Investment process and team

Our investment process is active, fundamental and value driven. It combines qualitative top-down analysis of macroeconomic and market dynamics, with structured bottom-up research into individual bond issuers and fixed income securities. While investment decisions are taken locally to ensure focus and accountability, our portfolio managers in India are able to access the expertise and experience of our investment professionals worldwide in order to gain a truly global perspective.

Notes:

* The rating mentioned above refers to the local credit rating in India. The rating criteria and methodology used by Indian local rating agencies may be different from those adopted by most of the established international credit rating agencies. Therefore, the Indian local credit rating system may not provide an equivalent standard for comparison with securities rated by international credit rating agencies.

Pursuant to the transfer of schemes of L&T Mutual Fund to HSBC Mutual Fund, which was effective from the close of business hours of November 25, 2022, the performance of the Scheme (which is the surviving scheme out of the merger of schemes with similar features) provided above is computed as per the provisions of SEBI Circular No- SEBI/HO/IMD/DF3/CIR/P/2018/69 dated April 12, 2018 using the weighted average performance of both transferor and transferee schemes. The details of the transferor and transferee schemes please refer to our notice dated October 14, 2022 available on www.assetmanagement.hsbc.co.in. Past performance may or may not be sustained in the future. Refer note below.

⁷ HSBC Liquid Fund: Since there was no continuous NAV history available for the surviving Plan of HSBC Liquid Fund prior to May 19, 2011, returns since the said date have been considered for calculating Since Inception performance. The inception date of HSBC Liquid Fund however is December 4, 2002.

Key risks

The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested.

- ◆ **Credit Risk:** Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e. will be unable to make timely principal and interest payments on the security).
- ◆ **Price-Risk or Interest Rate Risk:** As with all debt securities, changes in interest rates may affect the NAV of the Scheme(s) as the prices of securities increase as interest rates decline and decrease as interest rates rise.
- ◆ **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer.
- ◆ **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme(s) are reinvested. The additional income from reinvestment is the "interest on interest" component
