Fund Positioning

CEO SPEAK

It's a wrap of 2022 and that time of the year when we usually take stock, reflect and plan for the year ahead.

Taking Stock -2022

The Indian equity markets stood strong and resilient despite the fact that most global markets gave negative returns in 2022. Among sectoral indices, Banking – especially the PSU Banks led the rally. IT sector after the rallying of 20-21 gave negative returns which was in line with the global trend.

The AUM of the Indian mutual fund industry crossed the Rs 40 lakh Crore mark in November 2022, which is yet another growth milestone for the industry. This year also marked the 10th consecutive yearly rise in AUM which has been supported by the steady inflows in the Systematic Investment Plans (SIP) segment and an increasing number of retail participation in the mutual fund industry.

The significant event from an organisation perspective has undoubtedly been the successful completion of the integration of L&T Investment Management (LTIM) with HSBC AMC. This being one of the largest mergers in the Indian Mutual Fund Industry makes it a significant milestone for all of us and is a positive step in line with our commitment and belief in the Indian economy and its growth story.

Reflections 2022

This year's biggest takeaway has been the retail investors' increased confidence and trust in mutual funds as a viable financial asset class. The demography of the new investors is spread across geographies and age brackets. SIPs continue to be the preferred investment mode in the equity markets and now investors have access to not just the ease of digital transactions but also access to information and data when markets have been volatile. Our distributors and advisors have been critical enablers in this journey of investor education and guidance. The fact that many have stayed invested in the funds despite volatile cycles reflects the retail investors' maturity and informed decision making of their asset allocations.

Road Ahead 2023

While we are cognizant of the fact that there will be volatility, we at HSBC AMC firmly believe in the India growth story and that the next decade belongs to India. We have Foreign Institutional Investors (FIIs) investing in the Indian markets at levels that are way higher than what we have seen in the past. At the same time, the Domestic Institutional Investors (DIIs) have also emerged as strong buyers, strengthening our markets throughout the year. We believe that 2023 is slated to also have the fixed income space getting more active. We urge investors to stay grounded on their fundamentals of financial goal planning and not get swayed by short term volatility. SIPs have proven to be great vehicles for achieving long term financial goals and wealth generation and we believe that we will continue to have more and more new investors using this route to experience the benefits of investing in the equity markets. We are committed to bringing you the best of products and a seamless customer experience and look forward to your continued support.

On behalf of the entire team of HSBC AMC, we wish you a Happy, Healthy and Prosperous 2023!

Ravi Menon

Kailash Kulkarni

EQUITY MARKETS

December 2022

Equity Market Indices

Domestic Indices	Last Close	1 Month (Change)	CY 2022 (Change)
S&P BSE Sensex TR	91,969	-3.6%	5.8%
Nifty 50 TR	26,326	-3.5%	5.7%
S&P BSE 200 TR	9,778	-3.3%	5.7%
S&P BSE 500 TR	30,570	-3.2%	4.8%
S&P BSE Midcap TR	31,354	-2.5%	2.7%
S&P BSE Smallcap TR	35,267	-2.0%	-1.0%
NSE Large & Midcap 250 TR	12,839	-2.6%	4.5%
S&P BSE India Infrastructure Index TR	412	-2.1%	15.1%
MSCI India USD	771	-5.5%	-8.7%
MSCI India INR	2,069	-4.0%	1.6%
INR - USD	83	1.6%	11.3%
Crude Oil	86	0.6%	10.5%

- India and most global equity markets corrected sharply in December except for China which was buoyed by re-opening news flow. This again led to a reversal in FII flows with net outflows in December after inflows in November.
- S&P BSE Sensex & NSE Nifty indices were down 3.6% /3.5%, respectively, while the broader markets BSE Midcap/BSE Small cap indices were down 2.5%/2.0%, respectively. All sectors except Metals declined in December. Banks and Oil & Gas registered modest declines and outperformed the Nifty.
- For CY22, Sensex and Nifty still registered a gain of 4.4%/4.3%, while the BSE Midcap index was up 1.4% and the BSE Small cap index was down 1.8%, implying an essentially flat year for the equity markets.

