Data as on 31 Mar 2023 unless otherwise given

Did you know that in the long run the midcaps have the potential to outperform the benchmarks? Despite being more volatile, midcaps could offer higher growth opportunities and have the potential to generate alpha in the long run.

Why HSBC Mid Cap Fund?

- To seek an exposure in mid cap segment stocks for higher alpha generating opportunities
- A top down and bottom up approach will be used to invest in equity and equity related instruments
- To create a corpus through generating inflation-adjusted returns to cater to long-term goals

Fund Philosophy

- The fund manager actively looks out to identify opportunities in the midcap space arising out of macroeconomic dynamics, new reforms and policies, etc.
- It has a long term performance track record and potential for alpha generation for investors that have patience to endure volatility and stay invested for the long term
- The fund follows robust risk management practice to manage and mitigate risks, especially the ones specific to midcap segment of the market for e.g. Liquidity

Investment Objective

To seek to generate long-term capital growth from an actively managed portfolio of equity and equity related securities of predominantly mid cap companies. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.
