II. Introduction

(A) Risk Factors

(i) Standard Risk Factors

- Investments in Mutual Fund Units, like securities investments, involve investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price/value/interest rates of the securities in which the Scheme invests fluctuate, the value of your investment in the Scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee/indicate the future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsor is not responsible or liable for any loss resulting from the operations of the Scheme beyond the initial contribution of ₹1,00,000 (Rupees One Lakh) made by it towards setting up the Mutual Fund.
- The Scheme is not a guaranteed or assured return scheme.

(ii) Scheme Specific Risk Factors

(a) Risks associated with investing in equities

- Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolios would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.
- Investments in equity and equity related securities involve a degree of risks and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.
- The liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options.

(b) Risks associated with investing in debt securities

- Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's liability to meet the principal payments. Additionally, money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- Money market instruments are also subject to price volatility due to factors such as changes in interest rates (when interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline), general levels of market liquidity, market perception of credit worthiness of the issuer of such instruments and risks associated with settlement of transactions and reinvestment of intermediate cash flows. The NAV of the Scheme's Units, to the extent that the Scheme is invested in money market instruments, will consequently be affected by the aforesaid factors. The AMC endeavours to manage such risk by the use of in-house credit analysis.
- The performance of Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems.
- Investments in different types of securities are subject to different levels and kinds of risk. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern. E.g., investments in corporate bonds carry a higher level of risk than investments in Government securities. Further, even among corporate bonds, bonds which have a higher rating are comparatively less risky than bonds which have a lower rating.
- **Interest rate/price risk:** As with all debt securities, changes in interest rates may affect the NAV of the Scheme since the price of a fixed income instrument falls when the interest rates move up and vice versa. The effect is more prominent when the duration of the instrument is higher. Hence the NAV movement of the Scheme consisting of predominantly fixed income securities is likely to have inverse correlation with the movement in interest rates. In case of a floating rate instrument, this risk is lower as a result of periodic reset of the coupon. During the life of floating rate security or a swap the underlying benchmark index may become less active and may not capture the actual movement in the interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.
- Government securities do carry price risk depending upon the general level of interest rates prevailing from time to time. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price of the Government securities (existing and new) is influenced only by movements in interest rates in financial systems.
- **Spread risk:** Though the sovereign yield curve might remain constant, investments in corporate bonds are exposed to the risk of spread widening between corporate bonds and gilts. Typically, if this spread widens, the prices of the corporate bonds tend to fall and so could the NAV of the Schemes. Similar risk prevails for the investments in the floating rate bonds, where the benchmark might remain unchanged, but the spread over the benchmark might vary. In such an event, if the spread widens, the price and the NAV of the Schemes could fall.
- **Sovereign:** The Central Government of a country is the issuer of the local currency in that country. The Government raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since payment of interest and principal amount has a sovereign status implying no default, such securities are known as securities with sovereign credit. For domestic borrowers and lenders, the credit risk on such Sovereign credit is near zero and is popularly known as "riskfree security" or "Zero Risk security". Thus Zero-Risk is the lowest risk, even lower than a security with "AAA" rating and hence commands a yield, which is lower than a yield on "AAA" security.

- **Credit risk or default risk:** This refers to inability of the issuer of the debt security to make timely payments of principal and/ or interest due. In case of investments in government securities, the credit risk is minimal. It is reflected in the credit rating of the issuer. Hence if the credit rating of the issuer is downgraded, the price of the security will suffer a loss and the NAV will fall. Credit risk factors pertaining to lower rated securities also apply to lower rated zero coupon and deferred interest kind bonds. Lower rated zero coupon and deferred interest kind bonds carry an additional risk in that, unlike bonds that pay interest through the period of maturity, the Scheme by investing in these bonds will realize no cash till the cash payment date and if the issuer defaults, the Scheme may obtain no return on its investment.
 - **Liquidity risk:** This represents the possibility that the realised price from selling the security might be lesser than the valuation price as a result of illiquid market. If a large outflow from the Scheme is funded by selling some of the illiquid securities, the NAV could fall even if there is no change in interest rates. Illiquid securities are typically quoted at a higher yield than the liquid securities and have higher bid offer spreads. Investment in illiquid securities results in higher current yield for the portfolio. Liquidity risk is a characteristic of the Indian fixed income market today. In addition, money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
 - The corporate debt market is relatively illiquid vis-a-vis the government securities market. Even though the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.
 - **Reinvestment risk:** This is associated with the fact that the intermediate cash flows (coupons, prepayment of principal in case of securitised transactions or principal payment in case a security gets called or repurchased) may not be reinvested at the same yield as assumed in the original calculations.
 - **Settlement risk:** Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme, to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the portfolio of the Scheme.
 - **Market risk:** Lower rated or unrated securities are more likely to react to developments affecting the market and the credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated or unrated securities also tend to be more sensitive to economic conditions than higher rated securities.
 - In addition to the factors that affect the values of securities, the NAV of Units of the Scheme will fluctuate with the movement in the broader fixed income market, money market and derivatives market and may be influenced by factors influencing such markets in general including but not limited to economic conditions, changes in interest rates, price and volume volatility in the bond and stock markets, changes in taxation, currency exchange rates, foreign investments, political, economic or other developments and closure of the stock exchanges.
 - Investments in different types of securities are subject to different levels and kinds of risk. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern. E.g. investments in corporate bonds carry a higher level of risk than investments in Government securities. Further, even among corporate bonds, bonds which have a higher rating are comparatively less risky than bonds which have a lower rating.
 - Engaging in scrip lending is subject to risks related to fluctuations in the collateral value/settlement/liquidity/counter party.
 - Engaging in short sale of securities is subject to risks related to fluctuations in market price, and settlement/liquidity risks.
- (c) Risks associated with investing in foreign securities/overseas investments/offshore securities**
- Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.
 - It is the AMC's belief that investment in foreign securities offers new investment and portfolio diversification opportunities into multi-market and multi-currency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by the AMC provided they are considered appropriate in terms of the overall investment objectives of the Scheme. Since the Scheme may invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme.
 - To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

