Why HSBC Flexi Cap Fund?

- To seek an exposure to any one or all across market capitalisations in the portfolio to get a value from opportunities in small, mid and or large cap segments
- True to label fund – The fund will stay true to its objective in keeping with the mandate reposed by the investor whilst investing in the fund
- To create a corpus through generating inflation-adjusted returns to cater to long-term goals

Fund Philosophy

- Prefer dominant and scalable businesses available at reasonable valuations
- Profit pool consolidation with dominant players to continue and disruption to accelerate this shift
- Stock selection focuses on earnings growth trajectory and within that, the emphasis lies on earnings surprises

Investment Objective

To seek long term capital growth through investments made dynamically across market capitalization (i.e., Large, Mid, and Small Caps). The investment could be in any one, two or all three types of market capitalization. The Scheme aims to predominantly invest in equity and equity related securities. However, in line with the asset allocation pattern of the Scheme, it could move its assets between equity and fixed income securities depending on its view on these markets. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.