Global market update

- Major equity indices globally turned negative during the month with MSCI World index down 4.3% led by US market (S&P 500) declining 5.9%. MSCI Europe was flat while MSCI EM was down 1.6% despite a 5.2% jump in China. Overall for CY22, MSCI World declined 19.5% led by a similar level decline in the US and other developed markets as well as EM. Crude oil prices remained largely flat during the month.

- FIIs were sellers of Indian equities in December (-\$0.17 bn, following +\$4.7 bn in November). In CY22, India saw FII outflows of \$17 bn. DIIs were buyers to the quantum of \$2.9 bn in December. Mutual funds were buyers in December with purchases of \$1.8 bn and Insurance funds invested \$1.1 bn during the month.
- The RBI hiked the repo rate by 35 bps and kept the stance of "withdrawal of accommodation" unchanged.
- While CPI inflation moderated to 5.9% (YoY) in November from 6.8% in October, core inflation remained at 6.0% (YoY) in November from a downwardly revised 6.0% in October
- Index of Industrial Production (IIP) contracted by 4% (YoY) in Oct'22. This was partly due to the Diwali holidays in October this year vs November last year.
- INR depreciated over the month (down 1.6% MoM) and ended the month at 82.74/USD in December. India's FX reserves came in at \$563 bn. FX reserves have improved by US\$12.7 bn in the last four weeks.
- Other key developments during the month include – Gross GST revenue collected in Dec 2022 grew 15% YoY to Rs 1.5 tn.

Valuations

- Nifty declined 3.5% in December while it saw a minor upgrade to earnings leading to slightly lower valuations. On a 10-year basis, Nifty is trading at +1 STD from its historic average valuations, while on a 5-year basis, it is now trading in-line averages. Nifty is trading at 21.5x / 18.1x FY23 / FY24e. In the rising interest rate scenario, market returns may lag earnings growth, given the probable moderation in valuation multiples.

Macro View

- Our macro environment remains challenging given heightened global geo-political and economic uncertainties. Widening Current Account Deficit due to a weak global demand environment leading to lower exports is likely to keep the Rupee under pressure. RBI's policy actions have been walking the tight rope between supporting growth and reigning in inflation. The recent moderation in inflation should help moderate the need for significant further tightening, which is a positive. The strong tax buoyancy (visible in both GST and direct taxes) has been a positive but is being largely offset by a higher subsidy burden due to higher fertilizer prices and food support programs, leaving limited room for a further step up in government infra spending. A fall in crude prices on the back of a global demand slowdown could support markets in the near term. The upcoming budget will be important as government needs to reduce the overall fiscal deficit while at the same time increasing spending on infrastructure and other capex-related areas.

Outlook

- On the positive side, inflation in India and some of the other major economies seems to have peaked in the near term thus interest rate increase cycle is also expected to come to an end in the next few months. However, economic growth is also moderating in major economies and in India and the impact of the sharp interest rate increases could result in unfavorable growth surprises going forward. Moderation in global commodity prices from peak and stalemate in the geopolitical situation has given some respite. Domestically, India seems to be more stable. Domestic demand so far has seen a recovery to/higher than pre-covid levels. Nifty earnings have seen a marginal upgrade in Q2 results and are expected to grow at 15% CAGR (consensus estimates) over FY22-24E. However, with valuations on the higher side, equity markets are likely to remain volatile in the near term with a negative bias. Fall in crude prices, sharper decline in inflation and normalization of geopolitical situation would support the markets. US Fed's hawkish tone on interest rates and the fear of global recession remain key concerns for investors. Indian equities are expected to remain volatile in the short term.