(d) Risks associated with short selling and securities/scrip lending

The Mutual Fund may lend and borrow securities in accordance with the framework relating to short selling and securities lending and borrowing specified by the Board. The risk associated with upward movement in market price of security sold short may result in loss. The losses on short position may be unlimited as there is no upper limit on the rise in price of a security. Subject to the Regulations and the applicable guidelines, the Scheme may, subject to compliance with SEBI Regulations, engage in securities lending.

Securities lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation. The securities lent will be returned by the borrower on expiry of the stipulated period. It may be noted that the securities lending activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends or due to it being comprised of tainted/forged securities, resulting in inadequate value of collateral until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can also be temporary illiquidity of the securities that are lent out and the Scheme may not be able to sell such lent out securities. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the

approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

(e) Trading through mutual fund trading platforms of BSE and/or NSE

In respect of transaction in Units of the Scheme through BSE and/or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/or NSE and their respective clearing corporations on which the Mutual Fund has no control.

(f) Risk Factors of covered call option strategy

Volatility risk: Volatility risk arises when market more volatile than the Fund Manager's estimation. The investment manager holds view of range bound market and the market volatility breaches these limits, thereby increasing risk to the portfolio. This risk is mitigated as we have covered with the stocks we hold.

Opportunity loss: Selling call option means investment manager are obligated to deliver the stock at predetermined price. In case when the stock price move above the predetermine price the upside opportunity is lost on the stock, because we have sold call option. Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strategy, the profits from call option writing is capped at the option premium, however the downside depends upon the increase in value of the underlying equity shares.

(g) Risks associated with investing in securitised debt

- The underlying assets in securitised debt may assume different forms and the general types of receivables include auto finance, credit cards, home loans or any such receipts. Credit risks relating to such receivables depend upon various factors, including macroeconomic factors of these industries and economies. Further, specific factors like the nature and adequacy of property mortgaged against these borrowings, the nature of loan agreement/mortgage deed in case of home loans, adequacy of documentation in case of auto finance and home loans, capacity of a borrower to meet his obligations on borrowings in case of credit cards and intentions of the borrower also influence the risks relating to asset borrowings underlying securitised debt. Additionally, the nature of the asset borrowings underlying the securitised debt also influences the underlying risk, for instance while residential mortgages tend to have lower default rates, repossession and recovery is easier in case of commercial vehicles. Credit rating agencies take into account a series of such factors and follow an elaborate system involving stipulation of margins, over-collateralisation and guarantees to provide a rating for securitised debt.
- In case of securitised debt, changes in market interest rates and pre-payments may not change the absolute amount of receivables for the investors but may have an impact on the reinvestment of the periodic cash flows that an investor receives on securitised papers.
- **Tenor risk:** While building the planned amortization schedule for a PTC, there can be a clause stating a minimum percentage of receivable by the issue to stick to the initial cash flows. If the receivables are less than the minimum stated receivables then the tenor of the PTC can get elongated or vice versa.
- **Risk due to prepayment:** Asset securitization is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. In the event of pre-payment of the underlying debt, investors may be exposed to changes in tenor and yield.
- **Liquidity Risk:** Presently, despite recent legal developments permitting the listing of securitised debt instruments, the secondary market for securitised debt in India is not very liquid. Even if a more liquid market develops in the future, secondary transactions in such instruments may be at a discount to initial issue price due to changes in the interest rate structure.
- **Limited Recourse and Credit Risk:** Certificates issued on investment in securitised debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan can adversely affect the pay outs to the investors (i.e. the Schemes) and thereby, adversely affect the NAV of the Schemes. While it is possible to repossess and sell the underlying asset, various factors can delay or prevent repossession and the price obtained on sale of such assets may be low.
- **Bankruptcy Risk:** If the originator of securitised debt instruments in which the Schemes invest is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', then the Schemes could experience losses or delays in the payments due. Normally, care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'.
- **Risk of Co-mingling:** Servicers in a securitization transaction normally deposit all payments received from the obligors into a collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account. In this interim period, collections from the loan agreements by the servicer may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to investors, investors in the schemes may be exposed to a potential loss.

(h) Risks associated with investing in derivatives

- The Scheme may invest in derivative products in accordance with and to the extent permitted under the Regulations and by SEBI. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself.
- Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.
- The derivatives market in India is nascent and does not have the volumes that may be seen in other developed markets, which may result in volatility to the values.
- Investment in derivatives also requires the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. Even a

small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.

