While volatility is a big fear for most investors, disciplined value investors don't equate volatility with risk. Such investors, instead, turn to buying stocks that are trading at a discount to their intrinsic value. Even the most successful global investors of all time advocate the value investing approach to unearth good businesses at good prices.

Why HSBC Value Fund?

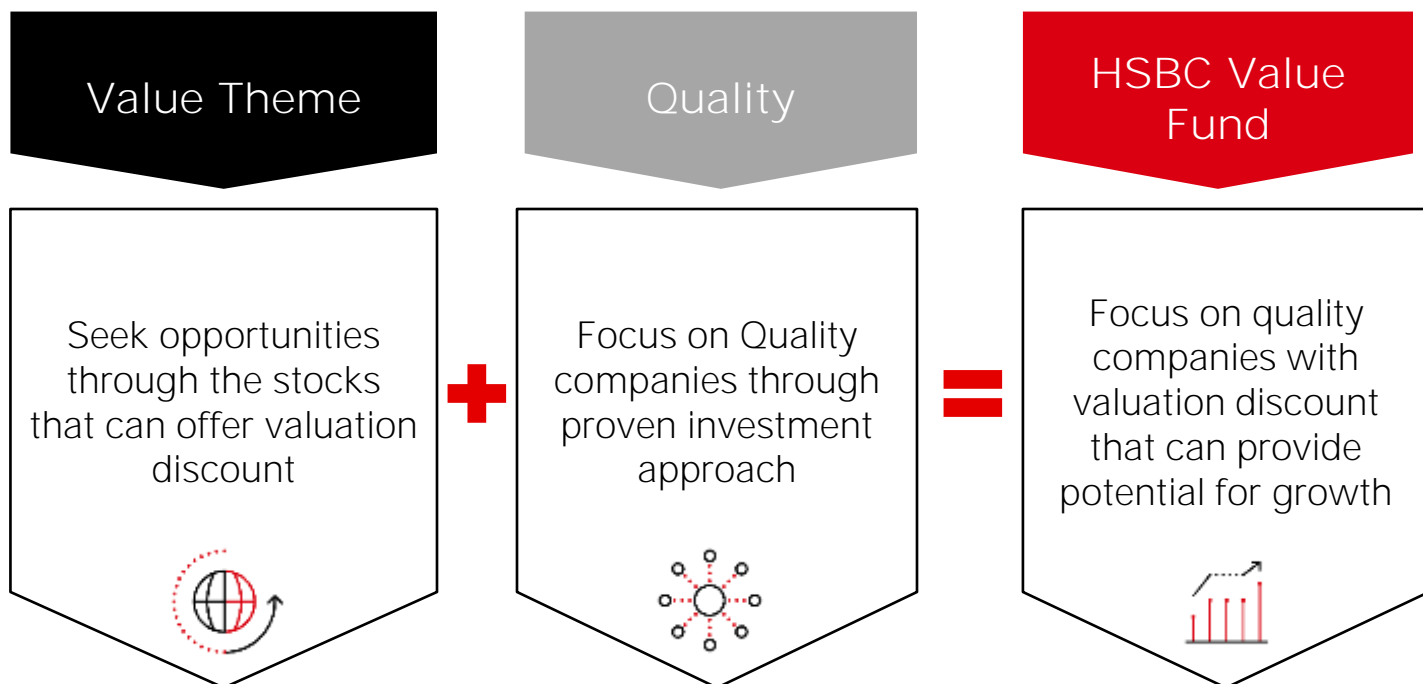

- To seek an exposure to value style companies
- Aim to identify undervalued stocks having the potential to deliver long term risk-adjusted returns
- Undervalued stocks would include stocks which the Fund Managers believe are trading at less than their assessed values
- Long term capital appreciation
- Aims to create a corpus through generating inflation-adjusted returns to help to long-term goals

Fund Approach

- Diversified equity fund with strong value bias that aims to deliver long term reasonable risk adjusted returns
- Focus on identifying valuation anomalies versus the economic potential of the business over the medium term
- Aims to minimize portfolio risk by investing in quality companies, monitoring corporate fundamentals closely
- The fund looks to invest in fundamentally strong companies that the fund manager believes are trading at less than their assessed values thus offering higher upside potential
- This approach not only helps in identifying undervalued stocks but also factor-in the risk elements while picking stocks

Investment Objective

The investment objective of the Scheme is to generate long-term capital appreciation from a diversified portfolio of predominantly equity and equity related securities, in the Indian markets with higher focus on undervalued securities. The Scheme could also additionally invest in Foreign Securities in international markets.

Fund Manager - Venugopal Manghat Effective 24 Nov 2012. Total Schemes Managed - 7; Fund Manager - Gautam Bhupal Effective 01 Oct 2023. Total Schemes Managed - 13;
Fund Manager - Sonal Gupta Effective 05 Jul 2021. Total Schemes Managed - 19
