How to read Factsheet

Application Amount for Fresh Subscription	This is the minimum investment amount for a new investor in a mutual fund scheme,	Modified Duration	Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.
AUM	AUM or Assets Under Management refers to the recent updated cumulative market value of investments managed by a mutual fund or any investment firm.	NAV	The NAV or the Net Asset Value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.
Benchmark	A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.	Nature of Scheme	The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.
Beta	Beta is an measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.	Rating Profile	Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.
Exit Load	Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹100 and the exit load is 1%, the redemption price would be ₹99 per unit.	Sharpe Ratio	The Sharpe ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.
Entry Load	A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹100 and the entry load is 1%, the investor will enter the fund at ₹101.	SIP	SIP or Systematic Investment Plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹500 every 15 of the month in an equity fund for a period of three years.
Note	SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the services rendered by the distributor.	Standard Deviation	Standard Deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high Standard Deviation, it means its range of performance is wide, implying greater volatility.
Fund Manager	An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.	Yield to Maturity	The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.
Holdings	The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/ securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.	Tracking Difference	Tracking Difference is the annualized difference of daily returns between the index and the NAV of the Index Fund.
Minimum Additional Amount	This is the minimum investment amount for an existing investor in a mutual fund scheme.		

CEO speak

June 2025 marked a month of growth and resilience for the Indian equity markets. The benchmark indices continued with their upwards trend and investor confidence remained strong. This was largely powered by domestic fundamentals, corporate earnings momentum, inflows from FPIs and domestic institutional investors. Easing tensions in the Middle East has also helped the overall buoyancy of the markets. The AUM of the Indian Mutual Fund Industry stood at Rs 72.19 lakh crores as on 31st May 2025. It has grown from Rs 24.55 lakh crores as on 31st May 2020, about 3-fold in a span of 5 years amidst multiple geopolitical uncertainties and market downturns. (Source: www.amfi.com).

As we head into the second half of the year, it's important to pause, reflect on market movements, and refocus on what truly matters—**your long-term financial goals**. In buoyant markets, it's tempting to chase short-term gains. But successful investing is about **staying focused and disciplined**.

3 smart decisions for long term investing:

Avoid timing the markets – Spend time in the market. Equity investing is for long term wealth generation. Your investment time horizon must be 5- 10 years or more. Many investors attempt to jump in and out of the market based on predictions, news cycles, or gut feelings. However, historical data shows that even the most experienced investors rarely get the timing right consistently. Timing often leads to emotional decisions—selling in panic during dips and buying in euphoria at peaks.

Diversify smartly- Review your asset allocation. Depending on your financial goals, diversify into equity, debt and precious metals. In equity funds look at options in large cap, mid cap, small cap, multi-cap, hybrid funds as per your risk appetite and time horizon. Diversification is your built-in risk management tool—use it to protect gains and reduce shocks. Use Systematic Investment Plans (SIPs) to spread your investments over time, helping manage volatility and emotional bias.

Stay focussed on your financial goals- Your long-term financial goals can range from children's education to retirement. Hence your investment decisions should be aligned to these goals. The goals won't change over an investment horizon; hence the market cycles should not create exuberance or panic. It is heartening to see many investors showing a lot of maturity during the market volatility. The continuous growth in the mutual fund inflows is a testament to investor confidence.

India's growth story is supported by strong macro fundamentals, policy reforms, and sectoral momentum in manufacturing, infrastructure, and digital. We at HSBC India Mutual Fund are committed to the India growth story and will continue to bring the best-in-class products and services to our customers. The key message that I want to leave you with is – **"Stick to your plan, review periodically, and stay focused on the long-term goal."**

Happy Investing and Stay Invested.

