Data as on 30 June 2023 unless otherwise given

The fund has undergone merger/consolidation along with changes to its fundamental attributes as per the notice published on 15 Oct '22. For more details visit our website page - <https://www.assetmanagement.hsbc.co.in/en/mutual-funds/acquisition-of-lt-mutual-fund>.

One of the pre-requisites for a sound investment strategy is to strike a desired balance between risk and return so that along with achieving a strong long term growth, one could also maintain a certain level of stability in the investment portfolio. One of the simpler ways of accomplishing this balance is by investing in asset allocation funds that follow a disciplined asset allocation strategy. While there are funds with different asset allocation strategies to suit the needs of investors with different investment horizons and risk appetite, equity oriented asset allocation funds probably offer the right mix of growth potential and stability for moderately aggressive investors seeking long term wealth creation.

Why HSBC Aggressive Hybrid Fund?

- To benefit from both asset classes of equity and fixed income for an optimal asset-allocation portfolio
- Aim to seek a balance between long term growth and stability from an actively managed portfolio of equity and equity related securities and fixed income instruments
- Maintains a minimum of 65% allocation to equity and equity related securities and at least 25% allocation to fixed income securities including money market instruments
- To create a corpus through generating inflation-adjusted returns to cater to long-term goals

Fund Philosophy

- Invests 65-75% in equity and equity related securities and 25-35% in debt and money market securities
- Focus on investing in fundamentally strong businesses at a valuation level that offers adequate margin of safety
- Bottom-up stock selection using our proprietary investment approach
- Flexible equity investment approach to help capitalize on opportunities across the market spectrum
- For fixed income allocation, focus is on maintaining high credit quality portfolio
- Strong risk management framework - a well-diversified portfolio with focus on managing portfolio risks

Investment Objective

To seek long term capital growth and income through investments in equity and equity related securities and fixed income instruments. However, there is no assurance that the investment objective of the Scheme will be achieved.
