Name of the Scheme	L&T Equity Savings Fund (L&TESF)																								
Product Labelling	For product labelling please refer to the cover page																								
Type of Scheme	An open-ended scheme investing in equity, arbitrage and debt																								
Investment Objective	To generate regular income by predominantly investing in arbitrage opportunities in the cash and derivatives segments of the equity markets and debt and money market instruments and to generate long-term capital appreciation through unhedged exposure to equity and equity related instruments. There is no assurance that the objective of the Scheme will be realised and the Scheme does not assure or guarantee any returns.																								
Asset Allocation Pattern	Types of Instruments	Indicative Allocation (% of total assets)		Risk Profile																					
		Maximum	Minimum																						
	A. Equity and equity related instruments	90%	65%	High																					
	A1. Equity and equity derivatives (arbitrage opportunities)	50%	20%	Medium to High																					
	A2. Net long equity*	45%	15%																						
	B. Debt, Money Market Instruments and Government Securities (including TREP/ reverse repos, Credit default swaps, equity linked debentures, margin money and securitized debt)	35%	10%	Low																					
<p>* The unhedged equity exposure shall be limited to 45% of the portfolio value. Unhedged equity exposure means exposure to equity shares alone without a corresponding equity derivative exposure. The Scheme may invest upto 50% of its total assets in equity derivatives. The Scheme does not propose to engage in short selling, securities lending and repo in corporate bonds. The Scheme shall have derivatives exposure as per the SEBI/RBI Guidelines issued from time to time. Further, the Scheme may undertake interest rate derivatives transactions for the purpose of hedging and portfolio rebalancing (within the permissible limits specified by RBI/SEBI from time to time). Pending deployment of the funds in securities in terms of investment objective of the Scheme, the AMC may park the funds of the Scheme in short term deposits of the Scheduled Commercial Banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as may be amended from time to time. The cumulative gross exposure through equity, debt, derivative positions including fixed income derivatives, and such other securities/assets as may be permitted by SEBI from time to time shall not exceed 100% of the net assets of the Scheme.</p> <p>However, following will not be considered while calculating the gross exposure: a) Security-wise hedged position and b) Exposure in Cash or cash equivalents with residual maturity of less than 91 days. The exposure to derivatives will be calculated on notional value of the derivative contracts. Due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short term purpose only, and the intention being at all times to protect the interests of the Unit Holders. In the event of deviations, rebalancing will normally be carried out within 30 days.</p> <p>The aforesaid asset allocation pattern is not absolute and can vary depending upon the AMC's perception of the debt, equity and money markets as well as the general view on interest rates. In case if the said rebalancing is not deemed appropriate in the interest of investor and after the expiry of 30 days which is due for rebalancing, then the asset allocation pattern indicated above may thus be altered as per the table stated below only on defensive considerations (including in the event of adequate arbitrage opportunities not being available in the equity and derivative markets).</p> <table border="1"> <thead> <tr> <th rowspan="2">Types of Instruments</th> <th colspan="2">Indicative allocations (% of total assets)</th> <th rowspan="2">Risk Profile</th> </tr> <tr> <th>Maximum</th> <th>Minimum</th> </tr> </thead> <tbody> <tr> <td>A. Risk Profile of the Schemes	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document carefully for details on risk factors before investment.</p> <p>As per SEBI circular no. SEBI/IMD/CIR No.10/22701/03 dated December 12, 2003, the Scheme/plan (including the plans thereunder) should have a minimum of 20 Unit Holders and no single Unit Holder should account for more than 25% of the corpus of the Scheme/plan. The aforesaid conditions should be met in each calendar quarter on an average basis. In case of non-fulfilment with the first condition i.e. minimum of 20 investors in the scheme/plan, for each calendar quarter as specified by SEBI, the scheme/plan shall be wound up by following the guidelines prescribed by SEBI and Unit Holders' investment in the Scheme/plan would be redeemed at the Applicable NAV. SEBI has further prescribed that if any investor breaches the 25% limit over a quarter, a rebalancing period of one month will be allowed to the investor and thereafter the investor who is in breach of the limit shall be given 15 days notice to redeem his exposure over the 25% limit. In the event of failure on part of the said investor to redeem the excess exposure, the excess holding will be automatically redeemed by the Fund following the guidelines prescribed by SEBI.</p> <p>Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.</p> <p>Investments in equity and equity related securities involve a degree of risks and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.</p> <p>Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including put options.</p> <p>Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's liability to meet the principal payments.</p> <p>Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments. The AMC endeavours to manage such risk by the use of inhouse credit analysis. The NAV of the Scheme's Units, to the extent that the Scheme is invested in money market instruments, will be affected by the changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline. The NAV will also be affected by Risks associated with investments made in derivatives. The NAV of the Scheme will also be affected by Risk Factors associated with scrip lending and investments in Foreign Securities.</p> <p>In addition to the factors that affect the values of securities, the NAV of Units of the Scheme will fluctuate with the movement in the broader fixed income, money market and derivatives market and may be influenced by factors influencing such markets in general including but not limited to economic conditions, changes in interest rates, price and volume volatility in the fixed income markets, changes in taxation, currency exchange rates, foreign investments, political, economic or other developments and closure of the stock exchanges. Further the investments made by the Scheme will also be affected by interest rate/price risk, credit risk or default risk, sovereign risk, liquidity risk, re-investment risk, settlement risk, risk associated with investment in derivatives and foreign securities.</p> <p>Risks Factors associated with transaction in Units through stock exchange(s)</p> <p>In respect of transaction in Units of the Scheme through BSE and/or NSE and/or ICEX, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/or NSE and/or ICEX and their respective clearing corporations on which the Fund has no control</p>																								