Kailash Kulkarni

BSE India Infrastructure Index TR	882	2.9%	2.1%
MSCI India USD	1084	3.2%	5.9%
MSCI India INR	3016	3.4%	6.0%
INR - USD	85.8	0.2%	0.2%
Crude Oil	68	5.8%	-9.4%

- Both domestic and FII flows were supportive in June. FIIs invested US\$2.4 bn into Indian equities while DIIs invested US\$8.5 bn. Domestic MFs invested US\$5.0 bn while insurance inflow was US\$3.5 bn.
- RBI reduced the repo rate by a larger-than-expected 50 bps to 5.50% and shifted its monetary policy stance to neutral. It also announced plan to reduce CRR by 100 bps to 3.0%, in four tranches of 25 bps each between September and November this year.
- RBI maintained its GDP growth expectation for FY26 at 6.5% (YoY).
- CPI slowed to an extremely low level of 2.8% (YoY) in May from an already soft 3.2% (YoY) in April due to continued softness in food price inflation. Core-core inflation (i.e. core inflation ex petrol and diesel) at 4.3% (YoY) in May remained similar to 4.4% in April.
- Industrial production growth (IIP) slowed to 1.2% (YoY) in May from 2.7% (YoY) in April.
- Gross GST revenue collection was Rs 1.85 tn in June 2025, up only 6.2% (YoY).

RBI front loads cut to give the economy a push

- Indian equity indices continued to rise at a strong pace in June 2025 in-line with global markets, with BSE Sensex and NSE Nifty gaining 3.0% / 3.4%, respectively.
- Broader markets continued their strong upward trend with NSE Midcap index gaining 4.1% and BSE Smallcap index gaining a 4.4% for the month.
- IT was the best performing sector followed by Healthcare and Realty. Oil & Gas and Metals performed in-line with the Nifty. Auto, Power, Capital Goods and Banks were also positive but underperformed the Nifty. FMCG delivered small negative returns in June.

Global market update

- MSCI World index also saw a strong rally of 4.2% in June. This was led by US (S&P 500) rising 5.0% while MSCI Europe rose 2.0% and MSCI Japan rose 1.6%. MSCI EM also rose 5.7% supported by a 3.1% rise in MSCI China. Crude oil also rose 5.8% in June but is still down 9% for the year.

Global Market Indices

Indices	Last Close	1 Month (Change)	CYTD 25 (Change)
International (in USD)			
MSCI World	4,026	4.2%	8.6%
Dow Jones	44,095	4.3%	3.6%

MSCI EM	1,223	5.7%	13.7%
MSCI Europe	2,417	2.0%	20.7%
MSCI UK	1,421	1.2%	16.7%
MSCI Japan	4,345	1.6%	10.5%
MSCI China	74	3.1%	15.5%
MSCI Brazil	1,476	7.2%	25.5%

Valuations

Nifty consensus EPS estimate for CY25/26 saw a cut of 2% during Jun. This along with the market recovery, Nifty now trades on 20.8x 1-year forward PE. This is now 7% above with its 5-year average and a ~15% premium to its 10-year average. Valuations in Midcap and Smallcap space have also recovered following the sharp rally over the last few months.

Macro View

In our view, global macro environment remains challenging with heightened geo-political and economic uncertainties. Announcement of reciprocal tariffs by the US administration could significantly impact US and global growth outlook, if the tariffs stay in place. For India, GDP growth has further accelerated to 7.4% (YoY) in Q4FY25. We believe government has tried to partly address the slowdown in private consumption through the income tax rate cuts in the Union Budget. While government capex is moderating, private capex may take time to recover given global uncertainties. RBI is now trying to aggressively ease policy rates and boost liquidity. With USD weakening and decline in crude prices the room for easing has increased further. Forecast of an above normal monsoon is also a positive for rural demand.

Outlook

We believe growth cycle in India may be bottoming out. Interest rate and liquidity cycle, decline in crude prices and normal monsoon are all supportive of a pick-up in growth going forward. Although, global trade related uncertainty remains a headwind to private capex in the near term, we expect India's investment cycle to be on a medium-term uptrend supported by government investment in infrastructure and manufacturing, pickup in private investments and a recovery in real estate cycle. We expect higher private investments in renewable energy and related supply chain, localization of higher-end technology components, and India becoming a more meaningful part of global supply chains to support faster growth. Post the recent rally, Nifty valuations are now at a premium to its 5/10-year average. We remain constructive on Indian equities supported by the more robust medium term growth outlook.

Key drivers for future

On the headwinds, we have

- **Weak global** growth is likely to remain a headwind on demand going forward.
- **Global policy uncertainty:** Risk of tariffs and general policy uncertainty, mercantilist policies of certain countries and geo-political conflicts are likely to be a headwind to private investments.
- **Other factors / risks:** Sharp slowdown in government capex.

