Sector allocation

HSBC Midcap Fund

Overweight

- **Electrical Equipment:** Prefer companies in T&D segment, especially connecting power from generation sources onto the grid.
- **Capital Markets:** Financialization of savings and wealth effect. Exposure to Exchanges and Asset Management Companies.
- **Retailing:** Prefer Platforms over brick-and-mortar companies targeting customers, who prefer convenience and multiple choices.
- **Aerospace & Defense:** Geopolitical uncertainty along with steady increase in defense budget as a percentage of GDP
- **Industrial Manufacturing:** Companies benefiting from 'Make in India' theme in new manufacturing segments

Underweight

- **IT-Software:** AI-related risks and terminal growth rate concerns
- **Consumer Durables:** Rising commodity costs, higher inventory and possible slowdown in discretionary consumption
- **Pharmaceuticals & Biotechnology:** Limited exposure to domestic generic players and biotech companies
- **Auto components:** Rising commodity prices could impact margins and demand for OEMs, which in turn could impact earnings and working capital cycle for component players
- **Realty:** Cyclically we could be closer to peak, hence, there could be some stagnation/ weakness

Sector allocation trend

HSBC Midcap Fund

- **Reduction in Financials**, however, continue to **remain overweight**. We have exposure through Banks, NBFCs, Asset Management Companies and Exchanges.
- Reduced weight in quick commerce companies on rising competitive intensity resulting in **lower weight to the Consumer Discretionary segment**
- **IT weight has come down** in 2026 driven by AI-related risks and concerns on terminal growth rate
- **Increased exposure to Healthcare** in 2026 through generic players on attractive valuations and higher earnings predictability
