Credit Process - Internal Credit Ratings a key differentiating factor

Long-established, structured and comprehensive credit process

One of the pioneers in undertaking credit assessment through internal ratings; been using the same since 2012

Focus is on a bottom-up analytical approach for credit evaluation

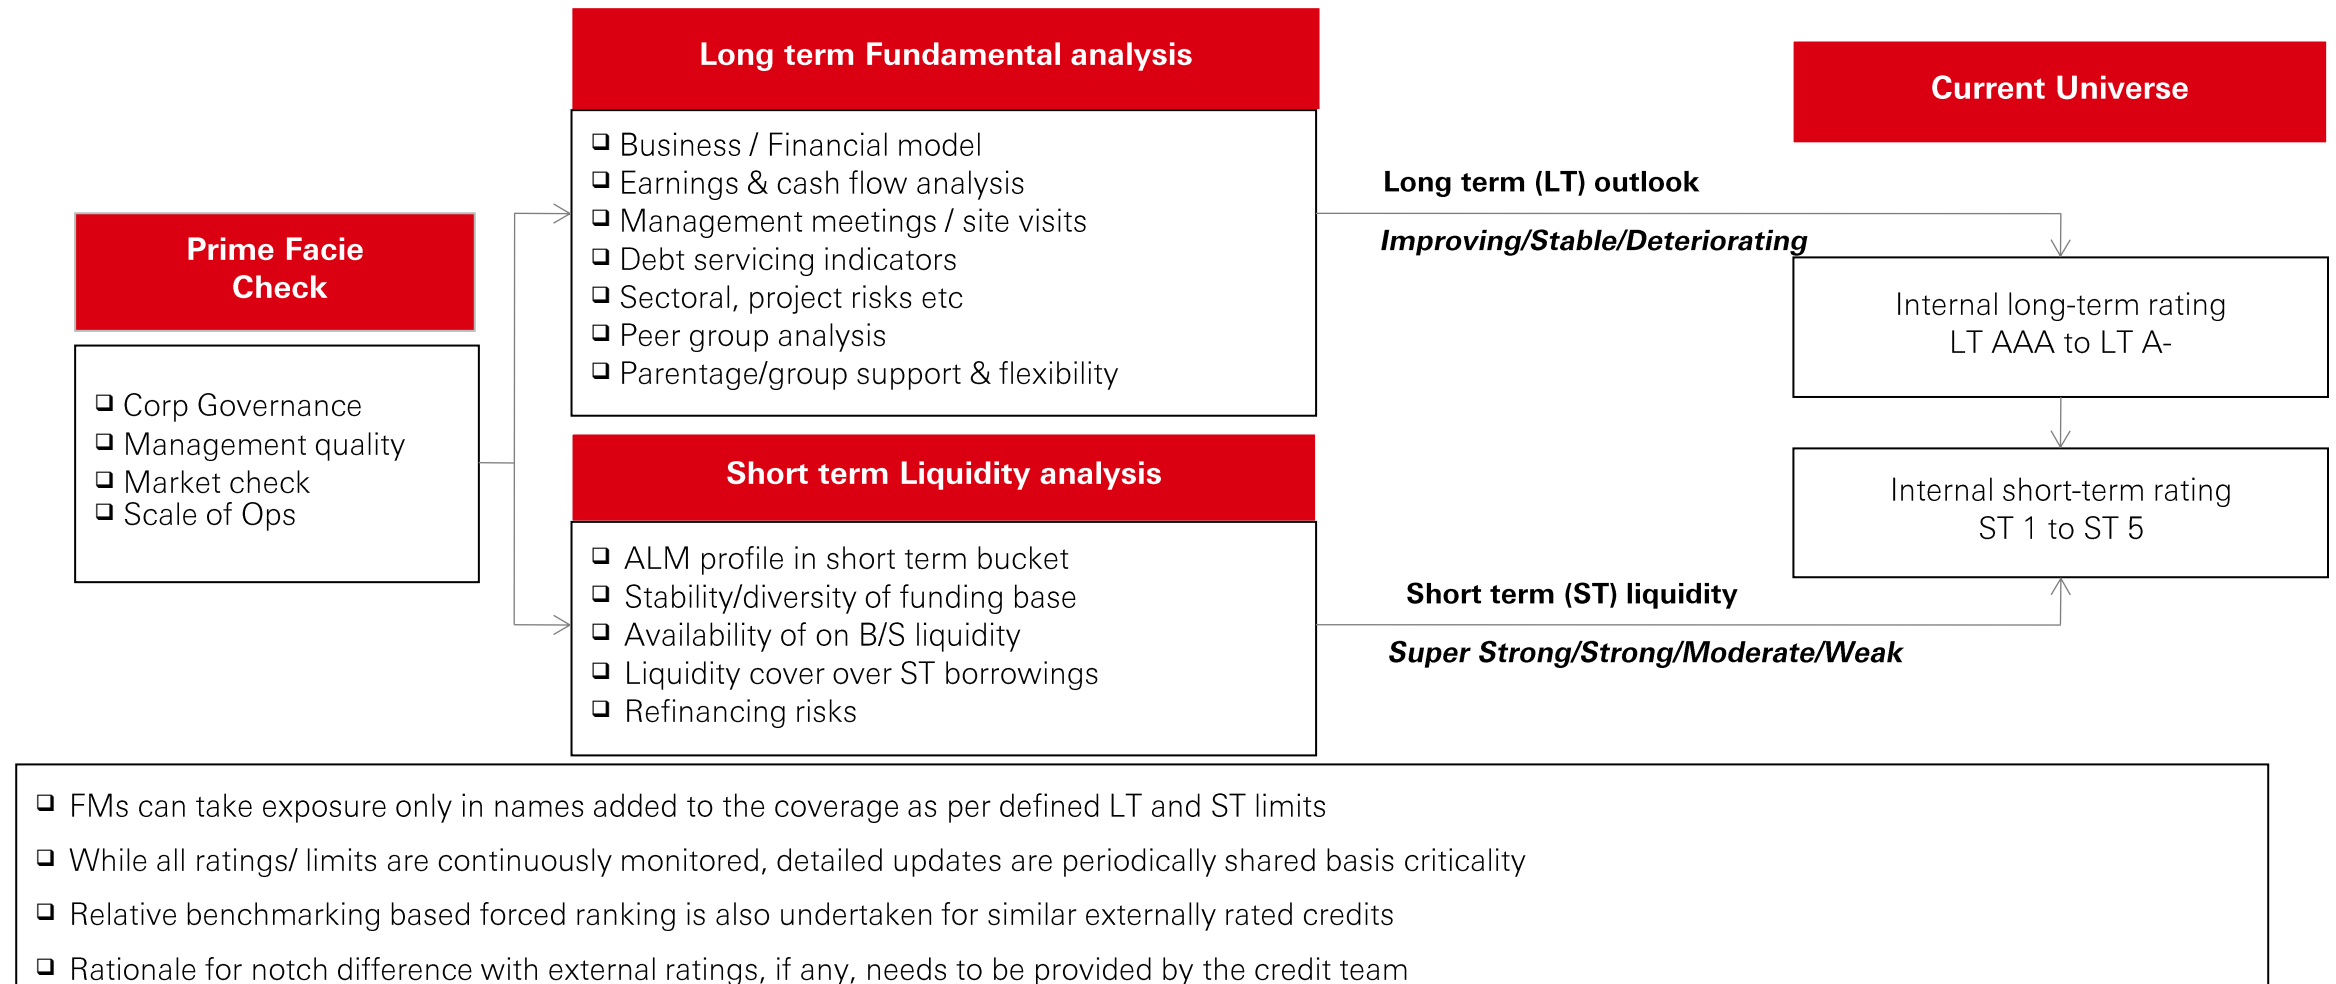

Granular ratings assigned on both LT and ST rating scales which in-turn are used to determine the internal limits

Amidst challenging credit environment, up-to-date internal ratings and limits aid in managing and correctly pricing credit risks

Internal ratings framework – LT/ST mapping

Internal Rating Framework								
Company's LT fundamental profile assessed to assign appropriate LT rating								
Internal Long-Term Rating		LT AAA	LT AA+	LT AA	LT AA-	LT A+	LT A	LT A-
Company's ST liquidity profile assessed to assign appropriate ST rating	Internal Short-Term Rating*							
	Super Strong	ST 1	ST 1*	ST 2	ST 2	ST 3	ST 3	ST 4
	Strong	ST 1	ST 2	ST 2	ST 3	ST 3	ST 4	ST 5

	Weak	ST 3	ST 3	ST 4	ST 4	ST 5	ST 5	ST 5

**Exceptions from this mapping can be taken based on individual credit assessment and adequate justification*

- Both LT and ST ratings are assigned irrespective of potential investment in only LT or only ST instruments
- In rare cases of extreme credit deterioration in the issuer's profile or default by the issuer on any of the instrument, the LT ratings below A- are used (such as LT BBB, LT D etc.)

