Why HSBC Large Cap Fund?

- To seek an exposure to true large cap companies which are relatively more stable than mid and small cap companies
- A top down and bottom up approach will be used to invest in equity and equity related instruments
- True to label fund – The fund will stay true to its objective in keeping with the mandate reposed by the investor whilst investing in the fund
- To create a corpus through generating inflation-adjusted returns to cater to long-term goals

Fund Philosophy

- Prefer dominant and scalable businesses available at reasonable valuations.
- Profit pool consolidation with dominant players to continue and disruption to accelerate this shift.
- Stock selection focuses on earnings growth trajectory and within that, the emphasis lies on earnings surprises.
- Since valuations are in line with its historical averages, earnings visibility and relative earnings growth are the key criteria of stock selection.

Key Portfolio themes:

- Our portfolio is a conviction portfolio which is positioned for stocks with earnings visibility in the near term and growth in medium to long term.
- Portfolio construction is through bottom-up stock selection and there is an emphasis on sustainable earnings growth, relative earnings and earnings surprises.
- The current set up of the market is that of moderating inflation, peaked interest rates, improving current account and balance of payment, and reviving growth. That means we are likely to witness improving macro data. However, we are not seeing its impact on corporate earnings that continues to have downward revision. Consensus earnings estimates of FY24 and FY25 look optimistic. The markets have been steady as the time-correction has led the valuations to be in line with historical averages. We have tamed our pro-cyclical bias and increased our exposure in the defensive sectors to de-risk our portfolio.

Portfolio sectoral positioning as on 28th February 2023:

- Positive view on: Healthcare, Real Estate
- Neutral: Consumer Staples, Utilities, Energy, Communication Services, Information Technology and Financials.
- Underweight stance: Materials, Consumer Discretionary, and Industrials

Sector Attribution (3 months):

- Both Allocation and Stock Selection had a favorable impact as against benchmark.
- Being UW in Utilities and OW in Real Estate were the key positive Allocation contributors.
- Stock selection in Materials and Industrials were the key positive contributors and stock selection in Financials was the key detractor

Investment Objective

To generate long-term capital growth from an actively managed portfolio of equity and equity related securities of predominantly large cap companies. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.