Global Market Indices

International Indices (in USD)	Last Close	1 Month (Change)	CYTD 2022 (Change)
MSCI World	2,603	-4.3%	-19.5%
Dow Jones	33,147	-4.2%	-8.8%
S&P 500	3,840	-5.9%	-19.4%
MSCI EM	956	-1.6%	-22.4%
MSCI Europe	1,732	-0.1%	-17.3%
MSCI UK	1,075	-0.5%	-8.5%
MSCI Japan	3,139	0.1%	-18.5%
MSCI China	64	5.2%	-23.6%
MSCI Brazil	1,459	-3.6%	1.7%

Key drivers for future

On the headwinds, we have

- **High and persistent inflation concerns (Global & Domestic)**
- **US Fed Policy:** Accelerated rate hikes and balance sheet shrinking process could mean volatile equities.
- **Geopolitical:** Current impact is already in the base case, coupled with no escalation assumed from the current conflict.
- **Moderating growth** globally due to geopolitical headwinds and demand impact from sticky inflation.

However, what matters the most is the earnings growth and its sustainability

- **Corporate earnings growth:** Nifty earnings have seen a marginal upgrade post Q2.
- **Domestic macro:** Overall, India macro remains stable. Good monsoon, higher agri commodity prices should support rural demand. Urban demand remains strong driven by a bounce back in service economy post-Covid. However, higher interest rates are likely to weigh on consumption going forward.
- **Other factors/risks:** Impact of elevated energy prices on inflation, current account balance and fiscal deficit. Faster than anticipated reversal in commodity prices (especially crude oil), would be positive from an inflation and corporate margins perspective.

Past performance is not an indicator of future returns

DEBT MARKETS

December 2022

2023 – A year of changing narratives!

2023 is probably going to be that type of year. As investors, we may need to keep our foothold weak and an optimum strategy could well be to keep shifting views and altering investing strategies as the year goes by and incoming data gives more clarity on the future trajectory. Through most of 2020 and 2021, global central banks' as well as the RBI's pandemic-driven approach of doing "whatever it takes" gave a somewhat secular narrative to the interest rate backdrop, while 2022, for the most part has been a one-way street of central banks making up for past follies and frantically raising interest rates to gain control over the inflation genie. As we head into 2023, the year promises to be interesting with a high level of confidence that the end of rate hikes across most countries is almost in sight, however with much lower confidence levels of the path that lies beyond. That path, in our view, is still very hazy and likely to make various markets swing from one side to the other as 2023 goes by, requiring a nimble approach from investors.

The policy path beyond the next few Fed rate hike is still very hazy and is likely to make various markets swing from one side to the other as 2023 goes by, requiring a nimble approach from investors

Let's take a look at a few dominant questions which are likely to impact our bond markets as we lay down our thoughts on those, with a frank and clear disclaimer at the outset that many of these views are indeed fickle and more likely than not, will undergo changes through the course of 2023.

1. Outlook for the Fed and US Interest Rates

Market is currently expecting the US Fed to raise rates to just below 5% from 4.25-4.5% currently, and then from mid-2023 onwards, do an about-turn and start cutting rates almost thrice (~75 bps) by Jan 2024. The pendulum on this one has swung a few times already. From a 5.25-5.50% projected peak rate just a few months ago, markets are now pricing a peak below 5%. More interestingly, despite various Fed speakers, including Chair Powell, repeatedly telling the markets that rates need to remain at the peak levels for a longer period to achieve their inflation objective, bond markets continue to price in a Fed buckling down under recession worries and reversing course to rate cuts after just a few months post the last rate hike. We believe as the year goes by, bond markets may come closer to where the Fed currently is rather than the other way around, which does mean that US interest rates could have an upward bias as and when the markets get more convinced of the higher for longer Fed messaging.

2. Outlook for India's Growth and Inflation

India's growth outlook for FY24 is somewhat hazy, with forecasts for GDP growth ranging from as low as 5% to an impressive 7% as well. In an environment of a global growth slowdown, the crucial determinant of growth would be the intrinsic strength of the domestic economy being able to weather the external headwinds. While various fast indicators of growth are all over the place and can be used to justify either side of the growth spectrum, in our view – the economy may turn out to be more resilient than market expectations and from a bond market perspective, less of an influencer in making RBI do a volte-face in its rate trajectory.

