

# CRICKET WORLD CUP

2019

Investing is a lot like cricket, and that means using a different approach for each format of the game be it T20, one day or test cricket and also for your short, medium and long term goals.

## Choose the winning strategy

You need to pick a different strategy and mix of players for test cricket or one day in contrast to T-20 formats. Even with investing, choose the right strategy to help achieve your long, medium and short term goals.

## A good start makes all the difference

The outcome of a match depends on a sound strategy and a well-planned approach. In investing, starting with a good financial plan and making different investments for each goal can help you achieve them.

## Review your performance from time to time

Every match played, and won, takes your favourite team closer to the finals. But it's important to learn from the past and prepare for the next win. With investing too, review your portfolio regularly and rebalance your investments to maintain the right asset allocation. This will help keep your investments on track to achieve your long-term goals.

## Consistency is the key

Whether it's batting or bowling, a player's ability to keep hitting ones and twos to build up the score or consistently take wickets is key. Build discipline in investing by creating a habit of regular monthly investments. It could help grow your money over time thanks to the power of compounding. Remember to continue through market ups and downs to win in the long term.

An investor education initiative.
