Sector Attribution (1 Year)

- O/W in Industrial, Real Estate and U/W in Financials has contributed positively to the performance.
- U/W in Utilities and O/W Materials contributed negatively to the performance.

Fund philosophy

- HIEF is a thematic fund which primarily invest in Infrastructure companies.
- It has a flexibility to invest across the market capitalization spectrum.
- Fund mostly follows bottom-up approach for stock selection.

Key portfolio themes

- The outlook for infrastructure sector has been on improving trend.
- We believe that government focus will continue for the next few years.
- We expect the government capex to be followed by private capex.
- In the context of current valuations, we are focused on bottom-up approach along with focus on earnings growth.
- Earnings growth has rebounded for number of companies in the current year. We expect this to continue over next couple of years as well.

Portfolio sectoral positioning

- Positive view on Capital Goods, Real Estate, EPC, Cement, Port and Logistics sectors.
- Positive on EPC companies as they are expected to benefit from increased traction in Roads, Building Construction, Water, Power transmission and distribution capex as well as Railway capex.
- Pickup in infra capex should drive the demand for some of the capital good companies.
- Positive on Cement companies driven by improved demand in housing and infra segment. Increased utilization level should also bring back the pricing power, though near-term margin headwinds are there due to evaluated commodity prices.
- Real Estate earnings momentum will be driven by demand factors and industry consolidation benefiting the larger listed players.
- Port is steady business with growth directly linked to India's EXIM growth. With government focus on making India a manufacturing hub for global economies, any growth in trade will be positive for the port sector.
- With reform measures like GST and E-way Bills, Logistics sector is also undergoing changes and should be beneficiary of increased supply chain outsourcing.
- We continue to remain negative on Energy and Utilities, two sectors with high regulatory interference, low sustainable profitability and with plenty of capital misallocation history.

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say ₹ 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of Respective Scheme. The returns are calculated by XIRR approach assuming investment of ₹ 10,000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with correct allowance for the time impact of the transactions.
