Investment Strategy	<p>The aim of the HSBC Tax Saver Equity Fund is to provide long-term capital appreciation from an actively managed portfolio, primarily comprising of a mix of small, mid and large cap stocks. Income is not a primary consideration in the investment policies of the HSBC Tax Saver Equity Fund. The Scheme aims to be predominantly invested in equity and equity related securities. The Fund may also invest in fixed income securities.</p> <p>A top down and bottom up approach will be used to invest in equity and equity related instruments. Investments will be pursued in select sectors based on the Investment Team's analysis of business cycles, regulatory reforms, competitive advantage etc. Selective stock picking will be done from these sectors. The fund manager in selecting scrips will focus on the fundamentals of the business, the industry structure, the quality of management, corporate governance trends, sensitivity to economic factors, the financial strength of the company and the key earnings drivers.</p> <p>Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. Risk will also be reduced through adequate diversification of the portfolio. Diversification will be achieved by spreading the investments over a range of industries/sectors. The Scheme may however, invest in unlisted and/or privately placed and/or unrated debt securities subject to the limits indicated under "Investment Restrictions for the Scheme prescribed in this SID, from issuers of repute and sound financial standing. If investment is made in unrated debt securities, the approval of the Board of the AMC and the Trustees or the Investment Management Committee (within the broad parameters approved by the Board of the AMC and the Trustees) shall be obtained, as per the Regulations.</p> <p>As per the asset allocation pattern indicated above, for investment in debt securities and money market instruments, the Fund may invest a part of the portfolio in various debt securities issued by corporates and/or state and central government. Such government securities may include securities which are supported by the ability to borrow from the treasury or supported only by the sovereign guarantee or of the state government or supported by GOI/state government in some other way.</p> <p>With the aim of controlling risks, rigorous in depth credit evaluation of the instruments proposed to be invested in will be carried out by the Investment Team of the AMC. The credit evaluation includes a study of the operating environment of the company, the past track record as well as the future prospects of the issuer, the short as well as long-term financial health of the issuer. The AMC will also be guided by the ratings of rating agencies such as CRISIL, CARE and ICRA or any other rating agency as approved by the regulators.</p> <p>In addition, the Investment Team of the AMC will study the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The AMC would use this analysis to attempt to predict the likely direction of interest rates and position the portfolio appropriately to take advantage of the same.</p> <p>The Scheme may invest in other Scheme(s) managed by the AMC or in the schemes of any other mutual fund, provided it is in conformity with the investment objectives of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments.</p>																
Risk Profile	<p>Mutual Fund units involve investment risks including the possible loss of principal. Please read SID carefully for details on risk factors before investment.</p> <p>Scheme Specific Risk Factors</p> <p>Risk factors associated with investing in Equity or Equity related Securities</p> <ul style="list-style-type: none"> As the Fund will invest in securities which are denominated in foreign currencies (e.g. US Dollars), fluctuations in the exchange rates of these foreign currencies may have an impact on the income and value of the fund. The investment manager in India may hedge the currency risk based on his view on the forex markets. As the portfolio will invest in stocks of different countries, the portfolio shall be exposed to the political, economic and social risks with respect to each country. However, the investment manager shall ensure that his exposure to each country is limited so that the portfolio is not exposed to one country. Investments in various economies will also diversify and reduce this risk. The fund will be exposed to settlement risk, as different countries have different settlement periods. Equity instruments by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme(s) to make intended securities' purchases due to settlement problems could cause the Scheme(s) to miss certain investment opportunities. In the view of the Fund Manager, investing in Mid and Small Cap stocks are riskier than investing in Large Cap Stocks. To the extent the assets of the scheme are invested in overseas financial assets, there may be risks associated with currency movements, exchange controls, settlements, restrictions on repatriation and transaction procedures in overseas market. The Scheme(s) at times may receive large number of redemption requests which may have an adverse impact on the performance of the Scheme(s) and may also affect all the unit holders as the fund manager needs to liquidate securities to meet the redemptions post which the portfolio is likely to be less liquid <p>Liquidity risk can be defined as inability of the fund manager to exit securities at their fair value in the secondary market whenever there is a need to generate cash. Equity and equity related instruments are subject to liquidity risk. Liquidity risk is generally observed to be elevated in mid and small cap stocks than in large cap stocks. The scheme may have exposure to mid and small cap stocks which usually have a higher impact cost. HSBC monitors liquidity risk on an ongoing basis for both assets and liability side.</p> <p>Restructuring / Rescheduling Risk: There could be cases of restructuring/re-scheduling of particular debt/money market instruments held in the portfolio which could result in the maturity of these instruments going beyond the original maturity date of the instrument. In such cases the fund manager may be constrained to sell these instruments in the market at realizable value and pass on the loss/impact to investors under the Scheme.</p> <p>Risk associated with legal, tax and regulatory risk factors</p> <p>The schemes of the Fund could be exposed to changes in legal, tax and regulatory regime which may adversely affect it and/or the investors. Such changes could also have retrospective effect and could lead to additional taxation imposed on the schemes which was not contemplated either when investments were made, valued or disposed off.</p> <p>Risk factors associated with investing in Fixed Income Securities</p> <p>Subject to the stated investment objective, the Scheme(s) propose to invest in debt and related instruments</p> <ul style="list-style-type: none"> Price-Risk or Interest Rate Risk: As with all debt securities, changes in interest rates may affect the NAV of the Scheme(s) as the prices of securities increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV. 																

