### **2. Expected Benefits of the Proposed Transaction**

Broadly, the Proposed Transaction is expected to result in the following benefits:

- a) L&T Mutual Fund is an established mutual fund in India with an AUM of approximately INR 72,322.38 crores for the month ended September 30, 2022. The Seller established its presence in the mutual funds industry through the acquisition of the mutual fund business of DBS Chola Mutual Fund in 2010 and Fidelity Mutual Fund in 2012. The Seller has demonstrated its ability to successfully integrate and grow acquired mutual fund portfolios. Since its acquisition of the mutual fund businesses of DBS Chola Mutual Fund and Fidelity Mutual Fund, the average AUM of L&T Mutual Fund has increased from approximately INR 2,520 crores (for the month of January 2010 for the erstwhile DBS Chola Mutual Fund) to approximately INR 72,322.38 Crores for the month ended September 30, 2022 (Source: AMFI).
- b) The Proposed Transaction will help HSBC to increase foothold in the mutual fund industry in the near future and HSBC is committed to growth. The proposed sale of L&T Mutual Fund to HSBC Mutual Fund will increase the scale and resources of the entity and deliver a strong value proposition to all unitholders. The strength of the HSBC global brand and its strong track record in the area of investor care is expected to help enhance the investor experience of all unit holders.
- c) HSBC AMC has a long track record and has delivered reasonable return to its unitholders.
- d) The merger of HSBC MF Schemes and L&T MF Schemes would allow HSBC AMC and HSBC Trustees to avoid the existence of similar schemes in HSBC Mutual Fund and enable optimum utilization of resources and to present to the unitholders, a simplified range of schemes in the interest of the unitholders. It is in the interest of the unitholders that the HSBC Trustees and the board of directors of HSBC AMC have decided to merge some of their schemes with those of the schemes of L&T AMC or vice versa.

There should not be any income-tax implications due to the Merger of the Schemes (as described in paragraph 5 of this letter) in the hands of unitholders since merger/consolidation of mutual fund schemes is considered as a tax neutral event. Transfer of units upon consolidation of mutual fund schemes of two or more schemes of equity-oriented fund or two or more schemes of a mutual fund other than equity oriented fund in accordance with the MF Regulations is exempt from capital gains i.e., any transfer of units of consolidating scheme of a mutual fund, made in consideration of the allotment of the units of the consolidated scheme by the unitholder is not considered as “transfer” by virtue of the provisions of Section 47(xviii) of the Income-tax Act, 1961 (the “IT Act”) and hence the gains on such transfer should not be chargeable to tax.

For any redemption/switch transactions post the Merger of the Schemes (as described in paragraph 5 of this letter), the following points are relevant for taxation (held as capital asset):

- For the purpose of classifying the units of consolidated scheme into long term or short term, the period of holding of units acquired in the consolidation of schemes of mutual fund shall include the period for which units in consolidating schemes were held by the unitholder in terms of the provisions of Section 2(42A) of the IT Act.
- Further, Section 49(2AD) of the IT Act provides that the cost of acquisition of the units acquired in the consolidated scheme of mutual fund (in consideration of allotment of units of consolidating scheme) shall be deemed to be the cost of acquisition of the units in the consolidating scheme of mutual fund.

However, redemption and/or switch of units from the HSBC Overnight Fund during the Exit Option Period shall be considered as redemption and will result in short term/long term capital gain/loss in the hands of the unitholders depending on the period of holding of the investment.

In case of NRI unitholders, TDS would be deducted in accordance with applicable tax laws for redemption/switch-out of units from the HSBC Overnight Fund during the Exit Option Period and same would be required to be borne by such unitholder only.

Securities Transaction Tax (“STT”) on redemption/switch-out of units, if any, exercised during the Exit Option Period in HSBC Overnight Fund shall be borne by HSBC AMC.

Stamp duty shall not be levied on the units allotted under the Surviving Scheme, upon the Merger of the Schemes.

In view of the individual nature of tax consequences, unitholders are advised to consult the professional financial/tax advisors with regard to tax and other financial implications arising out of their participation in Merger of the Schemes.

