Fund philosophy

- Diversification with Large, Mid & Small Caps, across sectors
- Focus on smaller size businesses in their early stage of development having potential for growth in the long run
- The fund endevours to identify growth potential in revenue and profit opportunities as compared to broader market
- Aims to invest in undervalued, under-owned, and under researched segments that may deliver growth in long run

The fund's Investment approach

- Aim to provide long-term capital growth through a dynamically managed portfolio across Small, Mid and Large Cap stocks
- Follows bottom-up stock selection using proprietary investment approach
- The market capitalisation allocation of assets will be a minimum 25% each in Small, Mid and Large Cap stocks to ensure consistent diversification
- The fund focuses on GARP (Growth At a Reasonable Price)

Bottom-up stock picking is rewarding across cycles

- Various phases of the economic cycle throw up diverse stock picking opportunities
- In a growing economy, some companies may exhibit growth and earnings visibility irrespective of the business cycle
- Business cycles and macros driving them can be directional indicators but ultimately stock selection offer the potential long-term performance

Strong franchises thrive in bad macros

- Bad macro-economic conditions are a blessing for good franchises
- For e.g. rising cost of inputs forces weaker players in an industry to close capacity. This helps stronger / organized players to gain market share and dominate the industry
- Consumer staples companies do well generally in a high inflation environment. Similarly, rising crude prices have helped Paint companies even as their input prices have risen multifold
- Adverse NPA cycle has hurt weak PSU banks, curtailing their ability to lend, thereby enabling NBFCs and private banks to garner market share and strengthen their franchise further