We see the following positives for the Indian market:

- **Recovery in private capex:** Industry capacity utilization based on RBI survey data is at a reasonably high level and

indicates potential for increase in private capex going forward. Also, continued expansion of the Production Linked Incentive (PLI) scheme is likely to further increase private investments in targeted sectors. We also expect higher private capex in renewable energy.

- **Supportive real estate cycle:** Real Estate remains another strong medium term growth driver having weathered the impact of higher interest rates. Demand trends in top metro cities remain strong and inventory levels have declined.
- **Global commodity prices:** Benign global prices of crude oil and fertilizers has been a positive for India from inflation, fiscal deficit and corporate margins perspective in FY24-25.

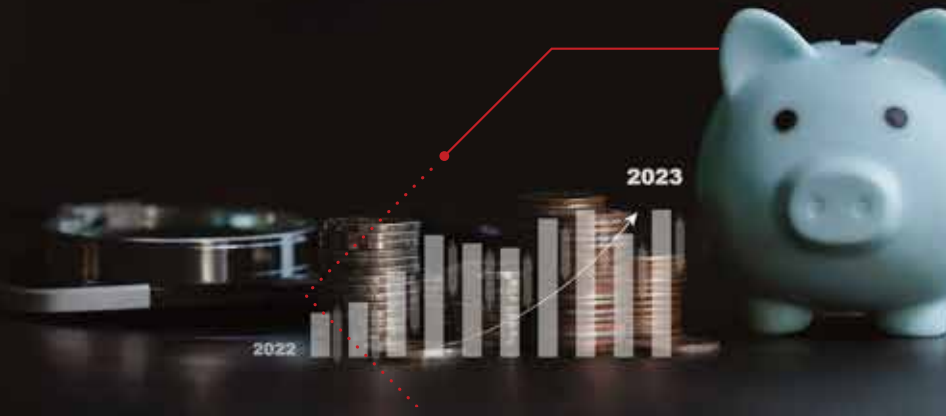

Past performance may or may not be sustained in the future and is not indicative of future results.

Note: Returns mentioned in the report are the Total Return or TR variants of the respective domestic indices. USD return for global indices. DEBT MARKETS

June 2025

Bountiful rains for India in this deluge of global uncertainty

Unlike the rain clouds, the global uncertainty cloud did not wither away in June which in fact even saw rainstorm in the form of Israel-Iran conflict mid-June adding to the woes of further escalation. This had consequently stormed-out investor sentiments across asset classes which are still reeling under the pressure as the deadline of reciprocal tariffs approaches on 9-Jul. During the 12-day conflict, oil prices spiked ~17% and gold prices rose 5% from their month ago levels; the EM and Asian currencies faced the headwinds from these geopolitical developments.

A few silver linings emerged, esp. the ceasefire agreement by Israel-Iran as concerns around supply disruptions and crude oil price shocks waned – and volatility eased with most EM assets and FX seeing gains coupled with dollar softening.

Another silver lining was the US and China finalizing trade terms they reached in the May-month in Geneva; these esp. included China's commitment to deliver rare earths used in various industries*. Furthermore, the expectation of the US reaching trade deals with ten other major trading partners remains to be seen. For us, a keen eye is on the US-India trade deal with Indian members end-June visit to the US to negotiate the terms of deal; this April, the US levied 26% of reciprocal tariffs on India.

One of the most tracked lead indicators has been PMI Manufacturing, which in the last 6M has displayed that the sentiments have weakened for several Asian peers, especially in the June-quarter. Meanwhile, PMI prints for India continued to stay well in the positive. While PMI is like soft data, the hard data shows that India's macros have held steady in CY25 YTD. The lead indicators paint a mixed story.

For now, there is optimism around improvement in rural demand following the healthy progress of South-west monsoon. All-India precipitation has been encouraging with rains 9% above normal as of end-June 2025. The crop sowing activity is also progressing well with Kharif sowing at +10% YoY as of 27-June. It is raining good news, on this front.

