2. Expected Benefits of the Proposed Transaction

Broadly, the Proposed Transaction is expected to result in the following benefits:

- a) L&T Mutual Fund is an established mutual fund in India with an AUM of approximately INR 72,322.38 Crores for the month ended September 30, 2022. The Seller established its presence in the mutual funds industry through the acquisition of the mutual fund business of DBS Chola Mutual Fund in 2010 and Fidelity Mutual Fund in 2012. The Seller has demonstrated its ability to successfully integrate and grow acquired mutual fund portfolios. Since its acquisition of the mutual fund businesses of DBS Chola Mutual Fund and Fidelity Mutual Fund, the average AUM of L&T Mutual Fund has increased from approximately INR 2,520 crores (for the month of January 2010 for the erstwhile DBS Chola Mutual Fund) to approximately INR 72,322.38 Crores for the month ended September 30, 2022 (Source: AMFI).
- b) The Proposed Transaction will help HSBC to increase foothold in the mutual fund industry in the near future and HSBC is committed to growth. The proposed sale of L&T Mutual Fund to HSBC Mutual Fund will increase the scale and resources of the entity and deliver a strong value proposition to all unitholders. The strength of the HSBC global brand and its strong track record in the area of investor care is expected to help enhance the investor experience of all unit holders.
- c) HSBC AMC has a long track record and has delivered reasonable return to its unitholders.
- d) The merger of HSBC MF Schemes and L&T MF Schemes would allow HSBC AMC and HSBC Trustees to avoid the existence of similar schemes in HSBC Mutual Fund and enable optimum utilization of resources and to present to the unitholders, a simplified range of schemes in the interest of the unitholders. It is in the interest of the unitholders that the HSBC Trustees and the board of directors of HSBC AMC have decided to merge some of their schemes with those of the schemes of L&T AMC or vice versa.

3. Proposal

We would like to inform you that as part of the Proposed Transaction:

- a) the trust deed dated 7 February 2002 constituting the HSBC Mutual Fund and appointing the HSBC Trustees (the “HSBC Trust Deed”) is required to be amended; and
- b) merger of L&T India Large Cap Fund and HSBC Large Cap Equity Fund (“Merger of the Schemes”) will be undertaken (as described below in paragraph 5).

By this letter, we seek to provide you with further information for each of the above-mentioned steps in the manner described in this letter hereinafter.

4. Approval for proposed amendments to the HSBC Trust Deed

In order to give effect to the Proposed Transaction, the HSBC Trust Deed will have to be amended to, inter alia, authorise the HSBC Trustees to transfer the schemes of another mutual fund to the HSBC Mutual Fund, merge such schemes with the existing schemes of the HSBC Mutual Fund or vice-versa, such that they form part of HSBC Mutual Fund, and authorize the HSBC Trustees to assume trusteeship of such schemes (i.e. clause 2.7 of the draft deed of amendment related to insertion of a new clause "7A Transfer/Merger/ Consolidation of schemes by the Trustees") and also undertake certain other amendments necessary for operational convenience (i.e. all clauses other than clause 2.7 of the draft deed of amendment). However, for investments made during the Exit Option Period, there will be no waiver of exit load. The NAV applicable, for the Relevant Unitholders who choose to exercise the Exit Option would be based on the date/time of receipt of redemption/switch request during business hours on a business day.

The Exit Option can be exercised from October 21, 2022 to November 21, 2022 (both days inclusive and up to 3.00 pm on November 21, 2022), by submitting the redemption/switch request (as set out in **Exhibit 6** hereto) at any of the HSBC AMC/Registrar's branches or through electronic modes such as HSBC Mutual Fund's website (<https://invest.assetmanagement.hsbc.co.in>) or website of the Registrar (<https://www.camsonline.com>). - Further, Section 49(2AD) of the IT Act provides that the cost of acquisition of the units acquired in the consolidated scheme of mutual fund (in consideration of allotment of units of consolidating scheme) shall be deemed to be the cost of acquisition of the units in the consolidating scheme of mutual fund.

However, redemption and/or switch of units from the HSBC Large Cap Equity Fund during the Exit Option Period shall be considered as redemption and will result in short term/long term capital gain/loss in the hands of the unitholders depending on the period of holding of the investment.