- The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.
- The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the s-scheme may face a liquidity issue.
- The options buyer's risk is limited to the premium paid, while the risk of an options writer is unlimited. However, the gains of an options writer are limited to the premiums earned. Since in case of the scheme all option positions will have underlying assets, all losses due to price – movement beyond the strike price will actually be an opportunity loss.
- The exchange may impose restrictions on exercise of options and may also restrict the exercise of options at certain times in specified circumstances and this could impact the value of the portfolio.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.
- The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.
- The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.
- There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract.
- Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor.
- Execution of investment strategies depends upon the ability of the fund manager(s) to identify such opportunities which may not be available at all times. Identification and execution of the strategies to be pursued by the fund manager(s) involve uncertainty and decision of fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies.
- Interest Rate Swaps (IRS) are highly specialized instruments that require investment technique and risk analysis different from those associated with equity shares and other traditional securities. The use of an Interest Rate Swap (IRS) requires not only an understanding of the referenced asset, reference rate or index but also of the swap itself, without the benefit of observing the performance of the swap under all possible market conditions. Swap agreements are also subject to liquidity risk, which exists when a particular swap is difficult to purchase or sell. Swap agreements may be subject to pricing risk, which exists when a particular swap becomes extraordinarily expensive (or cheap) relative to historical prices or the prices of corresponding cash market instruments. IRS agreements are also subject to counterparty risk on account of insolvency or bankruptcy or failure of the counterparty to make required payments or otherwise comply with the terms of the agreement. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

(i) Risks factors associated with investments in repo transactions in corporate bonds

- In repo transactions, also known as a repo or sale repurchase agreement, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the following risks:
- Counterparty Risk: This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price on the contracted date. The Investment Manager will endeavour to manage counterparty risk by dealing only with counterparties, having strong credit profiles, approved by our credit risk analysis team. The exposure to each counterparty will be within the overall approved credit limits. Also, the counterparty risk is to an extent mitigated by taking collateral equivalent in value to the transaction after knocking off a minimum haircut on the intrinsic value of the collateral. In the event of default by the repo counterparty, the scheme shall have recourse to the corporate debt securities.
- Collateral Risk: Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions with collateral bearing a minimum rating as prescribed by the regulators (currently AA or equivalent and above rated money market and corporate debt securities). Any rating downgrade will tantamount to either an early termination of the repo agreement or a call for fresh margin to meet the minimum haircut requirement. In addition, the Investment manager may apply a higher haircut on the underlying security than mentioned above to adjust for the illiquidity and interest rate risk on the underlying instrument. The adequacy of the collateral will be monitored on a daily basis by considering the daily market value & applying the prescribed haircut. In the event of shortfall in the collateral, the counterparty shall be asked to replenish the same. If the counterparty is not able to top-up either in form of cash / collateral, it shall tantamount to early termination of the repo agreement.
- Settlement Risk: Corporate Bond Repo shall be settled between two counterparties in the OTC segment unlike in the case of Government securities repo transactions where CCIL stands as central counterparty on all transactions which neutralizes the settlement risk. However, the settlement risk pertaining to CDRs shall be mitigated through Delivery versus Payment (DvP) mechanism which is followed by all clearing members.

(j) Risks associated with REITs and InvITs

- **Market Risk:** REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to the market conditions and factors impacting the underlying assets. AMC/Fund Manager's will do the necessary due diligence but actual market movements may be at variance with the anticipated trends.
- **Liquidity Risk:** As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the

investments in the scheme may be long in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk. As these products are new to the market they are likely to be exposed to liquidity risk.

- **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, interest payments etc. Depending upon the market conditions, interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. As a result, the proceeds may get invested at a lower rate.
- **Credit Risk:** REITs & InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.
- **Regulatory/Legal Risk:** REITs and InvITs being new asset classes, regulatory guidelines may be evolving in nature which may impact the investments in REITs and InvITs.

(k) Other Scheme Specific Risk factors:

- **Performance Risk:** The Scheme's performance can decrease or increase, depending on a variety of factors, which may affect the values and income generated by the Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in government and Reserve Bank of India policy, taxation, political, economic or other developments and closure of the stock exchanges. Investors should understand that the investment pattern indicated for the Scheme, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there can be no assurance that the Scheme's investment objective will be attained nor will the Scheme be in a position to maintain the model percentage of investment pattern/composition particularly under exceptional circumstances so that the interest of the unit holders are protected. The AMC will endeavour to invest in highly researched growth companies, however the growth associated with equities may be generally high as also the erosion in the value of the investments/portfolio in the case of the capital markets passing through a bearish phase is a distinct possibility. A change in the prevailing rates of interest is likely to affect the value of the Scheme's investments and thus the value of the Scheme's Units. The value of money market instruments held by the Scheme generally will vary inversely with the changes in prevailing interest rates.
- **Changes in Government Regulations:** The businesses in which companies operate are exposed to a range of government regulations, related to tax benefits, liberalization, provision of infrastructure and the like. Changes in such regulations may affect the prospects of companies.
- **Duration Risk:** Duration is a risk measure used to measure the bond/security price changes to potential changes in interest rates. Duration of portfolio x the expected changes in rates = the expected value change in the portfolio. Duration is more scientific measure of risk compared to average maturity of the portfolio. The higher the duration of the portfolio, the greater the changes in value (i.e. higher risk) to movement in interest rates. Modified duration is the duration of a bond/security given its current yield to maturity, put/call feature and an expected level of future interest rates.
- **Tax exemption risks:** In the event that the investible funds of more than 65% of the total proceeds of the Scheme are not invested in equity shares of domestic companies, the tax exemptions on income distribution will not be available to the Scheme. This is however subject to change as per Income Tax laws of India.
- **Risk Mitigation Factors:** Investments in equity and equity related securities and debt securities carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging. Further, the portfolio of the Scheme will be constructed in accordance with the investment restrictions specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

