				Management Company- Dealer/ Research-Fixed Income	June 2003
--	--	--	--	---	-----------

III. The following shall be added under “V. FEES AND EXPENSES”

Illustration – Impact of expense ratio on the returns of the Scheme:

A mutual fund scheme’s return is determined by the returns earned from the portfolio of underlying securities that the scheme has invested in, adjusted for scheme expenses. For example, if the return to investor is 15.00% and the scheme’s total expense ratio is 2.00%, the total return earned from the underlying portfolio of securities would be approximately 17.00%. The published NAVs of the mutual fund schemes are net of scheme expenses and hence they reflect the return to the investors, provided investment is not subject to exit load.

The above mentioned change shall override the conflicting provisions, if any, and shall form an integral part of the SID of the Scheme.

All the other provisions of the SID except as specifically modified herein above remain unchanged.

For L&T Investment Management Limited
(Investment Manager to L&T Mutual Fund)
