Modified Duration	4.75 year	Exit Load / Entry Load		
Macaulay Duration	4.92 year			
Yield to Maturity	7.30%	NIL		

Fund Strategy

- Actively managed fund investing across the yield curve in Govt. Securities and SDLs to generate alpha
- Dynamic duration management to seize potential upsides when interest rates are expected to soften while also reducing risks in an uncertain environment
- Investments in a highly liquid portfolio so as to enable positioning changes based on evolving scenario.
- Overweight duration through higher allocation in 7-10 year part of the yield curve.

Why HSBC Gilt Fund?

- The fund aims to generate alpha through active duration management
- Invests predominantly in sovereign instruments and hence has minimal credit risk
- Irrespective of the interest rate cycle, the fund through active duration management and aggressive cash calls along with dynamic asset allocation has generated positive returns from even the lowest interest rates in the cycle
- The fund is ideal for investors seeking appropriate risk adjusted returns in a volatile interest rate environment.
- In the current scenario where interest rates are nearing the peak in this cycle, there are opportunities to capture alpha through strategic overweight duration in this fund.

¹ SEBI vide its circular no. SEBI/HO/IMD/IMD-II DF3/P/CIR/2021/652 dated October 27, 2021, on 'Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes' has introduced two-tiered structure for benchmarking of certain categories of schemes.