Onset of monsoon season was early, as was the RBI-MPC's policy action on 6-Jun wherein it pre-emptively, proactively front-loaded the rate cuts – reducing the Repo Rate by 50bps to 5.50% and Cash Reserve Ratio by 100bps to 3.0% (wef Sep-Dec 2025) paving the way for faster policy transmission as well as easy liquidity conditions. The aggressive liquidity measures have already pump-primed the system liquidity into surplus; on an average it is now tracking 1.2% of NDTL for Jun'25 vs a peak deficit of 1.5% of NDTL seen in Jan'25. Different asset classes reacted differently to the policy action as the MPC also changed the stance to 'neutral' by further citing that there is limited policy space to act to support growth.

The June RBI-MPC minutes did reveal that the MPC members focused on supporting growth and hence in a 5-1 vote decided to go for a front-loaded rate cut. The benign inflation trend and trajectory paved the way for aggressive easing. The minutes showed that members are now focused on policy transmission. With EBLR book at ~62% of the book, transmission is likely to be faster; while the cost of borrowing for Banks is falling only gradually. Latest data shows that credit off-take is losing momentum with across-the-board slower run-rate, YoY.

Our Take: It was a jammed-up June - with RBI-MPC's front-loaded policy action causing a knee-jerk reaction in the fixed income markets which remained unresponsive even when the latest CPI inflation print came in lower at 2.8% YoY. With June inflation print expected to be even softer, it is seen pull the Q1FY26 average lower to ~2.7% vs MPC's estimates of 2.90%. We expect inflation to remain benign while signs on economic activity remain mixed especially with respect to credit off-take which has seen momentum fade. Governments' spending especially on capital account has been positive, YoY & MoM. On the external sector front, the recent data further affirms that the current account deficit (CAD) would stay benign, and it would be the capital flows that need to be tracked. For now, given the healthy FX Reserves at US\$ 697bn, the RBI's forwards book maturing without significant implications on the FX reserves and the exchange rate reaffirm that India's external positioning remains resilient. While the USDINR reacted to the geopolitical developments and oil price spike, intermittently during June, but it stabilized as situation improved, moving in sync with EM peers. The RBI's forwards book maturity also has not impacted the system liquidity conditions over the last couple months and RBI's aggressive liquidity steps have pushed the durable liquidity well into the surplus. All-in-all, India's macros remain steady, and all eyes will be on how the policy moves through the system, with focus on transmission. Also, after reading the MPC minutes and in the current macroeconomic settings, we think that the RBI would ensure the system liquidity remains in abundance so as to quicken transmission and most likely to maintain a status-quo on the Repo rate (at 5.50%) at the Aug'25 policy. Currently, the surplus liquidity is hovering around 1.2% of NDTL levels. Recently, the RBI announced shorter dated Variable Rate Reverse Repo auctions which we believe is primarily to fine-tune the system liquidity surplus and also to anchor the overnight rates SDF-Repo Rate the corridor which is in the range of 5.25-5.50%. We continue to expect system liquidity to be in surplus zone through CY25.

Fund positioning

Following the RBI-MPC policy action, we believe room for further policy easing will only open up if the Fed cuts earlier than anticipated, or if domestic growth or inflation sharply falls below estimates. In this backdrop, we expect G-Sec rates to consolidate and broadly remain range bound. However, RBI has reiterated that liquidity will remain in surplus for the foreseeable future, which implies that liquidity will remain the main driver of softer yields domestically, going forward. Lower absolute levels in G-Sec along with lower differential with US treasuries point towards a gradual reallocation towards corporate bonds to chase carry.

Corporate bonds in the 2-4 year segment continue to offer 60-80 bps over the corresponding, which makes it the sweet spot on the corporate yield curve. We expect spreads to compress going forward by 20-25 bps. This strategy is reflected across our bond funds, where we have reduced exposure to G-Sec and increase exposure to 2-4 year corporate bonds. **HSBC Corporate Bond Fund, HSBC Short Duration Fund, HSBC Banking and PSU Debt Fund and HSBC Medium Duration Fund** are positioned in the 2-4 year corporate bond segment, to benefit from this positioning. Hence, we recommend these funds as an investment opportunity for investors looking at a short-to-medium term investment horizon.