(B) Requirement of minimum investors in the Scheme

As per SEBI circular no. SEBI/IMD/CIR No. 10/22701/03 dated December 12, 2003, the scheme (including the plans thereunder) should have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the scheme/plan. The aforesaid conditions should be complied with in each calendar quarter on an average basis. In case of non-fulfilment with the first condition i.e. minimum of 20 investors in the Scheme, on an ongoing basis for each calendar quarter as specified by SEBI, the Scheme shall be wound up by following the guidelines prescribed by SEBI. SEBI has further prescribed that if any investor breaches the 25% limit over a quarter, a rebalancing period of one month will be allowed and thereafter the investor who is in breach of the limit shall be given 15 days notice to redeem his exposure over the 25% limit. In the event of failure on the part of the said investor to redeem the excess exposure, the excess holding will be automatically redeemed by the Mutual Fund following the guidelines prescribed by SEBI from time to time in this regard.

(C) Special Considerations

- **Restrictions on redemption of Mutual Funds**

The following requirement shall be observed before imposing restriction on redemptions:

 - a) Restriction may be imposed when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets such as:
 - Liquidity issues - when market at large becomes illiquid affecting almost all securities rather than any issuer specific security.
 - Market failures, exchange closures - when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies.
 - Operational issues - when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out). Such cases can only be considered if they are reasonably unpredictable and occur in spite of appropriate diligence of third parties, adequate and effective disaster recovery procedures and systems.
 - b) Restriction on redemption may be imposed for a specified period of time not exceeding 10 working days in any 90 days period.

(D) Foreign Account Tax Compliance Act (FATCA) / Common Reporting Standard (CRS) (“Reporting Guidelines”)

- **FATCA:**

Foreign Account Tax Compliance Act (“FATCA”) is a United States of America’s (“USA”) law. The main objective of FATCA is to target tax non-compliance by USA tax payers having foreign accounts as the taxation in USA is on global income of USA tax payers.

FATCA’s focus therefore is reporting by US tax payers of their foreign financial accounts and offshore accounts and foreign financial institutions of all other countries to USA’s Internal Revenue Services (“IRS”) either directly or through respective local authority, about financial accounts held by USA tax payers or foreign entities in which USA tax payers hold substantial ownership interest.

Indian government is willing to co-operate in this initiative and has signed an agreement with USA.

The impact of this agreement on Indian financial institutions as defined in the agreement will be that such financial institutions (including asset management companies for respective mutual funds) will have to report certain information (like account balance, details of

transactions and such other things that may be required from time to time) of specified US persons as defined in the agreement, to IRS through the specified Indian authority, on a periodic basis.

- **CRS**

On similar lines as FATCA, the Organization of Economic Development (OECD), along with the G20 countries, of which India is a member, has released "Standard for Automatic Exchange of Financial Account Information in Tax Matters", in order to combat the problem of offshore tax evasion and avoidance and stashing of unaccounted money abroad, requiring cooperation amongst tax authorities. The G20 and OECD countries have together developed a Common Reporting Standard (CRS) on Automatic Exchange of Information (AEOI).

On June 3, 2015, India has joined the Multilateral Competent Authority Agreement (MCAA) on AEOI. The CRS on AEOI requires the financial institutions of the "source" jurisdiction to collect and report information to their tax authorities about account holders "resident" in other countries, such information having to be transmitted "automatically" annually. The information to be exchanged relates not only to individuals, but also to shell companies and trusts having beneficial ownership or interest in the "resident" countries.

In order to comply with the Reporting Guidelines and related rules applicable to Indian financial institutions, L&T Investment Management Limited ("LTIM") may seek certain information and/ or documents from all its investors.

If any investor does not provide the required information or document, LTIM/ the Fund may not be able to provide the information sought under the Reporting Guidelines. In such an event, LTIM and / or the Fund may be considered in non-compliance with the Reporting Guidelines.

The applications that are incomplete with respect to providing of any information pertaining to the Reporting Guidelines, will be liable to be rejected. Any change in the information already provided to LTIM / Fund, should be informed to LTIM/Fund within 30 days of the change.

In case any of the information/document provided is found to be false or untrue or misleading or misrepresenting, the investor shall be held liable for it.

The investor authorizes updation of the records (relating to the Reporting Guidelines) basis the information / documents received by LTIM/Fund/Registrar and Transfer Agent from other SEBI registered intermediaries. Further, the investor authorizes LTIM/Fund/Registrar and Transfer Agent, to share the information provided by the investor with other SEBI registered intermediaries to facilitate single submission / updation.