In case the principal is to be repaid in more than one payout then the maturity of the securities shall be calculated on the basis of weighted average maturity of the security.</li> <li>● In case the maturity of the security falls on a non-Business Day then settlement of the securities will take place on the next Business Day. Please refer to paragraph "Overview of Debt Markets" to understand the debt markets and the instruments available in the debt markets.</li> <li>● The cumulative gross exposure in debt and money market instruments and such other securities/assets as may be permitted by SEBI from time to time shall not exceed 100% of the net assets of the Scheme.</li> </ul>		<p>Investments will be made in line with the asset allocation of the Scheme and the applicable SEBI and/or AMFI guidelines as specified from time to time.</p> <p>Pending deployment of funds, the Scheme may invest them into deposits of scheduled commercial banks as permitted under the extant Regulations.</p> <p>The Scheme may also enter into "Repo", or such other transactions as may be allowed by SEBI regulations from time to time.</p> <p>The Scheme may take exposure in repos of corporate bonds up to 10% of its total assets of the Scheme.</p> <p>The investments under the Scheme would be in Triparty Repo, reverse repo, debt and money market instruments and cash and cash equivalents with overnight maturity/maturing on or before next business day. <b>Investment Strategy</b>	<p>The portfolio will be constructed and managed to generate returns to match the investment objective and to maintain adequate liquidity to accommodate funds movement. #### Investment Restrictions for Securitised Debt:

In terms of SEBI Circular No. SEBI/IMD/CIR No.6/63715/06 dated March 29, 2006, for investments made in Securitised Debt (mortgage backed securities and asset backed securities), restrictions as per Clause 1 of Seventh Schedule shall not apply at the originator level.

#### Risks associated with investments in securitised debt:

- The underlying assets in securitised debt may assume different forms and the general types of receivables include auto finance, credit cards, home loans or any such receipts. Credit risks relating to such receivables depend upon various factors, including macro-economic factors of these industries and economies. Further, specific factors like the nature and adequacy of property mortgaged against these borrowings, the nature of loan agreement/mortgage deed in case of home loans, adequacy of documentation in case of auto finance and home loans, capacity of a borrower to meet his obligations on borrowings in case of credit cards and intentions of the borrower also influence the risks relating to asset borrowings underlying securitised debt. Additionally, the nature of the asset borrowings underlying the securitised debt also influences the underlying risk, for instance while residential mortgages tend to have lower default rates, repossession and recovery is easier in case of commercial vehicles. Credit rating agencies take into account a series of such factors and follow an elaborate system involving stipulation of margins, over-collateralisation and guarantees to provide a rating for securitised debt.
- In case of securitised debt, changes in market interest rates and pre-payments may not change the absolute amount of receivables for the investors but may have an impact on the reinvestment of the periodic cash flows that an investor receives on securitised papers.
- Tenor risk: While building the planned amortization schedule for a PTC, there can be a clause stating a minimum percentage of receivable by the issue to stick to the initial cash flows. If the receivables are less than the minimum stated receivables then the tenor of the PTC can get elongated or vice versa.
- Risk due to prepayment: Asset securitization is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. In the event of pre-payment of the underlying debt, investors may be exposed to changes in tenor and yield.
- Liquidity Risk: Presently, despite recent legal developments permitting the listing of securitised debt instruments, the secondary market for securitised debt in India is not very liquid. Even if a more liquid market develops in the future, secondary transactions in such instruments may be at a discount to initial issue price due to changes in the interest rate structure.
- Limited Recourse, Delinquency and Credit Risk: Certificates issued on investment in securitised debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan/decline in project SPV's receivables can adversely affect the pay outs to the investors and thereby, adversely affect the NAV of the Scheme. While it is possible to repossess and sell the underlying asset, various factors can delay or prevent repossession and the price obtained on sale of such assets may be low. Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Investor Payouts may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of a Obligor to repay his obligation, the Servicer may repossess and sell the underlying Asset. However many factors may affect, delay or prevent the repossession of such Asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such Asset may be sold may be lower than the amount due from that Obligor.
- Bankruptcy Risk: If the originator of securitised debt instruments in which the Scheme invest is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', then the Scheme could experience losses or delays in the payments due. Normally, care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'.
- Risk of Co-mingling: Servicers in a securitization transaction normally deposit all payments received from the obligors into a collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account. In this interim period, collections from the loan agreements by the servicer may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to investors, investors in the Scheme may be exposed to a potential loss.

