% of the units purchased or switched in ("the limit") within 1 year from the date of allotment - Nil. If units redeemed or switched out are over and above the limit within 1 year from the date of allotment - 1%. If units are redeemed or switched out on or after 1 year from the date of allotment - Nil. For details of the performance of the schemes, please refer page nos 43 to 46. For product label please refer Page 3 of the factsheet.

## INVESTMENT OBJECTIVE

The scheme will adopt a passive investment strategy. The scheme will invest in stocks comprising the Nifty 50 index in the same proportion as in the index with the objective of achieving returns equivalent to the Total Returns Index of Nifty 50 index by minimizing the performance difference between the benchmark index and the scheme. The Total Returns Index is an index that reflects the returns on the index from index gain/ loss plus dividend payments by the constituent stocks. There is no assurance that the investment objective of the scheme will be realized.

## FUND DETAILS

Low cost: The fund doesn't require a high level of active management and the stock selection is automatic hence it is cost-effective

No Active Risk: As the fund manager is not taking active calls to generate alpha, the fund doesn't carry any active risk

Broad Diversification - Exposure to the broader market and get to know where the fund is investing

Low Portfolio Turnover - Portfolio turnover is quite low since portfolio rebalancing happens with Index rebalancing only

## Date of Inception

Past performance may or may not be sustained in the future. \* Point to Point (PTP) Returns in INR show the value of ₹10,000/- invested ^Standard Benchmark

Note: As per the SEBI standards for performance reporting, the since inception return is calculated on NAV of ₹10/- invested at inception. CAGR is compounded annualised. Date of inception is deemed to be date of allotment.

- Mr. Shriram Ramanathan manages 14 Schemes and Mr. Jalpan Shah manages 17 Schemes.
- Performance data is as on 31st March 2021.
- Different plans shall have a different expense structure.
- The performance details have been provided for Regular and Direct Plan separately.
- Scheme count for the total schemes managed by the Fund Managers includes all the close ended debt schemes considered as 1 scheme.
- L&T Ultra Short Term Fund is not accepting subscription under Institutional Plan.

Past performance may or may not be sustained in the future. \* Point to Point (PTP) Returns in INR show the value of ₹10,000/- invested ^Standard Benchmark

Note: As per the SEBI standards for performance reporting, the since inception return is calculated on NAV of ₹10/- invested at inception. CAGR is compounded annualised. Date of inception is deemed to be date of allotment.

a. Mr. Shriram Ramanathan manages 14 Schemes, Mr. Jalpan Shah manages 17 Schemes & Mr. Praveen Ayathan manages 5 Schemes.

b. Performance data is as on 31st March 2021.

c. Different plans shall have a different expense structure.

d. The performance details have been provided for Regular and Direct Plan separately.

e. Scheme count for the total schemes managed by the Fund Managers includes all the close ended debt schemes considered as 1 scheme.

Common to all Schemes: Performance of the schemes (wherever provided) are calculated basis CAGR for the past 1 year, 3 years, 5 years and for period less than 1 year, returns are calculated on simple annualized basis. In case, the start/end date of the concerned period is a non - business day (NBD), the NAV of the previous date is considered for computation of returns.

# HOW FAR WOULD YOU GO TO FULFIL YOUR PASSION?

THIS FAR?

THIS FAR?

THIS FAR?

THIS FAR?

## Plan ahead with SIP and go further on your favourite activity.

We all have our own passion, whether it is to scale the tallest peak or drive across many countries. But the one thing that could take you there is a good plan. Start a Systematic Investment Plan (SIP) and invest monthly to help you reach your goal. Each small installment adds up over time and with the power of compounding could grow to a substantial amount. So rather than attempting basecamp, you could set your sights on the tallest peaks!
