Risk Profile of the Schemes	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors before investment.</p> <p>As per SEBI circular no. SEBI/IMD/CIR No.10/22701/03 dated December 12, 2003, the Scheme/plan (including the plans thereunder) should have a minimum of 20 Unit Holders and no single Unit Holder should account for more than 25% of the corpus of the Scheme/plan. The aforesaid conditions should be met in each calendar quarter on an average basis. In case of non-fulfilment with the first condition i.e. minimum of 20 investors in the scheme/plan, for each calendar quarter as specified by SEBI, the Scheme/plan shall be wound up by following the guidelines prescribed by SEBI and Unit Holders' investment in such scheme/plan would be redeemed at the Applicable NAV. SEBI has further prescribed that if any investor breaches the 25% limit over a quarter, a rebalancing period of one month will be allowed to the investor and thereafter the investor who is in breach of the limit shall be given 15 days notice to redeem his exposure over the 25% limit. In the event of failure on part of the said investor to redeem the excess exposure, the excess holding will be automatically redeemed by the Fund following the guidelines prescribed by SEBI.</p> <p>Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.</p> <p>Investments in equity and equity related securities involve a degree of risks and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.</p> <p>Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options.</p> <p>Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's liability to meet the principal payments.</p> <p>Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments. The AMC endeavours to manage such risk by the use of inhouse credit analysis. The NAV of the Scheme's Units, to the extent that the Scheme is invested in money market instruments, will be affected by the changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline. The NAV will also be affected by Risks associated with investments made in derivatives. The NAV of the Scheme will also be affected by Risk Factors associated with scrip lending and investments in Foreign Securities.</p> <p>In addition to the factors that affect the values of securities, the NAV of Units of the Scheme will fluctuate with the movement in the broader fixed income, money market and derivatives market and may be influenced by factors influencing such markets in general including but not limited to economic conditions, changes in interest rates, price and volume volatility in the fixed income markets, changes in taxation, currency exchange rates, foreign investments, political, economic or other developments and closure of the stock exchanges. Further the investments made by the Scheme will also be affected by interest rate/price risk, credit risk or default risk, sovereign risk, liquidity risk, re-investment risk, settlement risk, risk associated with investment in derivatives and foreign securities.</p> <p><b>Risks Factors associated with transaction in Units through stock exchange(s)</b></p> <p>In respect of transaction in Units of the Scheme through BSE and/or NSE and/or ICEX, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/or NSE and/or ICEX and their respective clearing corporations on which the Fund has no control.</p> <p><b>Additional Scheme Specific Risk Factors</b></p> <p>The Scheme proposes to invest in equity and equity related instruments by identifying and exploiting price discrepancies in cash and derivative segments of the market. These investments by nature are volatile as the prices of the underlying securities are affected by various factors such as liquidity, time to settlement date, news flow, spreads between cash and derivatives market at different points of time, trading volumes, etc. There is no guarantee that the Fund Manager will be able to spot investment opportunities or correctly exploit price discrepancies in the different segments of the market. The Scheme is also expected to have a high portfolio churn, especially in a volatile market. There is an execution risk while implementing arbitrage strategies across various segments of the market, which may result in missed investment opportunities, or may also result in losses. In case of a large outflow from the Scheme, the Scheme may need to reverse the spot-futures transaction before the settlement of the futures trade. While reversing the spot-futures transaction on the Futures and Options settlement day on the exchange, there could be a risk of volume-weighted-average-price of the market being different from the price at which the actual reversal is processed resulting in basis risk.</p>																								