3. RBI MPC

The markets are currently pricing in another 25 bps hike from 6.25% to 6.5%, a pause thereafter, and then expectations of rate cuts into the second half of FY2024. In our view as well, the MPC is likely to hike rates to 6.50% and then pause to gauge the impact of past tightening. However, we do think the MPC is unlikely to cut rates in the latter half of 2023 or even early 2024. Whether rate cuts do materialize so soon or not, would be an important determinant of investment strategy, especially with regard to the need to worry about re-investment risks or on the merits of duration extension.

The other risk scenario to not lose sight of, even if the low probability, is that of the RBI being forced to continue hiking rates beyond 6.50% due to the Fed forcing their way well beyond 5% on the Fed funds rate. However, delinked we may like to believe India is, maintaining a minimum interest rate differential between our rates and the US would be warranted to ensure macro and currency stability.

4. Banking Balance Sheets

This, we believe, is probably the most crucial variable not just for government security yields but also crucially for credit spreads. With credit growth likely to remain in the mid-to-high teens in FY24, the pressure to grow their deposit base is likely to intensify in the banking sector, thereby keeping the overall level of interest rates high in our economy. This bodes well for the gradual resurgence of deposit flows into the banking sector, but given the long lead time needed to achieve that, there is likely to be transition effects that the bond markets may need to deal with, viz., government bond yields remaining elevated to ensure their relative attractiveness versus commercial credit, and secondly, banks pricing credit risks more prudently, leading to higher costs for borrowing from the banking sector. This would hopefully in our view, finally lead to increased corporate issuance and importantly, a widening of credit spreads in our bond markets as well, something that mutual fund investors have been waiting for some time now!

Based on the outlook above and the high level of uncertainty surrounding them, a few strategies that in our view, make a lot of investment sense are:

- **Take advantage of the banking ALM mismatch:** Heading into the Jan-March quarter, bank FD and CD rates are likely to trend higher, from current levels of 7.50-7.60% to 7.75-8%. This makes a compelling case for investors to get into investment products like **Money Market Funds** which invest predominantly in the 6-12 month CD space.
- **G-Sec oriented rolldown / index funds in the 4-5 year space:** With G-Sec yields trading at ~7.25% and AAA corporate bond spreads still fairly unattractive in this space, conservative investors are better off locking into **G-Sec Oriented Index Funds** targeting the 2026-2027 segments, especially keeping 3 year taxation benefits in mind.
- **Active funds could finally make a comeback:** So far, passive / index funds investing in G-Secs and SDLs have made the most sense and has been the only category to attract investor flows, but we believe this could change going forward. Active funds such as **Short Duration Funds**, which can invest in government securities for now, but with the ability to actively and dynamically shift strategy towards AAA corporate and PSU bonds when spreads become more attractive (which we believe is likely in 2023), investors would be able to better optimize their overall returns over a 3 year period, instead of being locked passively only into just sovereign bonds.
- **Carry - the main game and not capital gains:** If, as we expect, rates remain elevated for longer, without a rate cutting cycle beginning in 2023, we could expect interest rates to consolidate around the 7.00-7.50% range (for 10-year G-Sec yields), reducing the scope for capital gains to add to portfolio returns. However, for investors willing to take some risk - with volatility being high and markets likely to swing from one narrative to the other during the course of 2023, we believe **Dynamically Managed Duration and Gilt Funds** can have a lot more opportunities to add alpha through meaningful duration changes to take advantage of these swings. And for the next level of alpha-seeking investors, adding an element of measured credit risk to these strategies (through products such as **Medium Duration Funds**), can become a rewarding proposition.

To sum up, the bands of uncertainty around the interest rate outlook are high and many of our assumptions and outlooks may indeed change as we navigate 2023, but we do believe a nimble approach open to change, and able to optimize portfolio strategies, is probably the best way to play 2023 and beyond.