#### Segregated Portfolio provisions

In order to ensure fair treatment to all investors in case of a Credit Event and to deal with liquidity risk, SEBI (vide its circular no. SEBI/HO/IMD/DF2/CIR/P/2018/160 dated December 28, 2018) has allowed creation of Segregated Portfolio of debt and money market instruments by mutual fund schemes.

#### Benefits associated with Segregated Portfolio

The creation of Segregated Portfolio is aimed at ring fencing a bad asset and restrict cascading effect of illiquidity on the rest of portfolio. This will ensure fair treatment to all investors in case of a Credit Event and allow HSBC AMC to deal with liquidity risk. This offers advantage to the investors in the following ways:

- Protecting interest of the investors – It protects investors from exits of large investors as segregation of bad assets help in stabilizing the NAV and minimize panic redemptions, thereby providing a cushion to the liquid portfolio of the Scheme.
- Fair treatment to the investors – New investors coming to the Scheme (Main Portfolio) after the Credit Event will neither get benefit of subsequent recovery, if any, of the bad assets nor will they have to bear the cost of further reduction in value of bad assets. Furthermore, an existing investor exiting from the liquid portfolio (Main Portfolio) after the Credit Event shall still be entitled to receive his portion of subsequent recovery of bad assets in the Segregated Portfolio.

The salient features of creation of Segregated Portfolio is given as below:

### **Creation of Segregated Portfolio**

Creation of Segregated Portfolio shall be subject to guidelines specified by SEBI from time to time and includes the following:

- 1) Segregated Portfolio may be created, in case of a Credit Event at issuer level i.e., downgrade in credit rating by a SEBI registered Credit Rating Agency ("CRA"), as under:
  - a. Downgrade of a debt or money market instrument to 'below investment grade', or
  - b. Subsequent downgrades of the said instruments from 'below investment grade', or
  - c. Similar such downgrades of a loan rating.
- 2) In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of Segregated Portfolio shall be based on issuer level Credit Events as mentioned above and implemented at the ISIN level.
- 3) In case of unrated debt or money market instruments of an issuer that does not have any outstanding rated debt or money market instruments, actual default of either the interest or principal amount by the issuer of such instruments shall be considered as a Credit Event for creation of Segregated Portfolio.
- 4) In case of debt instruments with special features mentioned above, if the instrument is to be written off or converted to equity pursuant to any proposal, the date of said proposal may be treated as the Trigger Date. However, if the said instruments are written off or converted to equity without proposal, the date of write off or conversion of debt instrument to equity may be treated as the Trigger Date.
- 5) Creation of Segregated Portfolio is optional and is at the discretion of the AMC.

### **Definitions**

- 1) The term 'Segregated Portfolio' means a portfolio, comprising of debt or money market instrument affected by a Credit Event that has been segregated in a mutual fund scheme.
- 2) The term 'Main Portfolio' means the scheme portfolio excluding the Segregated Portfolio.
- 3) The term 'Total Portfolio' means the scheme portfolio including the securities affected by the Credit Event.

