Product Labelling	For product labelling please refer to the cover page
Type of Scheme	An open ended dynamic equity scheme investing across large cap, mid cap, small cap stocks
Investment Objective	To generate long-term capital growth from a diversified portfolio of predominantly equity and equity-related securities. There is no assurance that the objective of the Scheme will be realised and the Scheme does not assure or guarantee any returns.

Asset Allocation Pattern

Toward of Instruments	Indicative Allocation	Diek Drefile	
Types of Instruments	Maximum	Minimum	Risk Profile
Equity and Equity related securities	100%	65%	High
Debt & Money market instruments*	35%	0%	Low to Medium
Units Issued by REITs & InvITs	10%	0%	Medium to High

*Investment in Securitized debt if undertaken, would not exceed 35% of the net assets of the Scheme.

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors before investment. As per SEBI circular no. SEBI/IMD/CIR No.10/22701/03 dated December 12, 2003, each scheme/plan (including the plans thereunder) should have a minimum of 20 Unit Holders and no single Unit Holder should account for more than 25% of the corpus of such scheme/plan. The aforesaid conditions should be met in each calendar quarter on an average basis. In case of non-fulfilment with the first condition i.e. minimum of 20 investors in the scheme/plan, for each calendar quarter as specified by SEBI, the scheme/ plan shall be wound up by following the guidelines prescribed by SEBI and Unit Holders' investment in such scheme/plan would be redeemed at the Applicable NAV. SEBI has further prescribed that if any investor breaches the 25% limit over a quarter, a rebalancing period of one month will be allowed to the investor and thereafter the investor who is in breach of the limit shall be given 15 days notice to redeem his exposure over the 25% limit. In the event of failure on part of the said investor to redeem the excess exposure, the excess holding will be automatically redeemed by the Fund following the guidelines prescribed by SEBI.

Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.

Investments in equity and equity related securities involve a degree of risks and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options.

With effect from July 1, 2022, for the deviation from the asset allocation mentioned above, the portfolio of the scheme shall be rebalanced within the timelines mentioned in SEBI Circular no. SEBI/HO/IMD/IMD-II DOF3/P/CIR/2022/39 dated March 30, 2022 or any circulars issued by SEBI from time to time in this regard.

Risk Profile of the Schemes

Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's liability to meet the principal payments.

Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments. The AMC endeavours to manage such risk by the use of inhouse credit analysis. The NAV of the Scheme's Units, to the extent that the Scheme is invested in money market instruments, will be affected by the changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline. The NAV will also be affected by Risks associated with investments made in derivatives. The NAV of the Scheme will also be affected by Risk Factors associated with scrip lending and investments in Foreign Securities.

In addition to the factors that affect the values of securities, the NAV of Units of the Scheme will fluctuate with the movement in the broader fixed income, money market and derivatives market and may be influenced by factors influencing such markets in general including but not limited to economic conditions, changes in interest rates, price and volume volatility in the fixed income markets, changes in taxation, currency exchange rates, foreign investments, political, economic or other developments and closure of the stock exchanges. Further the investments made by the Scheme will also be affected by interest rate/price risk, credit risk or default risk, sovereign risk, liquidity risk, re-investment risk, settlement risk, risk associated with investment in derivatives, foreign securities, covered call strategy, securitised debt, repo transactions in corporate bonds and REITs and InvITs.

Risks Factors associated with transaction in units through stock exchange(s)

In respect of transaction in Units of the Scheme through BSE and/or NSE and/or ICEX, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/or NSE and/or ICEX and their respective clearing corporations on which the Fund has no control.

Risk Factors of covered call option strategy

- Volatility risk: Volatility risk arises when market more volatile than the Fund Manager's estimation. The investment manager
 holds view of range bound market and the market volatility breaches these limits, thereby increasing risk to the portfolio.
 This risk is mitigated as we have covered with the stocks we hold.
- Opportunity loss: Selling call option means investment manager are obligated to deliver the stock at predetermined price. In
 case when the stock price move above the predetermine price the upside opportunity is lost on the stock, because we have
 sold call option. Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such
 investment strategy, the profits from call option writing is capped at the option premium, however the downside depends
 upon the increase in value of the underlying equity shares.

Risks associated with REITs and InvITs

- Market Risk: REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to the market conditions and factors impacting the underlying assets. AMC/Fund Manager's will do the necessary due diligence but actual market movements may be at variance with the anticipated trends.
- Liquidity Risk: As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be long in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk. As these products are new to the market they are likely to be exposed to liquidity risk.
- Reinvestment Risk: Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by
 the Trusts in form of buyback of units or dividend pay-outs, interest payments etc. Depending upon the market conditions,
 interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. As a result,
 the proceeds may get invested at a lower rate.
- Credit Risk: REITs & InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.
- Regulatory/Legal Risk: REITs and InvITs being new asset classes, regulatory guidelines may be evolving in nature which
 may impact the investments in REITs and InvITs.

Investment Strategy

The investment approach is bottom-up stock picking. The Scheme seeks to add the best opportunities that the market presents, without any sector/cap bias.

The key features of the Mutual Fund's investment strategy include:

- Bottom-up stock picking: The Scheme focuses on bottom-up stock picking (i.e. focusing solely on prospects of individual stocks)
 as opposed to a top-down approach (i.e. predicting macro-economic and political trends and taking investment decisions based
 on them).
- · No cap bias: It will seek to identify the best stocks at a point in time, regardless of any market cap bias.

Investments in equity and equity related securities and debt securities carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.

Further, the portfolio of the Scheme will be constructed in accordance with the investment restrictions specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

For portfolio turnover policy, please refer paragraph "Portfolio Turnover".
