Most of us have a tendency to wait until the last moment in the financial year to start making tax saving investments, and more often than not, we end up making the wrong decisions. The key here is to begin investing at the start of the financial year and change the notion of “tax saving” into “tax planning”. This involves creating a strategy to help you maximise your tax savings together with wealth creation.

Investment Objective

To provide long term capital appreciation by investing in a diversified portfolio of equity & equity related instruments of companies across various sectors and industries, with no capitalisation bias. The Fund may also invest in fixed income securities. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.
