[#] Sonal Gupta is dedicated fund manager for investments in foreign securities by all the schemes of HSBC Mutual Fund.

Why HSBC Flexi Cap Fund?

- To seek an exposure to any one or all across market capitalisations in the portfolio to get a value from opportunities in small, mid and or large cap segments
- Philosophy of a Flexi Cap Fund is to run it like an all-weather portfolio, i.e., irrespective of market cycles, these investments aim to offer you risk-adjusted performance over long run.
- Aim to create a corpus by generating inflation-adjusted returns to cater to long-term goals

Fund Approach

- Primarily has a bottom-up approach towards portfolio construction and relies on superior stock selection as a source for potential alpha generation.
- The fund aims to identify good quality and sustainable businesses, backed by strong and competent management, with tailwinds for potential earnings growth driven by demand-led volume growth in products, market share gains, margin accretion, financial deleveraging, etc.
- No major sector position and focus on stock selection for alpha
- Stock diversification brings risk mitigation

Investment Objective

To seek long term capital growth through investments made dynamically across market capitalization (i.e., Large, Mid, and Small Caps). The investment could be in any one, two or all three types of market capitalization. The Scheme aims to predominantly invest in equity and equity related securities. However, in line with the asset allocation pattern of the Scheme, it could move its assets between equity and fixed income securities depending on its view on these markets. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.
