Data as on 31 July 2024, HSBC Mutual Fund, **Past performance may or may not be sustained in the future and is not indicative of future results.**

Sonal Gupta is dedicated fund manager for investments in foreign securities by all the schemes of HSBC Mutual Fund.

Fund Approach

The fund follows a flexi-cap strategy with a flexibility to invest across the market capitalization spectrum and sectors.

Profit pool consolidation with dominant players to continue and disruption to accelerate this shift.

Stock selection focuses on earnings growth trajectory and within that, the emphasis lies on earnings surprises.

Since valuations are in line with its historical averages, earnings visibility and relative earnings growth are the key criteria of stock selection.

Key portfolio themes

- Our portfolio is a high-conviction portfolio which is positioned for stocks with earnings visibility in the near term and growth in medium to long term.
- Portfolio construction is through bottom-up stock selection and there is an emphasis on sustainable earnings growth, relative earnings and earnings surprises.
- The current set up of the market is that of moderating inflation, peaked interest rates, improving current account and balance of payment, and reviving growth. That means we are likely to witness improving macro data. However, we are not seeing its impact on corporate earnings that continues to have downward revision. Consensus earnings estimates of FY24 and FY25 look optimistic. The markets have been steady as the time-correction has led the valuations to be in line with historical averages. We have tamed our pro-cyclical bias and increased our exposure in the defensive sectors to de-risk our portfolio.

Investment Objective

To seek long term capital growth through investments in a concentrated portfolio of equity & equity related instruments of up to 30 companies across market capitalization. However, there is no assurance that the investment objective of the Scheme will be achieved.

Why HSBC Focused Fund?

To seek long term growth from an actively managed portfolio comprising of up to 30 companies across market capitalization (i.e. Multi Caps)

Top down and bottom up approach will be used to invest in equity and equity related instruments

Investments will be based on the Investment Team's analysis of business cycles, regulatory reforms, competitive advantages and more

Note: The sector(s)/stock(s)/issuer(s) mentioned in this document do not constitute any research report nor it should be considered as an investment research, investment recommendation or advice to any reader of this content to buy or sell any stocks / investments. The Fund/portfolio may or may not have any existing / future position in these sector(s)/stock(s)/issuer(s).