### **Process for Creation of Segregated Portfolio**

- 1) On the date of Credit Event, the AMC shall decide on creation of Segregated Portfolio. Once the AMC decides to create Segregated Portfolio, it shall:
  - a. seek approval of Board of Trustees prior to creation of the Segregated Portfolio;
  - b. immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. The Fund will also disclose that the segregation shall be subject to the Trustees approval. Additionally, the said press release will be prominently disclosed on the website of the AMC; and
  - c. ensure that till the time the Trustees approval is received, which in no case shall exceed 1 business day from the day of Credit Event, the subscription and redemption in the scheme will be suspended for processing with respect to creation of units and payment on redemptions.
- 2) Once the Trustees approval is received by the AMC:
  - a. Segregated Portfolio will be effective from the day of Credit Event.
  - b. The AMC shall issue a press release immediately with all relevant information pertaining to the Segregated Portfolio. The said information will also be submitted to SEBI.
  - c. An e-mail or SMS will be sent to all unit holders of the concerned scheme.
  - d. The Net Asset Value ("NAV") of both Segregated and Main Portfolios will be disclosed from the day of the Credit Event.
  - e. All existing investors in the scheme as on the day of the Credit Event will be allotted equal number of units in the Segregated Portfolio as held in the Main Portfolio.
  - f. No redemption and subscription will be allowed in the Segregated Portfolio. However, upon recovery of any money from Segregated Portfolio, it will be immediately distributed to the investors in proportion to their holding in the Segregated Portfolio.
  - g. The AMC shall enable listing of units of Segregated Portfolio on the recognized stock exchange within 10 working days of creation of Segregated Portfolio and also enable transfer of such units on receipt of valid transfer requests.
- 3) If the Trustees do not approve the proposal to segregate portfolio, the AMC will issue a press release immediately informing investors of the same.

### **Processing of Subscription and Redemption Proceeds**

- 1) All subscription and redemption requests for which NAV of the day of Credit Event or subsequent day is applicable will be processed as under:
  - i. Upon Trustees' approval to create a Segregated Portfolio -  
Investors redeeming their units will get redemption proceeds based on the NAV of Main Portfolio and will continue to hold the units of Segregated Portfolio.  
Investors subscribing to the scheme will be allotted units only in the Main Portfolio based on its NAV.
  - ii. In case Trustees do not approve the proposal of Segregated Portfolio, subscription and redemption applications will be processed based on the NAV of Total Portfolio.

### **Disclosure**

The AMC shall make necessary disclosures as mandated by SEBI, in statement of account, monthly/half yearly portfolio statements, KIM, SID, Scheme Advertisements, Scheme Performance data, AMC's website and at other places as may be specified.

The information regarding number of Segregated Portfolio(s) created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.

The NAV of the Segregated Portfolio shall be declared on daily basis.

Further, the investors of the Segregated Portfolio shall be duly informed of the recovery proceedings of the investments of the Segregated Portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

### Total Expense Ratio (TER) for the Segregated Portfolio

- 1) The AMC will not charge investment and advisory fees on the Segregated Portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in Segregated Portfolio.
- 2) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the Main Portfolio (in % terms) during the period for which the Segregated Portfolio was in existence.
- 3) The legal charges related to recovery of the investments of the Segregated Portfolio may be charged to the Segregated Portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the Main Portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- 4) The costs related to Segregated Portfolio shall in no case be charged to the Main Portfolio.

### Monitoring by Trustees

The Trustees will monitor the compliance of the SEBI Circular in respect of creation of Segregated Portfolio and disclosure in this respect shall be made in Half-Yearly Trustee reports filed with SEBI.

In order to avoid mis-use of Segregated Portfolio, Trustees shall have a mechanism in place to negatively impact the performance incentives of fund managers, Chief Investment Officers, etc., involved in the investment process of securities under the Segregated Portfolio, mirroring the existing mechanism for performance incentives of the AMC, including transfer of such impacted amount to the Segregated Portfolio.

### Risks associated with Segregated Portfolio

**Liquidity risk** – Segregated Portfolio is created to separate debt and money market instruments affected by a Credit Event from the Main Portfolio of the Scheme. The Fund will not permit redemption of the Segregated Portfolio units, but the units will be listed on a recognized stock exchange. The Fund is not assuring any liquidity of such units on the stock exchange. Further, trading price of units on the stock exchange may be significantly lower than the prevailing NAV. Investors can continue to transact (subscribe/redeem) from the Main Portfolio.

**Credit risk** – While the AMC will put in sincere efforts to recover the securities in the Segregated Portfolio and distribute the same to unit holders, it is likely that such securities may not realise any value leading to losses to investors.
