Introducing

HSBC Consumption Fund

(Thematic - An open ended equity scheme following consumption theme)

January 2024

Market update

India is broadly where China was in CY06. Since then, China has seen an explosion in consumption spends across categories and we believe that India will follow a similar path. India is favorably positioned due to its demographics, formalisation of economy, increased women participation in workforce, etc. Aspirational Indians are more tech savvy and influenced by social media and ready to spend now than later through use of credit. We are witnessing consumption shifting from unorganised to organised, premium categories and consumer behavior moving towards buying everything anywhere. This should drive strong consumption spends in the coming decade. HSBC India Consumption fund will aim to capture this strong underlying growth trends in the country.

HSBC Consumption Fund aims to invest a minimum 80% weight equities & equity related securities of companies engaged in or expected to benefit from consumption and consumption related activities and up to 20% in equity and equity related securities of companies other than consumption and consumption related activities.

Drivers of Consumption
