Why HSBC Medium Duration Fund?

- Creating alpha by identifying pockets of value propositions, vis-à-vis yield curve steepness, attractive carry opportunities, elevated credit spreads, etc.
- Rigorous credit selection process to ensure good portfolio quality; Latest rating actions are stable/upward on the entire portfolio; Nil downgrades
- Demonstrated ability to strategically manage Duration in periods of volatile interest rates
- With interest rates consolidating at a higher level, a strategy combining a prudent mix of strategic Duration calls and Accrual product is well suited for investors with 3 year horizon
- Currently offers 50-60 bps over plain vanilla AAA bond funds, driven by niche positioning

Fund Strategy

- Aims at delivering yield pick up through judicious exposure to high quality/relatively less liquid space, while keeping adequate liquidity
- 80-85% of the portfolio in AAA or equivalent securities; Nil exposure to AA- and below rated names
- Almost 40% of portfolio exposure to Cash and G-Sec; adequate fire power available given the high proportion of G-Sec in the portfolio, to opportunistically evaluate deals with good yield pick up
- Strategic duration management in an Accrual product