In case of NRI unitholders, TDS would be deducted in accordance with applicable tax laws for redemption/switch-out of units from the HSBC Large Cap Equity Fund during the Exit Option Period and same would be required to be borne by such unitholder only.

Securities Transaction Tax ("STT") on redemption/switch-out of units, if any, exercised during the Exit Option Period in HSBC Large Cap Equity Fund shall be borne by HSBC AMC.

Stamp duty shall not be levied on the units allotted under the Surviving Scheme, upon the Merger of the Schemes.

			<p>as may be amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the Scheme within 30 Business Days. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in SEBI circular dated March 30, 2022.</p>
<p>Investment Strategy</p>	<p>The Scheme will primarily be a diversified equity fund which will likely (in normal market conditions) invest predominantly in large cap stocks to generate long-term capital appreciation.</p> <p>The investment approach is bottom-up stock picking. A limited exposure to various equity derivatives instruments is likely - for the purposes of hedging, portfolio balancing and optimizing returns.</p> <p>The key features of the Scheme's investment strategy include:</p> <ul style="list-style-type: none"> ● Diversification: Subject to SEBI regulations, the Scheme will be well diversified across stocks and sectors. A limited exposure to various equity derivatives instruments is likely - for the purpose of hedging, portfolio balancing and optimizing returns. ● Stock Selection: The fund managers will adopt a methodology of bottom-up stock selection, with an emphasis on first-hand research. They will favour companies that offer the best value relative to their respective long-term growth prospects, returns in capital and management quality. When assessing a company, the fund managers will focus on understanding how each of these factors will change over time. <p>Investments in Foreign Securities shall be subject to the investment restrictions specified by SEBI/RBI from time to time. The fund manager will consider all relevant risk before making any investment in Foreign Securities.</p> <p>Investments in equity and equity related securities and debt securities carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification and hedging.</p> <p>Further, the portfolio of the Scheme will be constructed in accordance with the investment restrictions specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.</p> <p>The Scheme may invest in equity derivatives instruments to the extent permitted under and in accordance with the applicable Regulations, including for the purposes of hedging, portfolio balancing and optimizing returns.</p>	<p>The aim of HSBC Large Cap Equity Fund is to deliver above benchmark returns by providing long-term capital growth from an actively managed portfolio, mainly comprising companies registered in and/or listed on a regulated market of India. The Scheme will invest at least 80% in large cap companies and may also invest in equity and equity related instruments of companies other than large cap companies.</p> <p>A topdown and bottomup approach will be used to invest in equity and equity related instruments. Investments will be pursued in select sectors based on the Investment Team's analysis of business cycles, regulatory reforms, competitive advantage etc. Selective stock picking will be done from these sectors. The fund manager in selecting scrips will focus on the fundamentals of the business, the industry structure, the quality of management, sensitivity to economic factors, the financial strength of the company and the key earnings drivers. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. Stock specific risk will be minimized by investing only in those companies that have been analyzed by the Investment Team at the AMC. Risk will also be reduced through adequate diversification of the portfolio. Diversification will be achieved by spreading the investments over a range of industries/sectors. As per the asset allocation pattern indicated above, for investment in debt securities and money market instruments, the Fund may invest a part of the portfolio in various debt securities issued by corporates and/or state and central government. Such government securities may include securities which are supported by the ability to borrow from the treasury or supported only by the sovereign guarantee or of the state government or supported by Government of India (GOI)/state government in some other way. The Scheme may invest in other Scheme managed by the AMC or in the schemes of any other mutual fund, provided it is in conformity with the investment objectives of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments.</p>	<p>The aim of the Scheme is to deliver above benchmark returns by providing long-term capital growth from an actively managed portfolio, mainly comprising companies registered in and/or listed on a regulated market of India. A. Provisions related to covered call strategy

Covered call strategy is known as selling a call option on the shares which an investor holds. Under this strategy the investor owns the shares and has taken on the potential obligation to deliver the shares to the option buyer and accept the predetermined price as the price at which he sells the shares. For his willingness to do this, the investor receives the premium on the option.

