Most of us have a tendency to wait until the last moment in the financial year to start making tax saving investments, and more often than not, we end up making the wrong decisions. The key here is to begin investing at the start of the financial year and change the notion of “tax saving” into “tax planning”. This involves creating a strategy to help you maximise your tax savings together with wealth creation.

Why HSBC Tax Saver Fund?

- To save taxes under Section 80C of Income Tax Act
- The investment approach is bottom-up stock picking. The Scheme seeks to add the best opportunities that the market presents, without any sector/cap bias
- Bottom-up stock picking: The Scheme focuses on bottom-up stock picking (i.e. focusing solely on prospects of individual stocks) as opposed to a top-down approach (i.e. predicting macro-economic and political trends and taking investment decisions based on them)
- No cap bias: It will seek to identify the best stocks at a point in time, regardless of any market cap bias.
- To create a corpus through generating inflation-adjusted returns to cater to long-term goals

Fund Philosophy

- The fund aims for bottom-up investment approach for stocks' and companies' selection for a well-diversified quality portfolio
- The 3 year lock-in helps the fund manager take positions in stocks with longer term return potential
- The scheme focuses on delivering superior risk-adjusted performance over the long term coupled with tax saving under section 80C makes it an attractive investment option for long term investors
- The fund has a proven long-term track record with consistent outperformance across various time periods / market cycles
- The fund with its flexible investment approach of investing across the market spectrum, has stood the test of time and has a proven track record of over 10 years

Investment Objective

Aims to provide long term capital appreciation by investing in a diversified portfolio of equity & equity related instruments of companies across various sectors and industries, with no capitalisation bias. The Fund may also invest in fixed income securities. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.