Investment Strategy	<p><b>Investment strategy for hedged equity portion of the portfolio</b></p> <p>The investment strategy includes identifying and investing into arbitrage opportunities between spot/cash and futures prices of individual stocks. The Scheme will deploy "Cash and Carry Arbitrage" strategy wherein the Fund Manager will evaluate the difference between price of an individual stock in the futures market and in the spot/cash market. If the price of a stock in the futures market is higher than in the spot/cash market, after considering the associated costs and taxes, the Scheme may buy the stock in the spot/cash market and sell the same in equal quantity in the futures market simultaneously. Similarly, the Scheme may at a later date, unwind the trade by selling cash position and buying in the futures markets. The Fund Manager after careful analysis may also decide to roll over his position, if the market conditions are favorable.</p> <p><b>Investment strategy for unhedged equity portion of the portfolio</b></p> <p>The unhedged equity portion of the portfolio will be primarily invested in equity securities without any sector, style or market cap bias with the aim of generating long term capital appreciation. The fund managers will use a bottom-up investment approach for stock picking, with an emphasis on first-hand research. They will favour companies that offer the best value relative to their respective long-term growth prospects, returns on capital and management quality. When assessing a company, the fund managers will focus on understanding how each of these factors will change over time.</p> <p><b>Investment strategy for debt and money market portion of the portfolio</b></p> <p>The investments in debt and money market instruments would be aimed at maintaining a balance between safety, liquidity and return on investments. With a view to maintain low to medium risk, the Scheme would focus on short to medium-term securities. The debt and money market portion of the portfolio shall be actively managed with an endeavor to generate superior risk adjusted returns. The Fund Manager shall formulate a view of the interest rate movement based on various parameters of the Indian economy, as well as developments in global markets. Investment views/decisions inter alia may be taken on the basis of the following parameters:</p> <p>1) Returns offered relative to alternative investment opportunities. 2) Liquidity of the security 3) Prevailing interest rate scenario 4) Quality of the security/instrument (including the financial health of the issuer) 5) Maturity profile of the instrument 6) Credit Rating for the instrument 7) Any other factors considered relevant in the opinion of the Fund Management team.</p>

**Impact of the total expense ratio on the returns of the Scheme:**

Expense ratio, normally expressed as a percentage of Average Assets under Management, is calculated by dividing the permissible expenses under the Regulations by the average net assets.

To further illustrate the above, for the Scheme under reference, suppose an investor invested ₹ 10,000/- under the Growth Option, the impact of expenses charged will be as under:

Particulars	Regular Plan			Direct Plan		
	Amount (₹)	Units	NAV	NAV (₹)	Units	NAV (₹)
Invested in the NFO (A)	10,000	1000	10.0000	10,000	1000	10.0000
Value of above investment after 1 year from the date of allotment (post all applicable expenses) (B)	10,700	1000	10.7000	10,750	1000	10.7500
Expenses charged during the year (other than Distribution Expenses) (C)	50			50		
Distribution Expenses charged during the year (D)	50			0		
Value of above investment after 1 year from the date of allotment (after adding back all expenses charged) (E) [E= B+C+D]	10,800	1000	10.8000	10,800	1000	10.8000
Returns (%) (post all applicable expenses) (F) [F= (E-A)/A]		7.00%			7.50%	
Returns (%) (without considering any expenses) (G) [G= (E-A)/A]		8.00%			8.00%	

Kindly note the following:

- The purpose of the above illustration is to purely explain the impact of expense ratio charged to the Scheme and should not be construed as indicative returns of the Scheme.
- Calculations are based on assumed NAVs, and actual returns on your investment may be more or less.
- It is assumed that the expenses charged are evenly distributed throughout the year.
- The expenses of the Direct Plan under the Scheme will be lower to the extent of the above mentioned distribution expenses/ commission.

Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to consult his or her own financial advisor.