Benefit of covered call strategy

Income Generation: Investment manager sees this strategy as income generation. When investment manager is under view that the price of a share will not move beyond certain price in certain time frame, his endeavour will be to generate income by selling call option on that stock.

Downside Hedging: Downside of the stock is protected to the extent of premium received under covered call strategy.

Risk Factors of covered call strategy

Volatility risk: Volatility risk arises when market is more volatile than the Fund Manager's estimation. The investment manager holds view of range bound market and the market volatility breaches these limits, thereby increasing risk to the portfolio. This risk is mitigated as we have covered with the stocks we hold.

Opportunity loss: Selling call option means investment manager are obligated to deliver the stock at a predetermined price. In case when the stock price moves above the predetermined price, the upside opportunity is lost on the stock, because we have sold call option.

Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strategy, the profits from call option writing is capped at the option premium, however the downside depends upon the increase in value of the underlying equity shares.

Restriction in Writing of Covered Call Options by Mutual Fund Schemes:

In terms of SEBI circular dated January 16, 2019, mutual funds have been permitted to write call options under a covered call strategy as prescribed below:

Mutual Fund schemes (except Index Funds and ETFs) may write call options only under a covered call strategy for constituent stocks of NIFTY 50 and BSE SENSEX subject to the following:

- a. The total notional value (taking into account strike price as well as premium value) of call options written by a scheme shall not exceed 15% of the total market value of equity shares held in that scheme.
- b. The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a particular company held in the scheme. The unencumbered shares in a scheme shall mean shares that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrances.
- c. At all points of time the Mutual Fund scheme shall comply with the provisions at paragraphs (a) and (b) above. In case of any passive breach of the requirement at paragraph (a), the respective scheme shall have 7 trading days to rebalance the portfolio. During the rebalancing period, no additional call options can be written in the said scheme.
- d. In case a Mutual Fund scheme needs to sell securities on which a call option is written under a covered call strategy, it must ensure compliance with paragraphs (a) and (b) above while selling the securities.
- e. In no case, a scheme shall write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts.
- f. The premium received i.e., the total gross exposure related to option premium paid and received must not exceed 20% of the net assets of the scheme.
- g. The exposure on account of the call option written under the covered call strategy shall not be considered in cumulative gross exposure of the Scheme for computing 100% of the net assets of the scheme.
- h. The call option written shall be marked to market daily and the respective gains or losses factored into the daily NAV of the respective scheme(s) until the position is closed or expired.

B. Provisions related to REITs & InvITs

I. Risks factors associated with investments in REITs & InvITs

Market Risk: REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to the market conditions and factors impacting the underlying assets. AMC/Fund Manager's will do the necessary due diligence but actual market movements may be at variance with the anticipated trends.

Liquidity Risk: As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc., the time taken by the Mutual Fund for liquidating the investments in the scheme may be long in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk. As these products are new to the market they are likely to be exposed to liquidity risk.

Reinvestment Risk: Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, interest payments etc. Depending upon the market conditions, interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. As a result, the proceeds may get invested at a lower rate.

Credit Risk: REITs & InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.

Regulatory/Legal Risk: REITs and InvITs being new asset classes, regulatory guidelines may be evolving in nature which may impact the investments in REITs and InvITs.

II. Investment restrictions related to REITs & InvITs

A mutual fund may invest in the units of REITs and InvITs subject to the following:

- (a) No mutual fund under all its schemes shall own more than 10% of units issued by a single issuer of REIT and InvIT; and
- (b) A mutual fund scheme shall not invest –
 - i. more than 10% of its NAV in the units of REIT and InvIT; and
 - ii. more than 5% of its NAV in the units of REIT and InvIT issued by a single issuer.

Provided that the limits mentioned in sub-clauses (i) and (ii) above shall not be applicable for investments in case of index fund or sector or industry specific scheme pertaining to REIT and InvIT.