Past performance is not an indicator of future returns. Source: Bloomberg.

^Debt Allocation of 85% and 35% in respective indices represented by CRISIL Composite Bond Index.

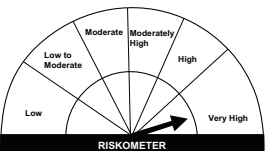

£ The equity component of the Index has been changed from Nifty 50 to S&P BSE - 200 and will be represented by Total Return variant of S&P BSE - 200 TRI.

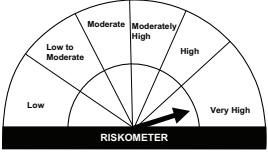

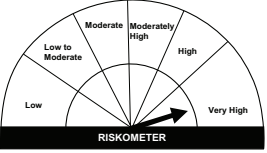

Monthly income is not assured and is subject to the availability of distributable surplus.

^^The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

Criteria for Large, Mid & Small companies - SEBI has demarcated the definitions of large cap, mid cap and small cap companies as given below.

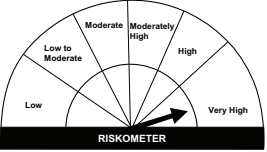

Large Cap: 1st -100th company in terms of full market capitalization, Mid Cap: 101st -250th company in terms of full market capitalization, Small Cap: 251st company onwards in terms of full market capitalization of large/mid/small cap companies. A list of stocks as per above criteria will be uploaded on AMFI website and updated every six months by AMFI.

Pursuant to payment of IDCW, NAV per unit of the IDCW options of the aforesaid schemes will fall to the extent of the payout and statutory levy (if applicable).

Past performance of the aforesaid schemes may or may not be sustained in future.

Please note that the IDCW rates mentioned are post applicable dividend distribution tax deduction.

HSBC Large Cap Fund

Large Cap Fund - An open ended equity scheme predominantly investing in large cap stocks.

Investment Objective: To generate long-term capital growth from an actively managed portfolio of equity and equity related securities of predominantly large cap companies. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

⁶SEBI vide its circular no. SEBI/HO/IMD/IMD-II DF3/P/CIR/2021/652 dated October 27, 2021, on 'Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes' has introduced two-tiered structure for benchmarking of certain categories of schemes. Accordingly, the benchmark has been changed to NIFTY 100 TRI Index which has been classified as Tier 1 benchmark. Furthermore, the same is effective from 01 December 2021

This product is suitable for investors who are seeking*:

- To create wealth over long term
- Investment in predominantly large cap equity and equity related securities

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. As per SEBI circular dated October 5, 2020 on product labelling (as amended from time to time), risk-o-meter will be calculated on a monthly basis based on the risk value of the scheme portfolio based on the methodology specified by SEBI in the above stated circular. The AMC shall disclose the risk-o-meter along with portfolio disclosure for all their schemes on their respective website and on AMFI website within 10 days from the close of each month. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Large and Mid Cap Fund

Large and Mid Cap Fund - An open ended equity scheme investing in both large cap and mid cap stocks.

Investment Objective: To seek long term capital growth through investments in both large cap and mid cap stocks. However, there is no assurance that the investment objective of the Scheme will be achieved.

HSBC Flexi Cap Fund

Flexi Cap Fund - An open ended dynamic equity scheme investing across large cap, mid cap, small cap stocks.

Investment Objective: To seek long term capital growth through investments made dynamically across market capitalization (i.e. Large, Mid, and Small Caps). The investment could be in any one, two or all three types of market capitalization. The Scheme aims to predominantly invest in equity and equity related securities. However, in line with the asset allocation pattern of the Scheme, it could move its assets between equity and fixed income securities depending on its view on these markets. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

⁶SEBI vide its circular no. SEBI/HO/IMD/IMD-II DF3/P/CIR/2021/652 dated October 27, 2021, on 'Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes' has introduced two-tiered structure for benchmarking of certain categories of schemes. Accordingly, the benchmark has been classified as Tier 1 benchmark. Furthermore, the same is effective from 01 December 2021.