Further, as may be required by domestic tax authorities, the investor authorizes LTIM/ Fund/Registrar and Transfer Agent to provide relevant information to upstream payors to enable withholding to occur and pay out any sums from the investor's account or close or suspend investor's account(s) under intimation to the investor.

The penalty of non-compliance with FATCA provisions on the Scheme could be 30% withholding tax on US Sourced income payable to the Scheme (like dividend income and amount of proceeds to be received on sale of any US investment made by the Scheme). This could impact investors, as the amount available for investment by the Scheme will be less to that extent. This withholding being penalty, the amount is not recoverable.

We believe that LTIM and the Fund are in compliance with requirements under the Reporting Guidelines; however since the requirements under the Reporting Guidelines are complex, compliance at all times may not be assured.

LTIM, Trustee Company, the Fund or the Sponsor do not solicit or market any Scheme of the Fund outside of India. Investors who are eligible to invest in the Scheme as per any of the regulations, therefore, may invest after considering tax implications or other regulatory implications of investing in the Scheme of the Fund in their country of residency, tax residency or citizenship other than of India.

(E) Suspicious Transaction Reporting:

If after due diligence, the AMC believes that the transaction is suspicious in nature as regards money laundering, the AMC shall report any suspicious transactions to competent authorities under PMLA and rules/guidelines issued thereunder by SEBI and/or RBI, furnish any such information in connection therewith to such authorities and take any other actions as may be required for the purposes of fulfilling its obligations under PMLA without obtaining the prior approval of the investor/Unit Holder/a person making the payment on behalf of the investor.

(F) Permanent Account Number ("PAN"):

As per provisions of SEBI, all investors (resident and non-resident) transacting in the scheme of the Mutual Fund, irrespective of the amount of transaction, are required to provide the PAN supported by a copy of the PAN card to the AMC. In case of investors who do not provide a certified copy of the PAN card, the application for transaction in units of the Scheme will be rejected by the Mutual Fund.

Note: Investors are requested to submit a copy along with the original for verification at the investor service centres of the Mutual Fund/ CAMS, which will be returned across the counter. Alternatively, a distributor empanelled with the Mutual Fund can attest a copy. A true copy bearing a Bank Manager's or a Notary Public's attestation will also be accepted.

This clause does not apply to investors residing in the state of Sikkim, officials of Central Government, State Government and those appointed by the Courts e.g. Official Liquidator, Court Receiver, etc. (under the category of Government) and investors investing upto ₹50,000 (i.e. Micro Investments) per year (rolling 12 months period or in a financial year i.e. April to March).

Investors making Micro Investments shall, in lieu of PAN and KYC requirements, be required to furnish an attested copy (self attested/ attested by the AMFI registered distributor bearing its AMFI Registration Number) of any of the following photo identification documents and proof of address.

- (a) Voter Identity Card; (b) Driving License; (c) Government/Defense identification card; (d) Passport; (e) Photo Ration Card; (f) Photo Debit Card; (g) Employee Identity cards issued by companies registered with Registrar of Companies; (h) Photo identification issued by bank managers of scheduled commercial banks/gazetted officer/elected representatives to the Legislative Assembly/Parliament; (i) Identity card issued to employees of scheduled commercial/state/district co-operative banks; (j) Senior Citizen/Freedom Fighter identity card issued by Government; (k) Cards issued by universities/deemed universities or institutes under statutes like The Institute of Chartered Accountants of India, The Institute of Cost and Works Accountants of India, The Institute of Company Secretaries of India; (l) Permanent Retirement Account Number (PRAN) card issued to new pension system (NPS) subscribers by the central recordkeeping

agency (National Securities Depositories Limited); (m) Any other photo identity card issued by Central Government/State Governments/ municipal authorities/Government organizations like Employees' State Insurance Corporation/Employees Provident Fund Organisation.

It is clarified that where photo identification documents contain the address of the investor, a separate proof of address is not required.

The aforesaid exemption shall be applicable to (i) investments only by individuals (including Non-Resident Indians, but not Persons of Indian Origin), minors and sole proprietary firms; and (ii) joint holders.

Mandatory updation of Permanent Account Number (PAN) & Know Your Customer (KYC) for processing of mutual fund transactions

As per the directives issued by SEBI from time to time, it is mandatory for all unitholders to update the Permanent Account Number (PAN) and complete KYC requirements for all unit holders

- In respect of folios where PAN is not updated/available (non-PAN exempt folios), it is mandatory for all the unit holders in the folio including guardian (in case of a minor) to update PAN
- In respect of non-PAN exempt folios, it is mandatory to complete the KYC requirements for all unit holders in the folio including guardian (in case of a minor).
- In case of PAN Exempt KYC (PEKRN) folios, it is mandatory for all the unit holders in the folio including guardian (in case of a minor) to update PEKRN.

In view of the above, financial transactions (including redemptions, switches and all types of systematic plans) and non-financial requests will not be processed if the unit holders have not completed the above requirements.

Investors who wish to update their PAN can visit our website www.Intmf.com for online updation or submit a copy of self-attested PAN at any of the Investor Service Centres of L&T Investment Management Limited ('AMC') or the Registrar and Transfer Agent ('RTA') with a request letter quoting their folio.