C. Risk factors associated with investments in Perpetual Debt Instruments (PDI) including Additional Tier-1 and Tier-2 bonds

The scheme may invest in certain debt instruments with special features viz. subordination to equity (absorbs losses before equity capital) and/or convertible to equity upon trigger of a pre-specified event for loss absorption including Additional Tier I bonds and Tier 2 bonds issued under Basel III framework (known as perpetual debt instruments). PDIs are instruments issued by the borrower to strengthen their capital structure and as the name suggests these instruments do not have a specific maturity date but have an embedded call option instead and maybe less liquid than conventional debt instruments. These bonds are subordinate to all other debt and only senior to equity capital. The issuer may call or redeem the bonds on the call exercise date if they can refinance the issue at a cheaper rate, especially when interest rates are declining. The issuers of such instruments could be Banks, NBFCs and Corporates. PDIs issued by Banks and NBFCs fall under scope of Reserve Bank of India ("RBI")'s guidelines for Basel III capital regulations. These are also referred to as Additional Tier I (AT1 bonds). However, there are no regulatory guidelines for issuance of PDIs by Corporates.

Since PDIs have special features other than usual non-convertible bonds, there are additional risks associated with such instruments which are listed below –

Risk related to coupon servicing –

Banks – As per the terms of the instruments, Banks may have discretion at all times to cancel distributions /payment of coupons. In the event of non-availability of adequate distributable reserves and surpluses or inadequacy in terms of capital requirements, RBI may not allow banks to make payment of coupons. These bonds may not be permitted to pay these coupons if the Bank's financial position improves subsequently (non-cumulative).

NBFCs – While NBFCs can defer/postpone payment of coupon in case paying the coupon leads to breach of capital ratios, they also have discretion at all times to cancel payment of coupon.

Corporates – Corporates usually have discretion to defer the payment of coupon. However, the coupon is usually cumulative and any deferred coupon shall accrue interest at the original coupon rate of the PDI.

Risk of write down or conversion to equity –

In the event of shortfall in maintenance of capital adequacy ratios and/or Point of Non Viability Trigger (PONV – a point defined by RBI when a bank is deemed to have become non-viable unless appropriate measures are taken to revive its operations or infusion of public sector capital), PDIs issued by Banks could be written down or converted to common equity. This risk does not exist in case of PDIs issued by NBFCs and Corporates.

Risk of call option not exercised by the issuer –

Banks and NBFCs – The issuing Banks and NBFCs have an option to call back the instrument after minimum period as per the regulatory requirement from the date of issuance and specified period thereafter, subject to meeting the RBI guidelines. However, if the issuer does not exercise the call on first call date, the Scheme may have to hold the instruments for a period beyond the first call exercise date and hence may be exposed to valuation impacts.

Corporates – Unlike Banks and NBFCs there is no minimum period for call date for Corporate issuers. However, if the corporate does not exercise the call option, the Scheme may have to hold the instruments for a period beyond the call exercise date and hence may be exposed to valuation impacts.

Risk Mitigation – The Scheme will not invest more than 10% of the NAV of the scheme in such instruments and will limit exposure to 5% of the NAV of the Scheme for such instruments issued by a single issuer.

D. Risk associated with short selling and securities lending

Short Selling Risk: The risk associated with upward movement in market price of security sold short may result in loss. The losses on short position may be unlimited as there is no upper limit on rise in price of a security.

Securities Lending: The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e., the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

E. Provision related to participation of mutual funds in repo in corporate debt securities:

Risks factors associated with investments in repo transactions in corporate bonds

In repo transactions, also known as a repo or sale repurchase agreement, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the following risks:

- a. **Counterparty Risk:** This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price on the contracted date. The Investment Manager will endeavour to manage counterparty risk by dealing only with counterparties, having strong credit profiles, approved by our credit risk analysis team. The exposure to each counterparty will be within the overall approved credit limits. Also, the counterparty risk is to an extent mitigated by taking collateral equivalent in value to the transaction after knocking off a minimum haircut on the intrinsic value of the collateral. In the event of default by the repo counterparty, the scheme shall have recourse to the corporate debt securities.
- b. **Collateral Risk:** Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions with collateral bearing a minimum rating as prescribed by the regulators (currently AA or equivalent and above rated money market and corporate debt securities). Any rating downgrade will tantamount to either an early termination of the repo agreement or a call for fresh margin to meet the minimum haircut requirement. In addition, the Investment manager may apply a higher haircut on the underlying security than mentioned above to adjust for the illiquidity and interest rate risk on the underlying instrument. The adequacy of the collateral will be monitored on a daily basis by considering the daily market value & applying the prescribed haircut. In the event of shortfall in the collateral, the counterparty shall be asked to replenish the same. If the counterparty is not able to top-up either in form of cash/collateral, it shall tantamount to early termination of the repo agreement.
- c. **Settlement Risk:** Corporate Bond Repo shall be settled between two counterparties in the OTC segment unlike in the case of Government securities repo transactions where CCIL stands as central counterparty on all transactions which neutralizes the settlement risk. However, the settlement risk pertaining to CDRs shall be mitigated through Delivery versus Payment (DvP) mechanism which is followed by all clearing members.

