

Equity Market Review

April, 2024

- ◆ Indian equity indices continued their upward trend in April 2024 supported by strong DII inflow offsetting FII outflow. S&P BSE Sensex and NSE Nifty gained 1.1%/1.2%, respectively for the month.
- ◆ The broader market moved up even more sharply. BSE Mid Cap index rose 7.2% while the BSE Small Cap index bounced back with a 9.6% gain, more than making up for the 5.5% decline over the past two months.
- ◆ Metals remained the best performing sector in April followed by Power and Realty. Oil & Gas, Banks, Auto and Power outperformed the Nifty while FMCG and Healthcare were in line. IT sector however delivered negative returns for the second consecutive month on the back of weak outlook from companies.

Domestic Indices	Last Close	1 Month (Change)	CYTD 24 (Change)

CY24YTD	0.2	5.0	13.8	4.8	18.6	-12.7

- ◆ CPI was at 4.9% (YoY) in March down from 5.1% (YoY) in February while core-core inflation (i.e. core inflation ex petrol and diesel) remained at 3.5% (YoY) same level as in February.
- ◆ Industrial production growth (IIP) stood at 5.7% (YoY) in February up from 4.1% (YoY) in January.
- ◆ Gross GST revenue collection in the month of March stood at Rs 2.1 tn, up 12% (YoY).
- ◆ Other key developments during the month include – IMF raised India's GDP growth forecast by 30 bps to 6.8% for FY24. It projects a 6.5% GDP growth for FY25.

Valuations

Nifty FY25 consensus earnings estimate saw a small decline while FY26 saw a 2% upgrade. Nifty now trades on 20.6x 1 year forward PE more than 10% above its 10-year average and similar to its 5-year average. Valuations in Mid Cap and Small Cap space are much more elevated.

Macro View

In our view, the global macro environment remains challenging with heightened geo-political and economic uncertainties. US bond yields remain high putting pressure on interest rates and currencies globally. For India, growth has continued to remain strong with GDP growth of 8.4% in Q3FY24 driven by strong government spending on infrastructure and pickup in manufacturing and construction. The 2024 interim budget has re-affirmed government's focus on infrastructure. At the same time reduction in fiscal deficit should also help in easing of domestic interest rates. However, after last year's patchy monsoon, a good monsoon will be an important factor for rural demand and overall consumption growth in the economy in FY25.

Outlook

India starts 2024 on a strong footing with positive growth momentum. We expect India's investment cycle to be on a medium term uptrend supported by rising government investment in infrastructure and recovery in real estate cycle. We also expect higher private investments in renewable energy and related supply chain, localization of higher-end technology components, and India becoming a more meaningful part of global supply chains. Finally, we expect improvement in consumption as the impact of high inflation fades and real incomes start to grow again. However, in our view, several of these positives are getting discounted by the high valuations currently prevailing in the equity market. While we remain constructive on Indian equities supported by the more robust medium term growth outlook we would caution against high return expectations.

Key Drivers For Future

On the headwinds, we have

- ◆ **Moderating global growth** due to higher interest rates is likely to weigh on demand going forward.
- ◆ **Global commodity prices:** Decline in crude oil and fertilizers has been a positive for India from inflation, fiscal deficit and corporate margins perspective in FY24. However, any significant increase would be a headwind.
- ◆ **Other factors/risks:** High fiscal deficit and weak monsoon.

We see the following positives for the Indian market:

- ◆ **Government infrastructure spending:** Strong government thrust on infrastructure spending is clearly supporting the economy and has been one of the big positive contributors to H1FY24 GDP growth.
- ◆ **Recovery in real estate cycle:** Real Estate remains another strong medium term growth driver having weathered the impact of higher interest rates. Demand trends in top metro cities remain strong and inventory levels have declined.
- ◆ **Recovery in private capex:** Industry capacity utilization based on RBI survey data is at a reasonably high level and indicates potential for increase in private capex going forward. Also, continued expansion of the Production Linked Incentive (PLI) scheme is likely to further increase private investments in targeted sectors. We also expect higher private capex in renewable energy.

Note: Returns mentioned in the report are the Total Return or TR variants of the respective domestic indices. USD return for global indices.