Portfolio Classification By Market Segment Class (%)

⁶As per clause 1.9 of the SEBI Master Circular for Mutual Funds no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, on 'Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes' has introduced two-tiered structure for benchmarking of certain categories of schemes. Accordingly, the benchmark has been changed to NIFTY 100 TRI Index which has been classified as Tier 1 benchmark. Furthermore, the same is effective from 01 December 2021

This product is suitable for investors who are seeking*:

- To create wealth over long term
- Investment in predominantly large cap equity and equity related securities

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Large and Mid Cap Fund

Large and Mid Cap Fund - An open ended equity scheme investing in both large cap and mid cap stocks.

Investment Objective: To seek long term capital growth through investments in both large cap and mid cap stocks. However, there is no assurance that the investment objective of the Scheme will be achieved.

HSBC Flexi Cap Fund

Flexi Cap Fund - An open ended dynamic equity scheme investing across large cap, mid cap, small cap stocks.

Investment Objective: To seek long term capital growth through investments made dynamically across market capitalization (i.e. Large, Mid, and Small Caps). The investment could be in any one, two or all three types of market capitalization. The Scheme aims to predominantly invest in equity and equity related securities. However, in line with the asset allocation pattern of the Scheme, it could move its assets between equity and fixed income securities depending on its view on these markets. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

⁴As per clause 1.9 of the SEBI Master Circular for Mutual Funds no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, on 'Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes' has introduced two-tiered structure for benchmarking of certain categories of schemes. Accordingly, the benchmark has been classified as Tier 1 benchmark. Furthermore, the same is effective from 01 December 2021.

Note - Criteria for Large, Mid & Small companies - SEBI has demarcated the definitions of large cap, mid cap and small cap companies as given below.

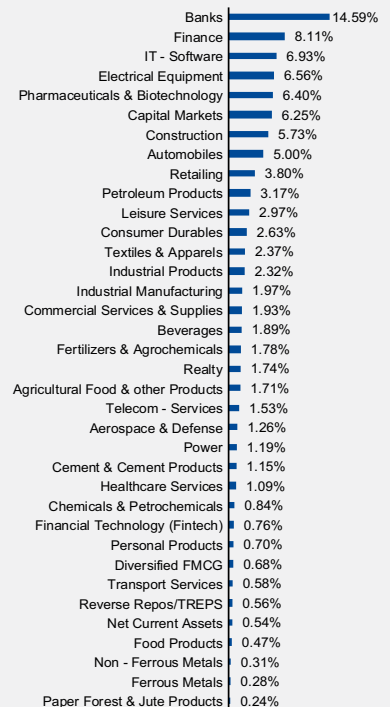

Large Cap: 1st -100th company in terms of full market capitalization, Mid Cap: 101st -250th company in terms of full market capitalization, Small Cap: 251st company onwards in terms of full market capitalization of large/mid/small cap companies. A list of stocks as per above criteria will be uploaded on AMFI website and updated every six months by AMFI.

Portfolio Classification By Market Segment Class (%)⁵

This product is suitable for investors who are seeking*:

- To create wealth over long-term
- Investment predominantly in equity and equity related securities across market capitalization

***Investors should consult their financial advisers if in doubt about whether the product is suitable for them.**

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

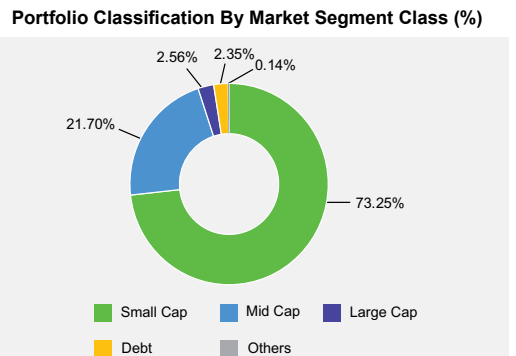

HSBC Small Cap Fund

Small Cap Fund - An open ended equity scheme predominantly investing in small cap stocks.

Investment Objective: To generate long term capital growth from an actively managed portfolio of equity and equity related securities of predominantly small cap companies. However, it could move a portion of its assets towards fixed income securities if the fund manager becomes negative on the Indian equity markets. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

This product is suitable for investors who are seeking*:

- Long Term capital appreciation
- Investment predominantly in equity and equity related securities in Indian markets and foreign securities, with higher focus on undervalued securities.

***Investors should consult their financial advisers if in doubt about whether the product is suitable for them.**

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Business Cycles Fund

Thematic Fund - An open ended equity scheme following business cycles based investing theme.