This product is suitable for investors who are seeking*:

- Long term capital appreciation
- Investment predominantly in equity and equity related securities, including equity derivatives in Indian markets with key theme focus being emerging companies (small cap stocks); and foreign securities

***Investors should consult their financial advisers if in doubt about whether the product is suitable for them.**

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. As per SEBI circular dated October 5, 2020 on product labelling (as amended from time to time), risk-o-meter will be calculated on a monthly basis based on the risk value of the scheme portfolio based on the methodology specified by SEBI in the above stated circular. The AMC shall disclose the risk-o-meter along with portfolio disclosure for all their schemes on their respective website and on AMFI website within 10 days from the close of each month. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Focused Fund

(**Focused Fund** – An open ended equity scheme investing in maximum 30 stocks across market caps (i.e. Multi-Cap))

Investment Objective: To seek long term capital growth through investments in a concentrated portfolio of equity & equity related instruments of up to 30 companies across market capitalization. However, there is no assurance that the investment objective of the Scheme will be achieved.

HSBC Nifty 50 Index Fund

Index Fund - An open-ended Equity Scheme tracking NIFTY 50 Index.

Investment Objective: The scheme will adopt a passive investment strategy. The scheme will invest in stocks comprising the Nifty 50 index in the same proportion as in the index with the objective of achieving returns equivalent to the Total Returns Index of Nifty 50 index by minimizing the performance difference between the benchmark index and the scheme. The Total Returns Index is an index that reflects the returns on the index from index gain / loss plus dividend payments by the constituent stocks. There is no assurance that the investment objective of the Scheme will be realized.

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. As per SEBI circular dated October 5, 2020 on product labelling (as amended from time to time), risk-o-meter will be calculated on a monthly basis based on the risk value of the scheme portfolio based on the methodology specified by SEBI in the above stated circular. The AMC shall disclose the risk-o-meter along with portfolio disclosure for all their schemes on their respective website and on AMFI website within 10 days from the close of each month. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Nifty Next 50 Index Fund

Index Fund - An open-ended Equity Scheme tracking Nifty Next 50 Index

Investment Objective: The scheme will adopt a passive investment strategy. The scheme will invest in stocks comprising the Nifty Next 50 index in the same proportion as in the index with the objective of achieving returns equivalent to the Total Returns Index of Nifty Next 50 index by minimizing the performance difference between the benchmark index and the scheme. The Total Returns Index is an index that reflects the returns on the index from index gain/ loss plus dividend payments by the constituent stocks. There is no assurance that the investment objective of the Scheme will be realized.

As a result of the acquisition, HSBC AMC will have two equity linked savings scheme ("elss") in the form of HSBC Tax Saver Equity Fund (an open ended elss with a statutory lock in period of 3 years and tax benefit), and L&T Tax Advantage Fund (to be renamed as HSBC ELSS Fund). As per elss guidelines, a mutual fund can have only one open-ended elss scheme. In view of the said restriction, we propose to stop the subscription into HSBC Tax Saver Equity Fund from close of business hours on November 25, 2022. Hence, no sip, stp-in, or switch into the fund will be permitted from close of business hours on November 25, 2022. For the sake of clarity, we wish to inform you that the unitholders will be allowed to hold their existing investments in this fund, except that no further investments / subscription would be accepted in this fund. However, unitholders will be permitted to redeem / switch out their units post the mandatory lock-in period.

⁴SEBI vide its circular no. SEBI/HO/IMD/IMD-II DF3/P/CIR/2021/652 dated October 27, 2021, on 'Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes' has introduced two-tiered structure for benchmarking of certain categories of schemes. Accordingly, the benchmark has been classified as Tier 1 benchmark. Furthermore, the same is effective from 01 December 2021.

⁵Fund's benchmark has changed with effect from April 01, 2022.

