## Global Market Update

MSCI World index also moved up a solid 2.5% in August. It was driven by a 2.3% gain in the US (S&P 500) while MSCI Europe gained 3.7% and MSCI Japan gained 0.5%. MSCI EM was up 1.4% with 0.9% gain in MSCI China. Crude oil price declined 2.4% (MoM) in August.

International Indices (in USD)	Last Close	1 Month (Change)	CYTD 24 (Change)
MSCI World	3,661	2.5%	15.5%
Dow Jones	41,563	1.8%	10.3%
S&P 500	5,648	2.3%	18.4%
MSCI EM	1,100	1.4%	7.4%
MSCI Europe	2,219	3.7%	9.8%
MSCI UK	1,312	2.5%	11.5%
MSCI Japan	4,139	0.5%	11.9%
MSCI China	57	0.9%	2.1%
MSCI Brazil	1,504	5.5%	-16.4%

## Macro Economic Data

- ◆ FII remained net buyers of Indian equities in August with inflow of US\$1.4 bn. DII's invested US\$5.75 bn with MFs investing US\$4.1 bn while Insurance were net buyers with an inflow of US\$1.65 bn during the month.
- ◆ India's GDP growth for Q1FY25 remained strong at 6.7% (YoY) but was slower than 7.8% (YoY) for Q4FY24. The growth has been supported by higher investment and consumption growth while government spending was slow partly impacted by the general elections during the quarter.
- ◆ Nominal GDP growth in Q1FY25 was 9.7% (YoY) in Q1FY25 similar to 9.9% (YoY) in Q4FY24.
- ◆ CPI fell to 3.5% (YoY) in July from 5.1% (YoY) in June driven by a supportive base effect. Core-core inflation (i.e. core inflation ex petrol and diesel) remained low at 3.5% (YoY) in July slightly above 3.3% (YoY) in June.
- ◆ Industrial production growth (IIP) dropped to 4.2% in June from 6.2% (YoY) in May.
- ◆ Gross GST revenue collection for the month of August stood at Rs 1.75 tn, up 10% (YoY).

## Valuations

While consensus earnings estimate for FY25/26 remained flat in August. Nifty now trades on 21.9x 1-year forward PE 20% above its 10-year average and 12% above its 5-year average. Valuations in Mid Cap and Small Cap space are much more elevated.

## Macro View

In our view, global macro environment remains challenging with heightened geo-political and economic uncertainties. US bond yields are now softening driven by concerns of a US slowdown. For India, growth has remained strong with GDP growth of 6.7% (YoY) in Q1FY25 despite slowdown in government spending due to elections. The government has maintained policy continuity in the Union Budget. Infra thrust of the government along with reduction in fiscal deficit should be supportive for domestic growth and capex cycle. Outlook for monsoon is also positive and therefore supportive for rural demand and overall consumption growth in the economy in FY25.

## Outlook

India's growth momentum and outlook remain strong. Increased government focus on employment generation and skill development is likely to lead to further policy support for manufacturing. We expect India's investment cycle to be on a medium-term uptrend supported by rising government

## Outlook (contd)

investment in infrastructure and recovery in the real estate cycle. We also expect higher private investments in renewable energy and related supply chain, localization of higher-end technology components, and India becoming a more meaningful part of global supply chains to support faster growth. However, in our view several of these positives are getting discounted by the high valuations currently prevailing in the equity market. While we remain constructive on Indian equities supported by the more robust medium term growth outlook we would caution against high return expectations.

## Key Drivers For Future

On the headwinds, we have

**Moderating global growth** due to higher interest rates is likely to weigh on demand going forward.

**Global commodity prices:** Decline in crude oil and fertilizers has been a positive for India from inflation, fiscal deficit and corporate margins perspective in FY24. However, any significant increase would be a headwind.

**Other factors/risks:** High fiscal deficit and weak monsoon.

We see the following positives for the Indian market:

**Government infrastructure spending:** Strong government thrust on infrastructure spending is clearly supporting the economy and has been one of the big positive contributors to FY24 GDP growth.

**Recovery in real estate cycle:** Real Estate remains another strong medium-term growth driver having weathered the impact of higher interest rates. Demand trends in top metro cities remain strong and inventory levels have declined.

**Recovery in private capex:** Industry capacity utilization based on RBI survey data is at a reasonably high level and indicates potential for increase in private capex going forward. Also, the continued expansion of the Production Linked Incentive (PLI) scheme is likely to further increase private investments in targeted sectors. We also expect higher private capex in renewable energy.

Note: Returns mentioned in the report are the Total Return or TR variants of the respective domestic indices. USD return for global indices.