Investment Objective: To seek to generate long-term capital appreciation from a portfolio of predominantly equity and equity related securities, including equity derivatives, in the Indian market with focus on riding business cycles through dynamic allocation between various sectors and stocks at different stages of business cycles in the economy.

The Scheme could also additionally invest in Foreign Securities.

There is no assurance that the objective of the Scheme will be realised and the Scheme does not assure or guarantee any returns.

HSBC Nifty 50 Index Fund

Index Fund - An open ended Equity Scheme tracking Nifty 50 Index.

Investment Objective: The scheme will adopt a passive investment strategy. The scheme will invest in stocks comprising the Nifty 50 index in the same proportion as in the index with the objective of achieving returns equivalent to the Total Returns Index of Nifty 50 index by minimizing the performance difference between the benchmark index and the scheme. The Total Returns Index is an index that reflects the returns on the index from index gain / loss plus dividend payments by the constituent stocks. There is no assurance that the investment objective of the Scheme will be realized.

HSBC Nifty Next 50 Index Fund

Index Fund - An open ended Equity Scheme tracking Nifty Next 50 Index.

Investment Objective: The scheme will adopt a passive investment strategy. The scheme will invest in stocks comprising the Nifty Next 50 index in the same proportion as in the index with the objective of achieving returns equivalent to the Total Returns Index of Nifty Next 50 index by minimizing the performance difference between the benchmark index and the scheme. The Total Returns Index is an index that reflects the returns on the index from index gain/ loss plus dividend payments by the constituent stocks.
There is no assurance that the investment objective of the Scheme will be realized.

HSBC ELSS Tax Saver Fund

ELSS Fund - An open ended equity linked saving scheme with a statutory lock in of 3 years and tax benefit.

Investment Objective: To generate long-term capital growth from a diversified portfolio of predominantly equity and equity-related securities. There is no assurance that the objective of the Scheme will be realised and the Scheme does not assure or guarantee any returns. For defensive considerations and/or managing liquidity, the Scheme may also invest in money market instruments.

⁵Continuing plans

As a result of the acquisition, HSBC AMC will have two equity linked savings scheme ("elss") in the form of HSBC Tax Saver Equity Fund (an open ended elss with a statutory lock in period of 3 years and tax benefit), and L&T Tax Advantage Fund (to be renamed as HSBC ELSS Fund). As per elss guidelines, a mutual fund can have only one open-ended elss scheme. In view of the said restriction, we propose to stop the subscription into HSBC Tax Saver Equity Fund from close of business hours on November 25, 2022. Hence, no sip, stp-in, or switch into the fund will be permitted from close of business hours on November 25, 2022. For the sake of clarity, we wish to inform you that the unitholders will be allowed to hold their existing investments in this fund, except that no further investments / subscription would be accepted in this fund. However, unitholders will be permitted to redeem / switch out their units post the mandatory lock-in period.

⁴As per clause 1.9 of the SEBI Master Circular for Mutual Funds no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, on 'Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes' has introduced two-tiered structure for benchmarking of certain categories of schemes. Accordingly, the benchmark has been classified as Tier 1 benchmark. Furthermore, the same is effective from 01 December 2021.

⁵Quantitative Data disclosed are as per monthly returns (Annualized) for the last 3 years.

⁶Risk free rate: 5.52% (FIMMDA-NSE Mibor) as on June 30, 2025)

⁷YTM is annualized; ⁸The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

PRC Matrix

Potential Risk Class			
Credit Risk →	Relatively Low (Class A)	Moderate (Class B)	Relatively High (Class C)
Interest Rate Risk ↓			
Relatively Low (Class I)		B-I	
Moderate (Class II)			
Relatively High (Class III)			
A Scheme with Relatively Low interest rate risk and Moderate credit risk.			

Potential Risk Class ('PRC') matrix indicates the maximum interest rate risk (measured by Macaulay Duration of the scheme) and maximum credit risk (measured by Credit Risk Value of the scheme) the fund manager can take in the scheme. PRC matrix classification is done in accordance with and subject to the methodology/guidelines prescribed by SEBI to help investors take informed decision based on the maximum interest rate risk and maximum credit risk the fund manager can take in the scheme, as depicted in the PRC matrix.