For completing the KYC requirements, Unit holders are advised to use the applicable KYC Form and submit the same at the point of acceptance.

Further in case of non-PAN exempt folios, upon updating of PAN details with the KRA (KRA-KYC)/ CERSAI (CKYC), the unit holders are requested to intimate AMC/RTA their PAN information along with the folio details for updating in AMCs records.

(G) Investor Protection:

The Scheme is designed to support longer-term investment and active trading is discouraged. Short term or excessive trading into and out of the Scheme may affect its performance by disrupting portfolio management strategies and by increasing expenses. The Mutual Fund and the distributors may refuse to accept applications for Purchase, especially where transactions are deemed disruptive, particularly from market timers or investors who, in their opinion, have a pattern of short term or excessive trading or whose trading has been or may be disruptive for the Scheme. If in the opinion of the AMC, a Unit Holder is indulging in short term or excessive trading as above, it shall, under powers delegated by the Trustee, have absolute discretion to reject any application, prevent further transaction by the Unit Holder or redeem the Units held by the Unit Holder at any time prior to the expiry of 30 Business Days from the date of the application.

The investment approach is bottom-up stock picking. The Scheme seeks to add the best opportunities that the market presents, without any sector/cap bias.

The key features of the Mutual Fund's investment strategy include:

- Bottom-up stock picking: The Scheme focuses on bottom-up stock picking (i.e. focusing solely on prospects of individual stocks) as opposed to a top-down approach (i.e. predicting macro-economic and political trends and taking investment decisions based on them).
- No cap bias: It will seek to identify the best stocks at a point in time, regardless of any market cap bias.

Investments in equity and equity related securities and debt securities carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.

Further, the portfolio of the Scheme will be constructed in accordance with the investment restrictions specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

For portfolio turnover policy, please refer paragraph "Portfolio Turnover".

(f) Benchmark

The performance of the Scheme will be benchmarked against the S&P BSE 500 TRI Index.

L&T Flexicap Fund F is a diversified equity fund with no market cap, sector or style bias. S&P BSE 500 TRI Index is a broad-based index and its composition is representative of the Scheme's investment universe. As such, it is a suitable benchmark for comparing the performance of the Scheme.

(F) Segregation of the Portfolio**(a) Creation of Segregated Portfolio:**

Creation of segregated portfolio shall be subject to guidelines specified by SEBI from time to time and includes the following:

- 1) Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:
 - a) Downgrade of a debt or money market instrument to ‘below investment grade’, or
 - b) Subsequent downgrades of the said instruments from ‘below investment grade’, or
 - c) Similar such downgrades of a loan rating
- 2) In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as mentioned above and implemented at the ISIN level.
- 3) Creation of segregated portfolio is optional and is at the discretion of the L&T Investment Management Company Limited (AMC)

In case of unrated debt or money market instruments, actual default of either the interest or principal amount by the issuer that does not have any outstanding rated debt or money market instruments shall be considered for segregation of portfolio.

AMC shall inform AMFI immediately about the actual default by the issuer. Pursuant to dissemination of information by AMFI about actual default by the issuer, AMC may segregate the portfolio of debt or money market instruments of the said issuer.

Process for Creation of Segregated Portfolio:

- 1) On the date of credit event/actual default, AMC should decide on creation of segregated portfolio. Once AMC decides to segregate portfolio, it should:
 - a) seek approval of trustees prior to creation of the segregated portfolio.
 - b) immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. L&T Mutual Fund will also disclose that the segregation shall be subject to Trustee approval. Additionally, the said press release will be prominently disclosed on the website of the AMC.
 - c) ensure that till the time the trustee approval is received, which in no case shall exceed 1 business day from the day of credit event/actual default, the subscription and redemption in the scheme will be suspended for processing with respect to creation of units and payment on redemptions.
- 2) Once Trustee approval is received by the AMC:
 - a) Segregated portfolio will be effective from the day of credit event/actual default.
 - b) AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information will also be submitted to SEBI.
 - c) An e-mail or SMS will be sent to all unit holders of the concerned scheme.
 - d) The NAV of both segregated and main portfolios will be disclosed from the day of the credit event/actual default.
 - e) All existing investors in the scheme as on the day of the credit event/actual default will be allotted equal number of units in the segregated portfolio as held in the main portfolio.
 - f) No redemption and subscription will be allowed in the segregated portfolio. However, upon recovery of any money from segregated portfolio, it will be immediately distributed to the investors in proportion to their holding in the segregated portfolio.

- g) AMC should enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests
- h) Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
- 3) If the trustees do not approve the proposal to segregate portfolio, AMC will issue a press release immediately informing investors of the same.
- 4) In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

Valuation and Processing of Subscription and Redemption Proceeds:

Notwithstanding the decision to segregate the debt and money market instrument, the valuation should take into account the credit event/actual default and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder.

All subscription and redemption requests for which NAV of the day of credit event/actual default or subsequent day is applicable will be processed as under:

- i. Upon trustees' approval to create a segregated portfolio -
 - Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
 - Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
- ii. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

Disclosure

AMC shall make necessary disclosures as mandated by SEBI, in statement of account, monthly / half yearly portfolio statements, Key Information Memorandum (KIM), SID, Scheme Advertisements, Scheme Performance data, AMC Website and at other places as may be specified.

