Why HSBC Medium Duration Fund?

- Aims to create alpha by identifying pockets of value propositions, vis-à-vis yield curve steepness, attractive carry opportunities, elevated credit spreads, etc.
- Rigorous credit selection process to ensure good portfolio quality
- Aim to demonstrate ability to strategically manage Duration in periods of volatile interest rates
- With interest rates consolidating at a higher level, a strategy combining a prudent mix of strategic Duration calls and Accrual product is well suited for investors with 3 year horizon

Fund Approach

- Aims at delivering yield pick up through judicious exposure to high quality/relatively less liquid space, while keeping adequate liquidity
- Around 75%-80% of the portfolio in AAA or equivalent securities; Nil exposure to AA- and below rated names
- Almost 40-45% of portfolio exposure to Cash, G-Sec and AAA PSUs; ability to opportunistically evaluate deals with good yield pick up given the high proportion of G-Sec in the portfolio
- Strategic duration management in an Accrual product