This product is suitable for investors who are seeking*:

- Income over short term with low volatility.
- Investment in debt & money market instruments such that the Macaulay Duration of the portfolio is between 3 months - 6 months.[^]

***Investors should consult their financial advisers if in doubt about whether the product is suitable for them. The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.**

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Short Duration Fund

Short Duration Fund - An open ended short term debt scheme investing in instruments such that the Macaulay Duration of the portfolio is between 1 year to 3 years (please refer to page no. 11 of SID for details on Macaulay's Duration). A Moderate interest rate risk and Relatively Low credit risk.

Investment Objective: To provide a reasonable income through a diversified portfolio of fixed income securities such that the Macaulay duration of the portfolio is between 1 year to 3 years. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

PRC Matrix

Potential Risk Class			
Credit Risk →	Relatively Low (Class A)	Moderate (Class B)	Relatively High (Class C)
Interest Rate Risk ↓			
Relatively Low (Class I)			
Moderate (Class II)			
Relatively High (Class III)	A-III		
A relatively high interest rate risk and relatively low credit risk.			

Potential Risk Class ('PRC') matrix indicates the maximum interest rate risk (measured by Macaulay Duration of the scheme) and maximum credit risk (measured by Credit Risk Value of the scheme) the fund manager can take in the scheme. PRC matrix classification is done in accordance with and subject to the methodology/guidelines prescribed by SEBI to help investors take informed decision based on the maximum interest rate risk and maximum credit risk the fund manager can take in the scheme, as depicted in the PRC matrix.

This product is suitable for investors who are seeking*:

- Generation of regular and stable income over medium to long term
- Investment predominantly in AA+ and above rated corporate bonds and money market instruments
- *Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC Banking and PSU Debt Fund

Banking and PSU Fund - An open ended debt scheme primarily investing in debt instruments of banks, public sector undertakings, public financial institutions and municipal bonds. A relatively high interest rate risk and relatively low credit risk.

Investment Objective: To generate reasonable returns by primarily investing in debt and money market securities that are issued by Banks, Public Sector Undertakings (PSUs) and Public Financial Institutions (PFIs) in India. There is no assurance that the objective of the Scheme will be realised and the Scheme does not assure or guarantee any returns.

⁴The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

¹in multiples of Re 1 thereafter.

²TER Annualized TER including GST on Investment Management Fees

³Continuing plans

⁴As per clause 1.9 of the SEBI Master Circular for Mutual Funds no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, on 'Guiding Principles for bringing uniformity in Benchmarks of Mutual Fund Schemes' has introduced two-tiered structure for benchmarking of certain categories of schemes. Accordingly, the benchmark has been classified as Tier 1 benchmark. Furthermore, the same is effective from 01 December 2021.

⁵YTM is annualized.

PRC Matrix

Potential Risk Class			
Credit Risk →	Relatively Low (Class A)	Moderate (Class B)	Relatively High (Class C)
Interest Rate Risk ↓			
Relatively Low (Class I)			
Moderate (Class II)			
Relatively High (Class III)	A-III		
A relatively high interest rate risk and relatively low credit risk.			

Potential Risk Class ('PRC') matrix indicates the maximum interest rate risk (measured by Macaulay Duration of the scheme) and maximum credit risk (measured by Credit Risk Value of the scheme) the fund manager can take in the scheme. PRC matrix classification is done in accordance with and subject to the methodology/guidelines prescribed by SEBI to help investors take informed decision based on the maximum interest rate risk and maximum credit risk the fund manager can take in the scheme, as depicted in the PRC matrix.

This product is suitable for investors who are seeking*:

- Income over target maturity period
- Investment in constituents similar to the composition of CRISIL IBX 50:50 Gilt Plus SDL Index – April 2028.

***Investors should consult their financial advisers if in doubt about whether the product is suitable for them.**

Please note that the above risk-o-meter is as per the product labelling of the scheme available as on the date of this communication/ disclosure. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme.

HSBC CRISIL IBX Gilt June 2027 Index Fund

Index Fund - An open ended Target Maturity Index Fund tracking CRISIL-IBX Gilt Index - June 2027. A Relatively high interest rate risk and relatively low credit risk.