Early Warning Signals (EWS) : 5-Factor process

Alerts are broadly classified into 5 parameters

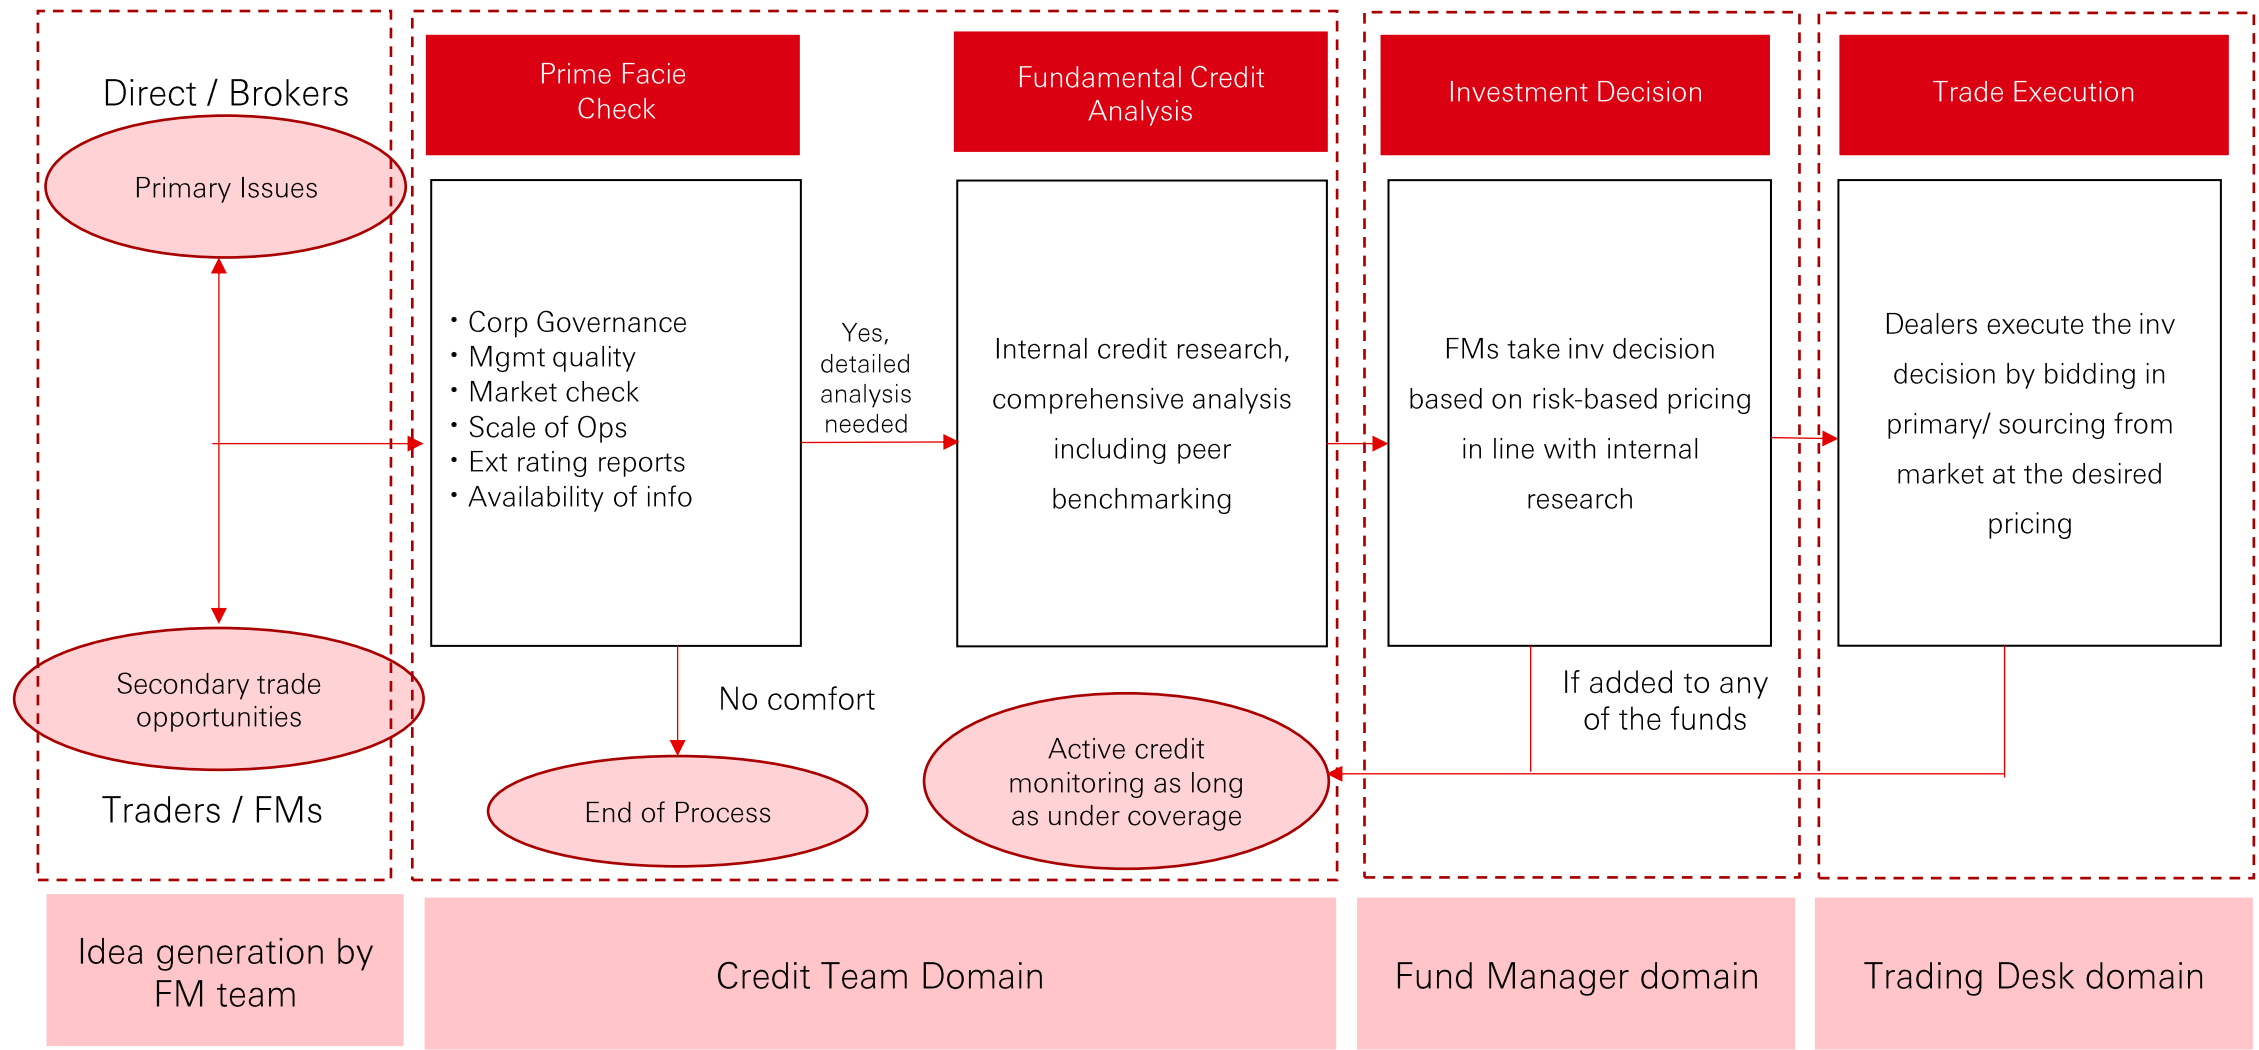

- As part of as per CHAPTER 4: RISK MANAGEMENT FRAMEWORK of SEBI Master Circular on Mutual Funds dated June 27, 2024, AMCs were required to take appropriate measures to capture Early Warning Signals (EWS) and report the same to trustees in case of alerts deemed material enough (see excerpt of circular below).
- Adequate provisions to generate early warning signals (including yield based alerts) on deterioration of credit profile of the issuer. Based on the alerts generated, the AMCs shall take appropriate measures and report the same to trustees.
- Prior to the above circular, credit team captured alerts on an as-and-when basis and reported the same to fund management team.
- As a result of the above circular, a more rigorous and enhanced process to capture EWS alerts was instituted to further strengthen the credit risk monitoring framework
- The 5-factor EWS monitoring framework as shown alongside captures all the daily events linked to issuers
- Credit team may present a detailed update based on the materiality of the above alerts and accordingly, take a timely and appropriate rating action. The issuer limit may also be placed on hold for incremental exposure.

Intertwining the EWS process with regular credit updates strengthens our credit risk monitoring framework

