WEEKLY REVIEW – SEPTEMBER 9 – SEPTEMBER 13, 2024

Domestic barometers clocked strong gains, hitting fresh record highs during the week. The positive sentiment in the Indian market was likely influenced by the upbeat global market mood, fueled by expectations of interest rate cuts by major central banks. This global optimism provided a supportive backdrop for the domestic market.

The domestic equity market edged higher in three out of five trading sessions during this week. The Sensex closed above the 82,850 level and the Nifty settled above the 25,350 mark.

In the week ended on Friday, 13 September 2024, the BSE Sensex jumped 1,707.01 points or 2.10% to settle at 82,890.94. The Nifty 50 index advanced 504.35 points or 2.03% to settle at 25,356.50. The BSE Mid Cap index added 1.52% to close at 49,244.05. The BSE Small Cap index shed 2.72% to end at 57,128.04.

GLOBAL MARKETS

Asian stocks made a cautious start on Monday in a week that is almost certain to see the start of an easing cycle in the United States with the only question mark being the size of the cut, with markets split on the chance of an outsized move.

Central banks in Japan and the UK also meet this week, with both expected to stand pat for now, while a packed data schedule includes U.S. retail sales and industrial production.

Geopolitics loomed large as ever with Republican presidential candidate Donald Trump the subject of a second assassination attempt on Sunday according to the FBI.

Holidays in China, Japan, South Korea and Indonesia made for thin conditions and early moves were modest. MSCI's broadest index of Asia-Pacific shares outside Japan was almost flat, after bouncing 0.8% last week.

Japan's Nikkei was shut but futures traded at 36,490 compared to a cash close of 36,581 as recent yen gains pressured exporters. S&P 500 futures and Nasdaq futures were both a fraction firmer.

Economic data from China over the weekend disappointed as industrial output growth slowed to a five-month low in August, while retail sales and new home prices weakened further.

RUPEE, OIL & FIIs

Indian Rupee: The Indian rupee strengthened on Friday as Asian currencies benefited from the weakness in the US dollar. The rupee closed at 83.8875 against the U.S. dollar, up from its close at 83.9650 in the previous session.

The currency strengthened nearly 0.1% week-on-week, its best weekly performance since the week ended June 25.

Crude Oil: Oil prices edged up as nearly a fifth of crude oil production in the Gulf of Mexico remained offline.

Brent rose 19 cents to \$71.78 a barrel, while U.S. crude firmed 28 cents to \$68.93 per barrel.

FPIs & DIIs: Foreign institutional investors (FII) mopped shares worth Rs 2,364.82 crore, while domestic institutional investors (DII) bought shares worth Rs 2,532.18 crore on September 13, 2024, according to the provisional data available on the NSE.