Investment restrictions:

In terms of SEBI Circular No. CIR/IMD/DF/19/2011 dated November 11, 2011 and SEBI Circular No. CIR/IMD/DF/23/2012 dated November 15, 2012, mutual funds can participate in repos in corporate debt securities as per the guidelines issued by RBI from time to time, subject to the following conditions:

- a. The gross exposure of the Scheme to repo transactions in corporate debt securities shall not be more than 10% of the net assets of the Scheme.
- b. The Scheme shall participate in repo transactions only in AA and above rated corporate debt securities.
- c. In terms of Regulation 44 (2) of the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996, the Scheme shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months.

***Segregated Portfolio**

In order to ensure fair treatment to all investors in case of a Credit Event and to deal with liquidity risk, SEBI (vide its circular no. SEBI/HO/IMD/DF2/CIR/P/2018/160 dated December 28, 2018) has allowed creation of Segregated Portfolio of debt and money market instruments by mutual fund schemes.

Benefits associated with Segregated Portfolio

The creation of Segregated Portfolio is aimed at ring fencing a bad asset and restrict cascading effect of illiquidity on the rest of portfolio. This will ensure fair treatment to all investors in case of a Credit Event and allow HSBC AMC to deal with liquidity risk. This offers advantage to the investors in the following ways:

- Protecting interest of the investors – It protects investors from exits of large investors as segregation of bad assets help in stabilizing the NAV and minimize panic redemptions, thereby providing a cushion to the liquid portfolio of the Scheme.
- Fair treatment to the investors – New investors coming to the Scheme (Main Portfolio) after the Credit Event will neither get benefit of subsequent recovery, if any, of the bad assets nor will they have to bear the cost of further reduction in value of bad assets. Furthermore, an existing investor exiting from the liquid portfolio (Main Portfolio) after the Credit Event shall still be entitled to receive his portion of subsequent recovery of bad assets in the Segregated Portfolio.

The salient features of creation of Segregated Portfolio is given as below:

Creation of Segregated Portfolio

Creation of Segregated Portfolio shall be subject to guidelines specified by SEBI from time to time and includes the following:

- 1) Segregated Portfolio may be created, in case of a Credit Event at issuer level i.e., downgrade in credit rating by a SEBI registered Credit Rating Agency ("CRA"), as under:
 - a. Downgrade of a debt or money market instrument to 'below investment grade', or
 - b. Subsequent downgrades of the said instruments from 'below investment grade', or
 - c. Similar such downgrades of a loan rating, or
 - d. Trigger of a pre-specified event for loss absorption in case of debt instruments with special features such as subordination to equity (absorption of losses before equity capital) and/or conversion to equity.
- 2) In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of Segregated Portfolio shall be based on issuer level Credit Events as mentioned above and implemented at the ISIN level.
- 3) In case of unrated debt or money market instruments of an issuer that does not have any outstanding rated debt or money market instruments, actual default of either the interest or principal amount by the issuer of such instruments shall be considered as a Credit Event for creation of Segregated Portfolio.
- 4) In case of debt instruments with special features mentioned above, if the instrument is to be written off or converted to equity pursuant to any proposal, the date of said proposal may be treated as the Trigger Date. However, if the said instruments are written off or converted to equity without proposal, the date of write off or conversion of debt instrument to equity may be treated as the Trigger Date.

- 5) Creation of Segregated Portfolio is optional and is at the discretion of the AMC.

