- The fund follows active duration management along with dynamic asset allocation
- The fund is ideal for investors seeking appropriate risk adjusted returns in a volatile interest rate environment.
- In the current scenario where interest rates are nearing the peak in this cycle, there may be opportunities to capture alpha through strategic overweight duration in this fund

Fund Approach

- Actively managed fund investing across the yield curve in Govt. Securities and SDLs seeks to generate alpha
- Dynamic duration management endeavour to seize potential upsides when interest rates are expected to soften while also reducing risks in an uncertain environment
- Investments in a liquid portfolio to enable positioning changes based on evolving scenario.
- Allocation to duration through 7-10 year part of the yield curve.

Investment Objective

- To generate returns from a portfolio from investments in Government Securities. There is no assurance that the objective of the Scheme will be realised and the Scheme does not assure or guarantee any returns.