The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.

Monitoring by Trustees

Trustees will monitor the compliance of the SEBI Circular in respect of creation of segregated portfolio and disclosure in this respect shall be made in Half-Yearly Trustee reports filed with SEBI.

In order to avoid mis-use of segregated portfolio, Trustees will review the performance of fund manager(s) in entirety which shall include:

- Investment decisions are taken by the fund manager(s) with adequate due diligence and there is no irregular or unethical conduct.
- Investment has been made in accordance with scheme objective.
- Segregation of portfolio is on account of extraneous uncontrollable event.
- There is adequate documentation with regard to investment decision.
- All risks are transparently highlighted to the investors through scheme related documents.

If the investment decision and/or segregation of portfolio is not in line with the above listed parameters, the Board of Trustees thereafter in consultation with AMC may decide to levy appropriate penalty on fund manager(s) which may even include claw back of performance incentive.

TER for the Segregated Portfolio

- 1) AMC will not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
- 2) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence. In addition to the TER mentioned above, the legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio as mentioned below.
- 3) The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- 4) The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Explanations:

- 1) The term 'segregated portfolio' means a portfolio, comprising of debt or money market instrument affected by a credit event and unrated debt or money market instruments affected by actual default, that has been segregated in a mutual fund scheme.
- 2) The term 'main portfolio' means the scheme portfolio excluding the segregated portfolio.
- 3) The term 'total portfolio' means the scheme portfolio including the securities affected by the credit event/actual default.

Risks associated with segregated portfolio:

1. Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
2. Security comprises of segregated portfolio may not realise any value.

3. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

(G) Portfolio Turnover

Portfolio Turnover is defined as the aggregate value of investment and disinvestment in equity/equity related securities (other than those caused by the Purchases and Redemptions by Unit Holders) as a percentage of the average corpus of the Scheme during a specified period of time. This would also exclude investments/disinvestments in money market instruments.

The fund managers will normally buy stocks which they believe will deliver superior earnings growth over a one-to-two-year period and hence the portfolio turnover is not expected to be very high.

The portfolio turnover ratio as on September 30, 2022 was 0.3190

(H) Scrip Lending by the Mutual Fund:

If permitted by SEBI under extant Regulations/guidelines, the Scheme may also engage in scrip lending. The AMC shall comply with all reporting requirements and the Trustee shall carry out periodic review as required by SEBI guidelines. Scrip lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation. The securities lent will be returned by the borrower on expiry of the stipulated period.

The Investment Manager will apply the following limit, should it desire to engage in scrip lending:

- not more than 20% of the net assets of the Scheme can generally be deployed in scrip lending; and

Various risks associated with scrip lending, such as counter-party risks, liquidity and other market risks, are described in paragraph "Risk associated with short selling and securities/scrip lending".

(I) COVERED CALL OPTION' STRATEGY:

A call option gives the holder (buyer) the right but not the obligation to buy an asset by a certain date for a certain price. Covered calls are an options strategy where a person holds a long position in an asset and writes (sells) call options on that same asset.

Rationale of using Covered Call strategy in Mutual Funds: The covered call strategy can be followed by the Fund Manager in order to hedge risk thereby resulting in better risk adjusted returns of the Scheme. The strategy offers the following benefits:

- Hedge against market risk - Since the fund manager sells a call option on a stock already owned by Scheme, the downside from fall in the stock price would be lower to the extent of the premium earned from the call option.
- Generating additional returns in the form of option premium in a range bound market. Thus, a covered call strategy involves gains for unit holders in case the strategy plays out in the right direction.

Investment Restrictions for Covered Call strategy: Scheme can write Call options under a covered strategy for constituent stocks of NIFTY 50 and BSE SENSEX subject to the following:

- The total notional value (taking into account strike price as well as premium value) of call options written by the Scheme shall not exceed 15% of the total market value of equity shares held in the Scheme.
- The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a particular company held in the Scheme. The unencumbered shares in the Scheme shall mean shares that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrances.
- At all points of time the Mutual Fund scheme shall comply with the provisions at points (a) and (b) above. In case of any passive breach of the requirement at paragraph (a) above, the respective scheme shall have 7 trading days to rebalance the portfolio. During the rebalancing period, no additional call options can be written in the said scheme.
- In case the Scheme needs to sell securities on which a call option is written under a covered call strategy, it must ensure compliance with paragraphs (a) and (b) above while selling the securities.
- In no case, the Scheme shall write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts.
- The premium received shall be within the requirements prescribed in terms of SEBI circular dated August 18, 2010 i.e. the total gross exposure related to option premium paid and received must not exceed 20% of the net assets of the Scheme.
- The exposure on account of the call option written under the covered call strategy shall not be considered as exposure in terms of paragraph 3 of SEBI Circular no. Cir/IMD/DF/11/2010, dated August 18, 2010.
- The call option written shall be marked to market daily and the respective gains or losses factored into the daily NAV of the Scheme(s) until the position is closed or expired.

Illustration for Covered Call Option –

Suppose, a fund buys equity stock of ABC Ltd. For Rs. 1000 and simultaneously sells a call option on the same stock at a strike price of Rs. 1100. The scheme earns a premium of say, Rs. 50. Here, the fund manager does not think that the stock price will exceed Rs. 1100.