Mutual Fund Regulatory Landscape – changes have led to significant industry de-risking

- Introduction of Marked to Market on all securities more than 1 day residual maturity
- Introduction of graded exit load of 7 days for Liquid Funds, reducing flow volatility significantly
- Minimum portfolio disclosure - fortnightly
- Introduction of Liability driven Liquidity requirements. Each fund to have different liquidity requirement based on fund investor concentration, with minimum liquidity of 20% /10% respectively for Liquid / non-liquid funds
 - Liquidity Ratio based on 30-day RaR (LR-RaR) : Eligible instruments - Tbills and cash equivalents
 - Liquidity ratio based on 30-day Conditional Redemption at Risk (LR-CRaR) : Eligible instruments – LRAR + <30 days CDs

Top-down assessment suggests moderation in duration bias

- Macro economic factors along with liquidity measures by RBI positive for rates
- MPC has eased Repo Rate by a cumulative of 100 bps since Feb 2025; Change in stance from 'accommodative' to 'neutral'
- Frontloading of rate cuts along with stance change leaves limited room available for further easing; space could open up if growth or inflation undershoot RBI estimates
- Liquidity expected to remain sufficiently positive for the foreseeable future due to RBI measures and 100 bps of CRR cut
- Attractive corporate bonds spreads pose the opportunity to capture spread compression