Definitions

- 1) The term 'Segregated Portfolio' means a portfolio, comprising of debt or money market instrument affected by a Credit Event that has been segregated in a mutual fund scheme.

The Fund will also disclose that the segregation shall be subject to the Trustees approval. Additionally, the said press release will be prominently disclosed on the website of the AMC; and
 - c. ensure that till the time the Trustees approval is received, which in no case shall exceed 1 business day from the day of Credit Event, the subscription and redemption in the scheme will be suspended for processing with respect to creation of units and payment on redemptions.
- 2) Once the Trustees approval is received by the AMC:
 - a. Segregated Portfolio will be effective from the day of Credit Event.
 - b. The AMC shall issue a press release immediately with all relevant information pertaining to the Segregated Portfolio. The said information will also be submitted to SEBI.
 - c. An e-mail or SMS will be sent to all unit holders of the concerned scheme.
 - d. The Net Asset Value ("NAV") of both Segregated and Main Portfolios will be disclosed from the day of the Credit Event.
 - e. All existing investors in the scheme as on the day of the Credit Event will be allotted equal number of units in the Segregated Portfolio as held in the Main Portfolio.
 - f. No redemption and subscription will be allowed in the Segregated Portfolio. However, upon recovery of any money from Segregated Portfolio, it will be immediately distributed to the investors in proportion to their holding in the Segregated Portfolio.
 - g. The AMC shall enable listing of units of Segregated Portfolio on the recognized stock exchange within 10 working days of creation of Segregated Portfolio and also enable transfer of such units on receipt of valid transfer requests.
- 3) If the Trustees do not approve the proposal to segregate portfolio, the AMC will issue a press release immediately informing investors of the same.

Processing of Subscription and Redemption Proceeds

 - i. Upon Trustees' approval to create a Segregated Portfolio -
Investors redeeming their units will get redemption proceeds based on the NAV of Main Portfolio and will continue to hold the units of Segregated Portfolio.
Investors subscribing to the scheme will be allotted units only in the Main Portfolio based on its NAV.
 - ii. In case Trustees do not approve the proposal of Segregated Portfolio, subscription and redemption applications will be processed based on the NAV of Total Portfolio.

Disclosure

The AMC shall make necessary disclosures as mandated by SEBI, in statement of account, monthly/half yearly portfolio statements, KIM, SID, Scheme Advertisements, Scheme Performance data, AMC's website and at other places as may be specified.

The information regarding number of Segregated Portfolio(s) created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.

The NAV of the Segregated Portfolio shall be declared on daily basis.

Further, the investors of the Segregated Portfolio shall be duly informed of the recovery proceedings of the investments of the Segregated Portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Total Expense Ratio (TER) for the Segregated Portfolio

- 1) The AMC will not charge investment and advisory fees on the Segregated Portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in Segregated Portfolio.
- 2) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the Main Portfolio (in % terms) during the period for which the Segregated Portfolio was in existence.
- 3) The legal charges related to recovery of the investments of the Segregated Portfolio may be charged to the Segregated Portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the Main Portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- 4) The costs related to Segregated Portfolio shall in no case be charged to the Main Portfolio.

Monitoring by Trustees

The Trustees will monitor the compliance of the SEBI Circular in respect of creation of Segregated Portfolio and disclosure in this respect shall be made in Half-Yearly Trustee reports filed with SEBI.

In order to avoid mis-use of Segregated Portfolio, Trustees shall have a mechanism in place to negatively impact the performance incentives of fund managers, Chief Investment Officers, etc., involved in the investment process of securities under the Segregated Portfolio, mirroring the existing mechanism for performance incentives of the AMC, including transfer of such impacted amount to the Segregated Portfolio.

Risks associated with Segregated Portfolio

Liquidity risk – Segregated Portfolio is created to separate debt and money market instruments affected by a Credit Event from the Main Portfolio of the Scheme. The Fund will not permit redemption of the Segregated Portfolio units, but the units will be listed on a recognized stock exchange. The Fund is not assuring any liquidity of such units on the stock exchange. Further, trading price of units on the stock exchange may be significantly lower than the prevailing NAV.