Investment Objective: To provide returns corresponding to the total returns of the securities as represented by the CRISIL-IBX Gilt Index - June 2027 before expenses, subject to tracking errors. However, there is no assurance that the investment objective of the Scheme will be achieved.

***HSBC Large Cap Fund:** The launch date of the Nifty 100 TRI is Jan 01, 2003 whereas the inception date of the scheme is Dec 10, 2002. The corresponding benchmark returns since inception of the scheme not available. (niftyindices.com)

***HSBC Corporate Bond Fund:** The launch date of the NIFTY Corporate Bond Index A-II is Sep 03, 2001 and the same for CRISIL 10 year Gilt Index is September 01, 2001 whereas the inception date of the scheme is Mar 31, 1997. The corresponding benchmark returns since inception of the scheme not available. (niftyindices.com)

***HSBC Gilt Fund:** The launch date of the NIFTY All Duration G-Sec Index is Sep 03, 2001 and the same for CRISIL 10 year Gilt Index is September 01, 2001 whereas the inception date of the scheme is Mar 29, 2000. The corresponding benchmark returns since inception of the scheme not available. (niftyindices.com)

***HSBC Liquid Fund:** Since there was no continuous NAV history available for the surviving Plan of HSBC Liquid Fund prior to May 19, 2011, returns since the said date have been considered for calculating Since Inception performance. The inception date of HSBC Liquid Fund however is December 04, 2002.

***HSBC Midcap Fund:** The launch date of the Nifty Midcap 150 TRI is Apr 01, 2005 whereas the inception date of the scheme is Aug 09, 2004. The corresponding benchmark returns since inception of the scheme not available. (niftyindices.com)

Since inception returns are to be provided since the date of allotment of units.

Additional benchmark as per clause 13.3.4 of SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024.

IDCW are assumed to be reinvested and Bonus is adjusted.

The performance details provided herein are of Regular as well as Direct Plan - Growth Option. Returns on ₹10,000 are point-to-point returns for the specific time period, invested at the start of the period. The returns for the respective periods are provided as on last available NAV of June 2025 for the respective schemes. Returns for 1 year and Above are Compounded Annualized. Returns for less than 1 year is Simple Annualized. Load is not taken into consideration for computation of performance. Different plans shall have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged to the Regular Plan. Considering the varying maturities of the close ended schemes, the performance of close-ended schemes is not provided as it is strictly not comparable with that of open-ended schemes.

*Post merger performance of the surviving scheme, arising out of merger of schemes with similar features, is computed as per the provisions of Clause 13.4 of SEBI Master Circular No- SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 using the weighted average performance of both transferor and transferee schemes. In other cases, performance is computed using the Applicable NAV of the surviving/ continuing schemes. ~~ Face value Rs 10 and ~~~ Face value Rs 1000

As per ELSS guidelines, a mutual fund can have only one open-ended ELSS scheme. In view of the said restriction, subscription into HSBC Tax saver Equity Fund has been closed from business hours on November 25, 2022. Hence, no SIP, STP or switch into HSBC Tax saver Equity Fund is allowed from the close of business hours on November 25, 2022. However, the unitholders will be allowed to hold their existing investments, except that no further investments / subscription would be accepted. Unitholders will be permitted to redeem / switch out their units post the mandatory lock-in period.

The above amendment in minimum SIP amount, number of installments and aggregate amount for SIP shall be applicable only for prospective investors from the Effective Date.

Note for Risk-o-Meter:

Please note that the above risk-o-meters are as per the product labelling of the schemes available as on the date of this communication/ disclosure. As per Clause 17.4.1 (f) of SEBI Master circular dated May 19, 2023 on product labelling (as amended from time to time), risk-o-meters will be calculated on a monthly basis based on the risk values of the respective scheme's portfolio based on the methodology specified by SEBI in the above stated circular. The AMC shall disclose the risk-o-meters along with portfolio disclosure for all their schemes on their respective website and on AMFI website within 10 days from the close of each month. Any change in risk-o-meter shall be communicated by way of Notice cum Addendum and by way of an e-mail or SMS to unitholders of that particular Scheme. Risk-o-meter is as on June 30, 2025. However, the Riskometer for HSBC Multi Asset Allocation Fund and HSBC Multi Asset Active FOF is as on May 31, 2025.