Scenario 1: Stock price exceeds Rs. 1100 The call option will get exercised and the fund manager will sell the stock to settle his obligation on the call at Rs. 1100 (earning a return of 10% on the stock purchase price). Also, the scheme has earned a premium of Rs. 50 which reduced the purchase cost of the stock, thus increasing its investment Profits (Rs. 1000 – Rs. 50 = Rs. 950). Net Gain – Rs. 150

Scenario 2: Stock prices stays below Rs. 1100 The call option will not get exercised and will expire worthless. The premium earned on call option will generate alpha for the scheme. Net Gain – Rs. 50.

Investments under the Direct Plan can be made through various modes offered by the Fund for investing directly with the Fund or through registered Investment Advisor {except Stock Exchange Platform(s) and all other platform(s) where investors' applications for subscription of units are routed through distributors}.

Investors subscribing under the Direct Plan will have to indicate "Direct Plan" against the Scheme name in the application form. Investors should also indicate "Direct" in the ARN column of the application form. However, in case distributor code is mentioned in the application form, but "Direct Plan" is indicated against the Scheme name, the distributor code will be ignored and the application will be processed under the Direct Plan. Further, where application is received for the Scheme without distributor code or "Direct" mentioned in the ARN Column, the application will be processed under the Direct Plan.

For investments routed through a distributor (i.e. made with a distributor code), any switch of units to Direct Plan will be subject to applicable Exit Load, if any.

For investments made directly i.e. without any distributor code, no Exit Load will be charged for switch of investments to Direct Plan. Further, for the purpose of determining the Exit Load for redemption of such units from Direct Plan, the date when such units were allotted in the Scheme (without any distributor code) will be considered as the Purchase/allotment date. No Exit Load will be charged for switch of units from the Direct Plan to the Regular Plan of the Scheme.

In case of investors who have invested without distributor code and have opted for Reinvestment facility in the IDCW option under the Regular Plan of the Scheme, the dividend will continue to be reinvested in the same plan only.

In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load.

(ii) Options available under the Scheme:

The Scheme offers two options - Growth Option and IDCW Option. The IDCW Option offers IDCW Payout and Dividend Reinvestment facilities.

- Growth option: under this option no dividend will be declared.
- IDCW option: under this option, the amounts can be distributed out of investors' capital (Equalization Reserve), which is part of sale price that represents realized gains, as dividend may be declared by the Trustee, at its discretion from time to time (subject to the availability of distributable surplus as calculated in accordance with the Regulations).

If the investor does not clearly specify the choice of option at the time of investing, the default option for the investment will be considered as a Growth Option.

If the investor does not clearly specify the facility within the IDCW option i.e. Payout or Reinvestment at the time of investing then:

- In case of first-time investment in the Scheme within a folio, the default facility considered for the investment will be Reinvestment facility.
- For all other cases, it will be treated as the facility applicable for the earlier investments in the Scheme within the folio.

In case the Unit Holder chooses a different IDCW facility (i.e. Payout/Reinvestment) at the time of subsequent investments in the Scheme, the facility so chosen shall be applicable for all units in the respective Scheme in the folio.

In case a Unit Holder requests for a change in IDCW facility (i.e. Payout/Reinvestment), the change shall be applicable for all units in the Scheme in the folio.

(iii) Dividend Policy

The Trustee may decide to distribute by way of dividend, the surplus by way of realised profit, dividends and interest, net of losses, expenses and taxes, if any, to Unit Holders in the IDCW option of the Scheme if such surplus is available and adequate for distribution in the opinion of the Trustee.

The Trustee's decision with regard to availability and adequacy, rate, timing and frequency of distribution shall be final.

In case of IDCW payout facility, the AMC shall despatch to the Unit Holders, the dividend warrants within 15 days from the record date. .

In case of the Scheme under the IDCW payout facility, if the amount of dividend payable to the Unit Holder is less than ₹ 100, then the dividend amount will be compulsorily reinvested.

The dividend will be due to only those Unit Holders whose names appear in the register of Unit Holders in the IDCW option of the Scheme on the record date which will be fixed by the Trustees and announced in advance.

Further, the NAV shall be adjusted to the extent of dividend distribution and statutory levy, if any, at the close of business hours on record date. Within one day of the decision by the Trustees regarding the dividend distribution rate and the record date, AMC shall issue notice to the public, communicating the decision including the record date. The record date shall be 5 calendar days from the issue of notice. Such notice shall be given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the mutual fund is situated.

The Unit Holders have the option of receiving the dividend or reinvesting the same. The dividend will be reinvested at the ex-dividend NAV. No Exit load will be charged on account of Units allotted by way of dividend reinvestments.

The dividend proceeds may be paid by way of direct credit/ NEFT/RTGS/any other manner through which the investor's bank account specified in the Registrar's records is credited with the dividend proceeds.

In respect of transactions received through the Stock Exchange platforms, the requirements pertaining to minimum amounts for Purchase (initial as well as additional) may not be made applicable currently.

The Unit Holder has the option to request for Redemption either in amount in rupees or in number of Units. In case the request for Redemption specifies both, i.e. amount in rupees as well the number of Units to be redeemed, then the latter will be considered as the Redemption request and Redemption will be processed accordingly.