PRC Matrix

Credit Risk → Interest Rate Risk ↓	Potential Risk Class		
	Relatively Low (Class A)	Moderate (Class B)	Relatively High (Class C)
Relatively Low (Class I)	A-I		
Moderate (Class II)			
Relatively High (Class III)			

Potential Risk Class ('PRC') matrix indicates the maximum interest rate risk (measured by Macaulay Duration of the scheme) and maximum credit risk (measured by Credit Risk Value of the scheme) the fund manager can take in the scheme. PRC matrix classification is done in accordance with and subject to the methodology/guidelines prescribed by SEBI to help investors take informed decision based on the maximum interest rate risk and maximum credit risk the fund manager can take in the scheme, as depicted in the PRC matrix.

This product is suitable for investors who are seeking*:

- Income over short term and high liquidity
- Investment in debt & money market instruments with overnight maturity

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. As per SEBI circular dated October 5, 2020 on product labelling (as amended from time to time), risk-o-meter will be calculated on a monthly basis based on the risk value of the scheme portfolio based on the methodology specified by SEBI in the above stated circular. The AMC shall disclose the risk-o-meter along with portfolio disclosure for all their schemes on their respective website and on AMFI website within 10 days from the close of each month. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Liquid Fund

Liquid Fund - An open-ended liquid scheme. A relatively low interest rate risk and moderate credit risk.

Investment Objective: To provide reasonable returns, commensurate with low risk while providing a high level of liquidity, through a portfolio of money market and debt securities. However, there can be no assurance that the Scheme objective can be realised.

Credit Risk →	Relatively Low (Class A)	Moderate (Class B)	Relatively High (Class C)
Interest Rate Risk ↓			
Relatively Low (Class I)		B-I	
Moderate (Class II)			
Relatively High (Class III)			

Potential Risk Class ('PRC') matrix indicates the maximum interest rate risk (measured by Macaulay Duration of the scheme) and maximum credit risk (measured by Credit Risk Value of the scheme) the fund manager can take in the scheme. PRC matrix classification is done in accordance with and subject to the methodology/guidelines prescribed by SEBI to help investors take informed decision based on the maximum interest rate risk and maximum credit risk the fund manager can take in the scheme, as depicted in the PRC matrix.

This product is suitable for investors who are seeking*:

- Overnight liquidity over short term
- Investment in Money Market Instruments

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. As per SEBI circular dated October 5, 2020 on product labelling (as amended from time to time), risk-o-meter will be calculated on a monthly basis based on the risk value of the scheme portfolio based on the methodology specified by SEBI in the above stated circular. The AMC shall disclose the risk-o-meter along with portfolio disclosure for all their schemes on their respective website and on AMFI website within 10 days from the close of each month. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Money Market Fund

Money Market Fund - An open-ended debt scheme investing in money market instruments. A relatively low interest rate risk and moderate credit risk

Investment Objective: The primary objective of the Scheme is to generate regular income through investment in a portfolio comprising substantially of money market instruments. There is no assurance that the objective of the Scheme will be realised and the Scheme does not assure or guarantee any returns.

⁷**HSBC Infrastructure Fund:** The launch date of the S&P BSE India Infrastructure Index (INR) is May 19, 2014 whereas the inception date of the scheme is September 27, 2007. The corresponding benchmark returns since inception of the scheme is not available. All index data is available on the website of Asia Index Pvt. Ltd. a joint venture between BSE Ltd. and S&P Dow Jones Indices LLC. (source: <http://www.asiaindex.co.in>).

⁸**HSBC Small Cap Fund:** The launch date of the S&P BSE 250 Small Cap Index (INR) is November 30, 2017 whereas the inception date of the scheme is May 12, 2014. The corresponding benchmark returns since inception of the scheme is not available. All index data is available on the website of Asia Index Pvt. Ltd. a joint venture between BSE Ltd. and S&P Dow Jones Indices LLC. (source: <http://www.asiaindex.co.in>).