In the case of floating rate instruments, an additional risk could be due to the change in the spreads of floating rate instruments. If the spreads on floating rate papers rise, then there could be a price loss on these instruments. Secondly in the case of fixed rate instruments that have been swapped for floating rates, any adverse movement in the fixed rate yields vis-à-vis swap rates could result in losses. However, floating rate debt instruments which have periodical interest rate reset, carry a lower interest rate risk as compared to fixed rate debt instruments. In a falling interest rate scenario the returns on floating rate debt instruments may not be better than those on fixed rate debt instruments. • **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market. • **Credit Risk:** Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e. will be unable to make timely principal and interest payments on the security). Because of this risk, corporate debentures are sold at a yield above those offered on Government Securities, which are sovereign obligations. Normally, the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk. • **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme(s) are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed. • **Duration Risk:** Duration is a risk measure used to measure the bond/security price changes to potential changes in interest rates. Duration of portfolio x the expected changes in rates = the expected value change in the portfolio. Duration is more scientific measure of risk compare to average maturity of the portfolio. The higher the duration of the portfolio, the greater the changes in value (i.e. higher risk) to movement in interest rates. Modified duration is the duration of a bond/security given its current yield to maturity, put/call feature, and an expected level of future interest rates. • **Benchmark Risk:** The floating rate segment of the domestic debt market is not very developed. Currently, majority of the issuance of floating rate papers is linked to NSE MIBOR. As the floating rate segment develops further, more benchmark rates for floating papers may be available in future. The fewer number of benchmark rates could result in limited diversification of the benchmark risk. Different types of securities in which the scheme(s) would invest as given in the SID carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government Securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated. • **Prepayment Risk:** The risk associated with the early unscheduled return of principal on a fixed-income security. The early unscheduled return of principal may result in reinvestment risk. • **Short Selling Risk:** The risk associated with upward movement in market price of security sold short may result in loss. The losses on short position may be unlimited as there is no upper limit on rise in price of a security.

Risk Factors associated with investments in Money Market instruments

• Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's liability to meet the principal payments. • Money market instruments may also be subject to price volatility due to factors such as changes in interest rates, general level of market liquidity and market perception of credit worthiness of the issuer of such instruments. • The NAV of the Scheme's Units, to the extent that the corpus of the Scheme is invested in money market instruments, will be affected by the changes in the level of interest rates. When interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline

Risks associated with Investing in Foreign Securities

• Since the Scheme(s) would invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme(s). • To manage risks associated with foreign currency and interest rate exposure, the Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/RBI from time to time. Offshore investments will be made subject to any/all approvals, conditions thereof as may be stipulated by SEBI/RBI. The Fund may, where necessary, appoint other intermediaries of repute as advisors, custodian/sub-custodians etc. for managing and administering such investments. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs and overseas regulatory costs. To the extent that the assets of the Scheme(s) will be invested in foreign securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

Risks associated with Investing in Derivatives

• The Fund may use derivative instruments like stock index futures, option on stocks, stock indices, interest rate swaps, forward rate agreements or other derivative instruments as permitted under the Regulations and guidelines. As and when the Scheme(s) trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialised instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Also, the market for derivative instruments is nascent in India and so liquidity risk is also pretty high. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be perused by the fund manager involve uncertainty and decision of fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risks associated with Investing in Securitised Debt

