Balanced Hybrid Fund	Neelotpal Sahai and Ritesh Jain	NIFTY 50 Hybrid Composite Debt 50:50 Index	7 Feb 2011	Rs. 1485.58 Cr

Why HSBC Balanced Advantage Fund?

- Asset allocation between equity and debt depending on prevailing market and economic conditions
- Aims to build a portfolio of companies diversified across major industries, economic sectors and market capitalization that offer an acceptable risk reward balance
- Investment in debt securities will be guided by credit quality, liquidity, interest rates and their outlook
- To benefit from both asset classes of equity and fixed income for an optimal asset-allocation portfolio
- To create a corpus through generating inflation-adjusted returns to cater to long-term goals

Fund Philosophy

- The fund could help investors participate in the long term growth potential of equities but with a much lower short term volatility
- The Fund helps in systematically managing equity allocation based on valuations and keep emotions away from asset allocation decisions
- History suggests that sharp corrections in the market typically occur when equity valuations are expensive. Due to the fund's strategy of maintaining low equity allocation at higher valuation levels, it could help reduce downside significantly during such market corrections
- Potential to substantially improve risk adjusted return for medium to long term investors; active stock picking approach for equity allocation
- The Fund provides a tax efficient and cost efficient dynamic asset allocation solution – taxation similar to equity oriented schemes

Investment Objective

- To seek long term capital growth and income through investments in equity and equity related securities and fixed income instruments. There is no assurance that the objective of the Scheme will be realised and the Scheme does not assure or guarantee any returns.