³**HSBC Mid Cap Fund:** The launch date of the S&P BSE 150 Mid Cap TRI is November 30, 2017 whereas the inception date of the scheme is August 09, 2004. The corresponding benchmark returns since inception of the scheme is not available. All index data is available on the website of Asia Index Pvt. Ltd. a joint venture between BSE Ltd. and S&P Dow Jones Indices LLC. (source: <http://www.asiaindex.co.in>).

⁴**HSBC Large Cap Fund:** The launch date of the Nifty 100 TRI is Jan 01, 2003 whereas the inception date of the scheme is Dec 10, 2002. The corresponding benchmark returns since inception of the scheme not available. (Methodology Document for Equity Indices (niftyindices.com))

⁵**HSBC Corporate Bond Fund:** The launch date of the NIFTY Corporate Bond Index B-III is Sep 03, 2001 whereas the inception date of the scheme is Mar 31, 1997. The corresponding benchmark returns since inception of the scheme not available. (NSE_Indices_Riskometer_2022-11.pdf (niftyindices.com))

⁶**HSBC Gilt Fund:** The launch date of the NIFTY All Duration G-Sec Index is Sep 03, 2001 whereas the inception date of the scheme is Mar 29, 2000. The corresponding benchmark returns since inception of the scheme not available. (NSE_Indices_Riskometer_2022-11.pdf (niftyindices.com))

⁷**HSBC Liquid Fund:** Since there was no continuous NAV history available for the surviving Plan of HSBC Liquid Fund prior to May 19, 2011, returns since the said date have been considered for calculating Since Inception performance. The inception date of HSBC Liquid Fund however is December 4, 2002.

Since inception returns are to be provided since the date of allotment of units.

Additional benchmark as per SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021.

IDCW are assumed to be reinvested and Bonus is adjusted.

The performance details provided herein are of Regular as well as Direct Plan - Growth Option. Returns on ₹10,000 are point-to-point returns for the specific time period, invested at the start of the period. The returns for the respective periods are provided as on last business day NAV of December 2022 for the respective schemes. Returns for 1 year and Above are Compounded Annualized. Returns for less than 1 year is Simple Annualized. Load is not taken into consideration for computation of performance. Different plans shall have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged to the Regular Plan. Considering the varying maturities of the close ended schemes, the performance of close-ended schemes is not provided as it is strictly not comparable with that of open-ended schemes.

⁸Post merger performance of the surviving scheme, arising out of merger of schemes with similar features, is computed as per the provisions of SEBI Circular No- SEBI/HO/IMD/DF3/CIR/P/2018/69 dated April 12, 2018 using the weighted average performance of both transferor and transferee schemes. In other cases, performance is computed using the Applicable NAV of the surviving/continuing schemes.

Past performance may or may not be sustained in the future.

Minimum Application Amount (SIP) for all schemes:

Particulars	Frequency	Details
Minimum no. of instalments and Minimum amount per instalment	Weekly	12 instalments of Rs. 500/- each and in multiples of Re. 1/- thereafter
	Monthly	6 instalments of Rs. 1,000/- each and in multiples of Re. 1/- thereafter
	Quarterly	4 instalments of Rs. 1,500/- each and in multiples of Re. 1/- thereafter
Minimum aggregate investment - Rs. 6,000/- and in multiples of Re. 1/- thereafter		

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme,

AUM: AUM or Assets Under Management refers to the recent updated cumulative market value of investments managed by a mutual fund or any investment firm.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Beta: Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

Exit Load: Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹100 and the exit load is 1%, the redemption price would be ₹ 99 per unit.

Entry Load: A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹100 and the entry load is 1%, the investor will enter the fund at ₹101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the services rendered by the distributor.

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

Modified Duration: Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

NAV: The NAV or the Net Asset Value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

SIP: SIP or Systematic Investment Plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹500 every 15 of the month in an equity fund for a period of three years.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

Macaulay Duration: The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. It is a measure of how long it takes for the price of a bond to be repaid by the cash flows from it.

Tracking Difference: Tracking Difference is the annualized difference of daily returns between the index and the NAV of the Index Fund.
