### Investment Objective

HSBC Aspire Portfolio aims to generate long-term capital growth from an actively managed portfolio of equity and equity related securities predominately from the mid and small cap companies. However, the approach would also have the flexibility to invest in companies across the entire market capitalization spectrum. There can be no assurance or guarantee the objective of the investment approach would be achieved

**Benchmark:** • Regulatory Benchmark/ Strategy Benchmark: S&P BSE 500 TRI  
• Secondary Benchmark: Nifty MidSmall 400 Index

### Rationale for selection of benchmark –

Regulatory Benchmark/ Strategy Benchmark: Benchmark prescribed by Association of Portfolio Managers in India (APMI) as mandated by SEBI to evaluate relative performance of the portfolio. This is decided by APMI as per market-cap based methodology for equity strategy. Secondary Benchmark: The portfolio is also being benchmarked against the Nifty MidSmall 400 Index since its composition is in line with the objective of the investment approach. The index comprises of mid and small cap companies and is also suited for comparing the performance of the portfolio.

### HSBC Aspire Portfolio

HSBC Portfolio Management Services presents HSBC Aspire Portfolio, which aims to invest your money in emerging themes from Mid and Small Cap stocks to which may lead in the next decade.

### Why Mid and Small Cap stocks?

- Stocks from relatively new sectors are getting listed and many of these are mid - small cap stocks
- India gaining traction as a manufacturing source would mean opportunities for a lot of ancillary sectors which would be smaller in size
- Historically, Mid and Small Cap stocks have delivered reasonable performance over medium to long term
- Small and Mid Cap stocks are good options to hold emerging business leaders. More Mid-Small cap businesses are dependent on domestic factors
- Mid and Small Cap stocks offer potential of delivering growth and alpha in the long term

## Description of types of securities

Equity and equity related securities including convertible bonds and debentures and warrants carrying the right to obtain equity shares  
Derivatives instruments as may be permitted by SEBI / RBI  
Units of liquid funds/overnight funds of HSBC Mutual Fund  
Cash and Cash equivalents  
Any other instruments as may be permitted by RBI / SEBI / such other Regulatory authorities from time to time

## Allocation of portfolio across types of securities

The investment approach has the mandate to predominantly invest in Equity and Equity related instruments of mid cap and small cap companies. However, the investment approach has the flexibility to invest in companies across the entire market capitalization spectrum.

## Risk associated with investment approach

Deployment of monies under the investment approach will be oriented towards equity and equity related securities of companies belonging to mid cap and small cap. Stocks of these companies usually have lower trading volumes on the exchanges, which may result into higher impact costs and longer execution time compared to large cap stocks. These companies tend to be less researched compared to large cap stocks and this may result into longer waiting period for the stock to reach their potential intrinsic value. A lot of smaller companies can be highly volatile and hence tend to have large up and down movements which may result in periods where the investor may see drawdowns. Further, small cap companies have higher opportunities of growth but these come with higher amount of risk as well and therefore, are suitable only for those investors who have higher risk appetite. It is likely that the portfolio may also experience period of volatile performance and liquidity challenges in view of its exposure towards mid and small cap companies. These companies will also be affected by the broader macro-economic environment such as interest rate changes, liquidity, cross border fund flows, statutory/regulatory changes etc.

Since the portfolio is expected to be concentrated with exposure to select themes/sectors, it may perform differently from the broader stock markets/benchmark, but may still be impacted by broad market movements. It is likely that the portfolio may also experience period of volatile performance and liquidity challenges in view of the limited number of stocks invested in by the fund manager.