Securitised Debt: Securitised debt papers carry credit risk of the Obligors and are dependent on the servicing of the PTC / Contributions etc. However these are offset suitably by appropriate pool selection as well as credit enhancements specified by Rating Agencies. In cases where the underlying facilities are linked to benchmark rates, the securitised debt papers may be adversely impacted by adverse movements in benchmark rates. However this risk is mitigated to an extent by appropriate credit enhancement specified by rating agencies. Securitised debt papers also carry the risks of prepayment by the obligors. In case of prepayments of securities debt papers, it may result in reduced actual duration as compared to the expected duration of the paper at the time of purchase, which may adversely impact the portfolio yield. These papers also carry risk associated with the collection agent who is responsible for collection of receivables and depositing them. The underlying assets in the case of investment in securitised debt could be mortgages or other assets like credit card receivables, automobile/vehicle/personal/commercial/corporate loans and any other receivables/loans/debt.

Risks associated with Securities Lending

Securities Lending: The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme(s) and the approved intermediary

Notwithstanding anything contained in the SAI, SID and Key Information Memorandum of the Scheme the provisions of SEBI (Mutual Funds) Regulations, 1996 and Guidelines thereunder shall be applicable. Investors can also obtain further changes after the date of this Key Information Memorandum from the Mutual Fund / Investor Service Centres or distributors.

Important Instructions

- 1) Please refer to the SID, SAI and the KIM carefully before filling the Application Form.
- 2) Please refer the sections on "Who can invest" and "Who cannot invest" for a list of eligible investors in the SID. Applications from investors resident in USA or Canada will not be accepted.
- 3) All applicants are deemed to have accepted the terms subject to which this offer is being made and bind themselves to the terms upon signing the Application Form and tendering the payment.
- 4) Investors are requested to use the services of AMFI certified Distributors empanelled with the AMC. The AMC shall not be liable to an Investor, with respect to investments made through non-empanelled Distributors.

If the investor wishes to invest directly, i.e. without involving the services of any agent or broker, "DIRECT" should be mentioned in the space provided for "ARN Number" in the Application Form/Transaction Form. Any subsequent change/updation/removal of broker code will be based on the written request from the Unit holder and will be on a prospective basis only from the date when the Registrar executes such written instruction.

Employee Unique Identification Number (EUIN) : SEBI circular CIR/IMD/DF/21/2012 dated September 13, 2012, required creation of a unique identity number of the employee/ relationship manager/sales person of the distributors interacting with the investor for the sale of mutual fund products, in addition to the AMFI Registration Number (ARN) of the distributor. This has been recommended by SEBI in order to avoid any instance of mis-selling, particularly in advisory based transactions. This would further help tackle the problem of mis-selling even if the employee/relationship manager/sales person leave the employment of the distributor. Due to this regulatory change, all employees of distributors who are involved in sale of mutual fund products are required to obtain an Employee Unique Identification Number (EUIN). Applications received without a valid EUIN and/or valid sub-broker code(should be a valid ARN and not an internal code) are subject to rejection by the fund.

Treatment of Financial Transactions Received Through Suspended Distributors :

1. All Purchase/Switch requests (including under fresh registrations of Systematic Investment Plan ("SIP")/Systematic Transfer Plan ("STP") or under SIPs/STPs registered prior to the suspension period) received during the suspension period shall be processed under "Direct Plan" and continue to be processed under "Direct Plan" perpetually unless, after suspension of ARN is revoked, investor makes a written request to process the future instalments/investments under "Regular Plan". HSB Asset Management (India) Private Limited ("AMC") shall also suitably inform the concerned unitholders about the suspension of the distributor from doing mutual fund distribution business.
 2. Any Purchase/Switch or SIP/ STP transaction requests received through the stock exchange platform, from any distributor whose ARN has been suspended, shall be rejected.
 3. Additionally, where the ARN of a distributor has been terminated permanently, the AMC shall advise the concerned unitholder(s), who may at their option, either continue their existing investments under Regular Plan under any valid ARN holder of their choice or switch their existing investments from "Regular Plan" to "Direct Plan" subject to tax implications and exit load, if any.
