# Sector allocation

HSBC Midcap Fund

## Overweight

- **Electrical Equipment:** Power T&D remains a theme with strong growth and margins, not only in domestic markets but also exports, for most players
- **Finance:** Exposure to NBFCs driven by rate cuts, regulatory relaxations from RBI and higher exposure towards retail consumers
- **Retailing:** Prefer Platform over brick-and-mortar companies targeting customers, who prefer convenience and want multiple choices
- **Industrial Manufacturing:** Prefer companies backed by government policy push and initiatives

## Underweight

- **Banks:** Prefer NBFCs over mid-cap private/ public banks driven by rate cuts and regulatory relaxations from RBI
- **Realty:** Cyclically we could be closer to peak, hence, there could be some stagnation/ weakness
- **Chemicals, Agrochemicals & Petrochemicals:** Global uncertainty with respect to tariff, higher inventory levels and competitive intensity by China

# Sector allocation trend

## HSBC Midcap Fund

- **Increase in Financials** weight over past six months is driven by regulatory easing by RBI, rate cuts, CRR cuts, etc. Our exposure is through NBFCs (primarily consumer focused), Asset Management Companies and Exchanges.
- **Industrials** continue to be an **overweight position**, though we have reduced weights in 2025. Remain selective primarily in Power T&D and Defense plays.
- Information Technology weight increase in 2025 represents our **overweight position in Industrial Manufacturing companies** which is classified under IT under Bloomberg classification.

# Market cap classification

## HSBC Midcap Fund

We have been highlighting in past 'Fund Lens' releases that the increase in Mid Cap and Large Cap allocation since July 2025 has been due to SEBI's semi-annual revision of market capitalization rather than any active increase in allocation. This is now normalizing in-line with long-term trends.

Market Cap (%)	September 2025	October 2025
Mid Cap	71.3	70.6
Large Cap	18.6	15.6
Small Cap	8.8	10.7
