HSBC Global Equity Climate Change Fund of Fund (HGEF)

(An open ended fund of fund scheme investing in HSBC Global Investment Funds – Global Equity Climate Change)

January 2024

Investment Objective

HSBC Global Equity Climate Change Fund of Fund's Investment Objective - To provide long term capital appreciation by investing predominantly in units of HSBC Global Investment Funds – Global Equity Climate Change (HGECC). The Scheme may also invest a certain proportion of its corpus in money market instruments and / or units of overnight / liquid mutual fund schemes, in order to meet liquidity requirements from time to time. However, there is no assurance that the investment objective of the Scheme will be achieved.

Climate Change - The opportunities beckon

Renewable Energy

Sustainable transition away from fossil fuels will need to be USD110trn of investment in renewable energies cumulatively to 2050.¹

Energy Efficiency

Globally enhanced energy efficiency investments could boost cumulative economic output by USD18tr to 2035. Increasing growth by 0.25-1.1% per year.²

Clean Transport

Improved and digitalised planning in shipping could lead to fewer kilometers travelled, allowing for industry revenue benefits of USD1.5trn by 2025.³

Green Buildings

In emerging markets alone, Green Buildings are expected to be a USD24.7 trillion investment opportunity by 2030.⁴

Sustainable Water & Wastewater Management

Water productivity improvements could cost USD60 billion annually over the next two decades. Many of these investments yield positive returns in just three years.⁵

Climate Change Adaptation

Research has shown that spending USD1.8trn on specific adaptation areas between 2020 and 2030 could generate USD7.1trn in total net benefits.⁶

Flood defences systems and related infrastructure information support systems, such as climate observation and early warning systems

Pollution & waste prevention and control

Air pollution kills 7 million people each year, costing USD5trn/year.⁷

Circular economy and resource efficiency

Switching to a circular economy could unlock an additional USD4.5trn of global GDP by 2030.⁸

Resource-efficient packaging and distribution
Industrial carbon capture and storage technology

Natural capital & ecosystems

Enhancing coastal wetlands could save the insurance industry USD52bn a year in reduced losses from storms and flood damage.⁹

Themes such as Clean transport, Clean energy, Water management provide great investment potential

HGIF Global Equity Climate Change – Monthly Commentary

At sector level, stock selection was positive for the month. Positive performance came from Industrials and Information Technology, though this was offset by negative stock selection in Energy and Materials.

At country level, stock selection was positive for the month. Positive performance came from USA and Italy, though this was offset by negative stock selection in Finland and France.

Italian Industrials security, PRYSMIAN SPA with total effect 0.55% is the top contributor. Additionally, Swedish Industrials security, NIBE INDUSTRIER AB-B SHS was the second largest contributor with total effect 0.31%. USA Real Estate security, PROLOGIS INC also contributed with total effect 0.29%.

On the other side, detractors included USA Industrials security VERISK ANALYTICS INC with total effect -0.27%, Finnish Energy holding, NESTE OYJ with total effect -0.18%, and USA Information Technology holding, BROADCOM INC with total effect -0.10%.

During this period, positions were initiated in SPIE SA.
No positions were closed.

Sector and Country allocation effects are residual to stock selection. At a country level, effects were negative, given an underweight exposure to Australia. At sector level, effects were positive, given an overweight exposure to Industrials.