	<p><b>Risk associated with covered call option strategy:</b></p> <p>Volatility risk: Volatility risk arises when market more volatile than the Fund Manager's estimation. The investment manager holds view of range bound market and the market volatility breaches these limits, thereby increasing risk to the portfolio. This risk is mitigated as we have covered with the stocks we hold.</p> <p>Opportunity loss: Selling call option means investment manager are obligated to deliver the stock at predetermined price. In case when the stock price move above the predetermine price, the upside opportunity is lost on the stock, because we have sold call option. Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strategy, the profits from call option writing is capped at the option premium, however the downside depends upon the increase in value of the underlying equity shares.</p>																																				
<p><b>Investment Strategy</b></p>	<p>The fund manager will decide asset allocation between equity and debt depending on prevailing market and economic conditions. Among the metrics considered for deciding the debt-equity mix at any point of time will be the interest rate cycle, equity valuations (P/E, P/BV, Dividend Yield, Earnings yield, market cap to GDP ratio etc), medium to long term outlook of the asset class, etc.</p> <p>The objective of the equity strategy will be to build a portfolio of companies diversified across major industries, economic sectors and market capitalization that offer an acceptable risk reward balance. Investment in debt securities will be guided by credit quality, liquidity, interest rates and their outlook. The Scheme also proposes to take long term call on stocks which, in the opinion of the Fund Manager, could offer better return over a long period.</p> <p><b>Investment strategy equity portion (hedged and unhedged) of the portfolio:</b></p> <p>The objective of the equity strategy will be to build a portfolio of companies diversified across major industries, economic sectors and market capitalization that offer an acceptable risk reward balance. Investment in debt securities will be guided by credit quality, liquidity, interest rates and their outlook.</p> <p>The Scheme proposes to take long term call on stocks which, in the opinion of the Fund Manager, could offer better return over a long period.</p> <p>The investment strategy on the derivative side includes identifying and investing into arbitrage opportunities between spot/cash and futures prices of individual stocks. The Scheme will deploy "Cash and Carry Arbitrage" strategy wherein the Fund Manager will evaluate the difference between price of an individual stock in the futures market and in the spot/cash market. If the price of a stock in the futures market is higher than in the spot/ cash market, after considering the associated costs and taxes, the Scheme may buy the stock in the spot/cash market and sell the same in equal quantity in the futures market simultaneously. Similarly, the Scheme may at a later date, unwind the trade by selling cash position and buying in the futures markets. The Fund Manager after careful analysis may also decide to roll over his position, if the market conditions are favorable.</p> <p><b>Investment strategy for debt and money market portion of the portfolio</b></p> <p>The investments in debt and money market instruments would be aimed at maintaining a balance between safety, liquidity and return on investments. The debt and money market portion of the portfolio shall be actively managed with an endeavor to generate superior risk adjusted returns. The Fund Manager shall formulate a view of the interest rate movement based on various parameters of the Indian economy, as well as developments in global markets. Investment views/decisions inter alia may be taken on the basis of the following parameters:</p> <ol style="list-style-type: none"> <li>i) Returns offered relative to alternative investment opportunities.</li> <li>ii) Liquidity of the security</li> <li>iii) Prevailing interest rate scenario</li> <li>iv) Quality of the security/instrument (including the financial health of the issuer)</li> <li>v) Maturity profile of the instrument</li> <li>vi) Credit Rating for the instrument</li> <li>vii) Any other factors considered relevant in the opinion of the Fund Management team.</li> </ol> <p>Further, the portfolio of the Scheme will be constructed in accordance with the investment restrictions specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.</p>

(iii) Illustration:

**Impact of the total expense ratio on the returns of the Scheme:**

Expense ratio, normally expressed as a percentage of Average Assets under Management, is calculated by dividing the permissible expenses under the Regulations by the average net assets.

To further illustrate the above, for the Scheme under reference, suppose an investor invested Rs. 10,000/- under the Growth Option, the impact of expenses charged will be as under:

Particulars	Regular Plan			Direct Plan		
	Amount (₹)	Units	NAV	NAV (₹)	Units	NAV (₹)
Invested in the NFO (A)	10,000	1000	10.0000	10,000	1000	10.0000
Value of above investment after 1 year from the date of allotment (post all applicable expenses) (B)	10,700	1000	10.7000	10,750	1000	10.7500
Expenses charged during the year (other than Distribution Expenses) (C)	50			50		
Distribution Expenses charged during the year (D)	50			0		
Value of above investment after 1 year from the date of allotment (after adding back all expenses charged) (E) [E= B+C+D]	10,800	1000	10.8000	10,800	1000	10.8000
Returns (%) (post all applicable expenses) (F) [F= (B-A)/A]			7.00%			7.50%
Returns (%) (without considering any expenses) (G) [G= (E-A)/A]			8.00%			8.00%

Kindly note the following:

- The purpose of the above illustration is to purely explain the impact of expense ratio charged to the Scheme and should not be construed as indicative returns of the Scheme.
- Calculations are based on assumed NAVs, and actual returns on your investment may be more or less.
- It is assumed that the expenses charged are evenly distributed throughout the year.
- The expenses of the Direct Plan under the Scheme will be lower to the extent of the above mentioned distribution expenses/commission.

Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to consult his or her own financial advisor.

  - Market failures, exchange closures - when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies.
  - Operational issues - when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out). Such cases can only be considered if they are reasonably unpredictable and occur in spite of appropriate diligence of third parties, adequate and effective disaster recovery procedures and systems.

	<p>b) Restriction on redemption may be imposed for a specified period of time not exceeding 10 working days in any 90 days period.</p> <p>c) Any imposition of restriction would require specific approval of Board of AMC and Trustees.</p> <p>d) When restriction on redemption is imposed, the following procedure shall be applied:</p> <ol style="list-style-type: none"> <li>i.
