Quantitative Data		Entry / Exit Load
Average Maturity	3.43 year	NA / NIL
Modified Duration	2.87 year	
Macaulay Duration	2.98 year	
Yield to Maturity	7.13%	

Why HSBC Conservative Hybrid Fund?

- The Scheme shall invest in debt and money market instruments and would seek to generate regular returns
- The scheme may also invest in equity and equity related instruments to seek capital appreciation
- A top down and bottom up approach will be used to invest in equity and equity related instruments
- To create a corpus through generating inflation-adjusted returns

Fund Strategy

- While 2H borrowing calendar was on expected lines, the bond supply as such remains heavy and absorption of this bond supply in remainder of FY 23 may exercise upward pressure on yields at the belly and longer end of the curve.
- The segment may stay volatile based on global cues.
- And hence as such, we intend to position with an underweight stance in the long bond portfolios versus the index and intend to take advantage tactically of any opportunities that may arise on the longer end of the curve depending on market conditions.

² EPS - Trailing 12 month Estimates Comparable Adjusted EPS, PE - Trailing 12 month Price to earnings adjusted for negative earnings, Weighted average method, PB - Price to book value, Trailing 12 month Price to earnings, Index method aggregation.
